
Python library Template Documentation

Release 0.0.5

Derek Miller <derek@dmiller.me>

January 15, 2017

1	Installation	3
2	Usage	5
3	Scripts	7
3.1	<script_name>	7
3.2	v0.0.5 - 01/14/2017	7
3.3	v0.0.4 - 09/17/2016	7
3.4	v0.0.3 - 07/07/2016	7
3.5	v0.0.2 - 06/12/2016	7
3.6	v0.0.1 - 05/30/2016	8
4	Indices and tables	9
4.1	Site Map	9
	Python Module Index	11

Python library template project.

Installation

```
pip install python-template
```

Or to manually install, execute the following commands:

```
git clone https://github.com/derek-miller/python-template.git
cd python-template/
python setup.py install
```

Usage

```
# Insert demo code here
```

3.1 <script_name>

```
# Insert usage text here
```

For full API usage documentation, refer to the API

3.2 v0.0.5 - 01/14/2017

- Added python 3.6 to the travis build
- Removed the unsafe usage of the project_dir variable in the Makefile
- Switched to using pycodestyle in place of pep8

3.3 v0.0.4 - 09/17/2016

- Fixed usage of the travis build number in the Makefile
- Change the conda environment variable to the correct one containing only the project name
- Removed the generated api.rst from version control

3.4 v0.0.3 - 07/07/2016

- Unpinned pip now that pip-compile works with 8.1.2

3.5 v0.0.2 - 06/12/2016

- Fixed Makefile install target so it rebuilds the compiled requirements everytime it is run.
- Removed temporary requirement in requirements/install-py2.txt

3.6 v0.0.1 - 05/30/2016

- Initial release

`python_template`

Python library template project.

```
python_template.__author__ = u'Derek Miller'
```

Author

```
python_template.__author_email__ = u'derek@dmiller.me'
```

Author Email

```
python_template.__license__ = u'BSD'
```

License

```
python_template.__maintainer__ = u'Derek Miller'
```

Maintainer

```
python_template.__maintainer_email__ = u'derek@dmiller.me'
```

Maintainer Email

```
python_template.__pkg_name__ = u'python_template'
```

Package Name

```
python_template.__project_description__ = u'Python library template project.'
```

Project Description

```
python_template.__project_name__ = u'Python library Template'
```

Project Name

```
python_template.__project_url__ = u'https://github.com/derek-miller/python-template'
```

Project URL

```
python_template.__release_date__ = u'01/14/2017'
```

Release Date

```
python_template.__version__ = u'0.0.5'
```

Version
