- pyai on PyPI: <https://pypi.python.org/pypi/jdhp-pyai>

Description

This is a set of open source frameworks for Artificial Intelligence (mostly machine learning and optimization).

This contains (among others):

- a blackbox non linear noisy optimization framework;
- a machine learning framework;
- a multistage optimization and Markov Decision Process framework (Markov Decision Processes).

Note:

This project is still in beta stage, so the API is not finalized yet.

Dependencies

- Python ≥ 3.0
- Numpy
- Matplotlib

Installation

Gnu/Linux

You can install, upgrade, uninstall PyAI with these commands (in a terminal):

```
pip install --pre jdhp-pyai
pip install --upgrade jdhp-pyai
pip uninstall jdhp-pyai
```

Or, if you have downloaded the PyAI source code:

```
python3 setup.py install
```

Windows

You can install, upgrade, uninstall PyAI with these commands (in a command prompt):

```
py -m pip install --pre jdhp-pyai
py -m pip install --upgrade jdhp-pyai
py -m pip uninstall jdhp-pyai
```

Or, if you have downloaded the PyAI source code:

```
py setup.py install
```

MacOSX

You can install, upgrade, uninstall PyAI with these commands (in a terminal):

```
pip install --pre jdhp-pyai
pip install --upgrade jdhp-pyai
pip uninstall jdhp-pyai
```

Or, if you have downloaded the PyAI source code:

```
python3 setup.py install
```

Documentation

- Online documentation: <http://pyai.readthedocs.org>
- API documentation: <http://pyai.readthedocs.org/en/latest/api.html>

Example usage

TODO

Bug reports

To search for bugs or report them, please use the PyAI Bug Tracker at:

<https://github.com/jeremiedecock/pyai/issues>

License

This project is provided under the terms and conditions of the [MIT License](#).

Indices and tables

- [genindex](#)
- [modindex](#)
- [search](#)

CHAPTER 2

API

The library provides classes which are usable by third party tools.

Note: This project is still in *beta* stage, so the API is not finalized yet.

Modules:

TODO_PYTHON_PACKAGE_NAME.TODO_PACKAGE_NAME

Source code

The source code is currently available on [GitHub](#) under the terms and conditions of the MIT license. Fork away!

Bug reports

To search for bugs or report them, please use the Bug Tracker at:

<https://github.com/jeremiedecock/pyai/issues>

Contribute

This project is written for Python 3.x. Python 2.x is *not* supported.

The [TODO.md](#) file contains the TODO list.

All contributions should at least comply with the following [PEPs](#):

- [PEP8](#) “Python’s good practices”
- [PEP257](#) “Docstring Conventions”
- [PEP287](#) “reStructuredText Docstring Format”

All contribution should be properly documented and tested with [unittest](#) and/or [doctest](#).

[pylint](#), [pep8](#) and [pyflakes](#) should also be used to check the quality of each module.

Docstrings should be compatible with the [Sphinx “napoleon” extension](#) and follow the Numpy style:

- [Please follow this guide](#)
- [Be inspired by these examples](#)

Changes

0.1 (????-??-??)

Initial version

0.2 (????-??-??)

Changes:

- switch to Python 3
- update the docstrings
- change the package name (*pyai*)
- miscellaneous updates and bug fixes

Packaging:

- write the *setup.py* file
- write a script to automatically build the Debian package
- Web site: http://www.jdhp.org/software_en.html#pyai
- Online documentation: <http://pyai.readthedocs.org>
- Source code: <https://github.com/jeremiedecock/pyai>
- Issue tracker: <https://github.com/jeremiedecock/pyai/issues>
- pyai on PyPI: <https://pypi.python.org/pypi/jdhp-pyai>

CHAPTER 4

Indices and tables

- `genindex`
- `modindex`
- `search`
