Warning: Beta software You are using a software that has not reached a stable version yet. Please beware that interfaces might change, APIs might disappear and general breakage can occur before *1.0*.

If you plan to use this software for something important, please read the roadmap, and the issue tracker in Github. If you are unsure about the future of this project, please talk to the developers, or (better yet) get involved with the development of Projeto Rabot!

Projeto rabot is a bot implementation for helping students improve mental health by detecting possible risk behaviours and a Python sub-language.
