A library to convert between AQI value and pollutant concentration ($\mu\text{g}/\text{m}^3$ or ppm) using the following algorithms:

- United States Environmental Protection Agency (EPA)
- China Ministry of Environmental Protection (MEP)

CHAPTER 1

Install

```
$ pip install python-aqi
```

2.1 Library

Convert a pollutant to its IAQI (Intermediate Air Quality Index):

```
import aqi
myaqi = aqi.to_iaqi(aqi.POLLUTANT_PM25, '12', algo=aqi.ALGO_EPA)
```

Get an AQI out of several pollutant concentrations, default algorithm is EPA:

```
import aqi
myaqi = aqi.to_aqi([
    (aqi.POLLUTANT_PM25, '12'),
    (aqi.POLLUTANT_PM10, '24'),
    (aqi.POLLUTANT_O3_8H, '0.087')
])
```

Convert an IAQI to its pollutant concentration:

```
import aqi
mycc = aqi.to_cc(aqi.POLLUTANT_PM25, '22', algo=aqi.ALGO_EPA)
```

2.2 Command line

List supported algorithms and pollutants:

```
$ aqi -l
aqi.algos.epa: pm10 (µg/m³), o3_8h (ppm), co_8h (ppm), no2_1h (ppb), o3_1h (ppm), so2_
→1h (ppb), pm25 (µg/m³)
aqi.algos.mep: no2_24h (µg/m³), so2_24h (µg/m³), no2_1h (µg/m³), pm10 (µg/m³), o3_1h_
→(µg/m³), o3_8h (µg/m³), so2_1h (µg/m³), co_1h (mg/m³), pm25 (µg/m³), co_24h (mg/m³)
```

Convert PM2.5 to IAQI using EPA algorithm:

```
$ aqi aqi.algos.epa pm25:12
50
```

Convert PM2.5 to IAQI using EPA algorithm (full length):

```
$ aqi -c aqi aqi.algos.epa pm25:12
50
```

Convert pollutants concentrations to AQI using EPA algorithm:

```
$ aqi aqi.algos.epa pm25:40.9 o3_8h:0.077 co_1h:8.4
114
```

Convert pollutants concentrations to AQI using EPA algorithm, display IAQIs:

```
$ aqi -v aqi.algos.epa pm25:40.9 o3_8h:0.077 co_1h:8.4
pm25:102 o3_8h:104 co_1h:90
114
```

Convert PM2.5 IAQI to concentration using EPA algorithm:

```
$ aqi -c cc aqi.algos.epa pm25:39
pm2.5:9.3
```

CHAPTER 3

Development

To install the development environment:

```
$ pip install -r dev_requirements.txt
```

CHAPTER 4

Test

Test the package:

```
$ python -m unittest discover
```

Automatic testing in various environments:

```
$ tox
```

CHAPTER 5

Release

Use *bump* to release the package:

```
$ bump -b -m
```
