A python wrapper for the ClickUp API
pyclickup's source code hosted on [GitHub](#).
New to pyclickup? These may help:

CHAPTER 1

Quickstart

This document presents a brief, high-level overview of pyclickup's primary features.

pyclickup is a python wrapper for the ClickUp API

Note: Be aware that this uses the [ClickUP API](#) directly. The ClickUp API is currently in beta, and is subject to change.

At the time of writing, ClickUp has the following limits in place for API requests:

- 100 requests per minute per token

1.1 Installation

```
# install pyclickup
pip install pyclickup
```

1.2 Basic Usage

```
from pyclickup import ClickUp

clickup = ClickUp('$ACCESS_TOKEN')

main_team = clickup.teams[0]
main_space = main_team.spaces[0]
members = main_space.members

main_project = main_space.projects[0]
```

(continues on next page)

(continued from previous page)

```
main_list = main_project.lists[0]  
tasks = main_list.get_all_tasks(include_closed=True)
```

CHAPTER 2

Note

If you find any bugs, odd behavior, or have an idea for a new feature please don't hesitate to open an issue!

CHAPTER 3

Indices and tables

- `genindex`
- `modindex`
- `search`
