
Quetzal OpenAPI client Documentation

Release 0.5.0

David Ojeda

Oct 17, 2019

Contents:

1	modules	3
1.1	quetzal.openapi_client package	3
2	Indices and tables	5

Warning: The documentation of this package is not entirely compatible with Sphinx.

This is an auto-generated package, with documentation written in markdown. Due to an incompatibility on the links of markdown, none of the markdown files are included in this site. However, they are available from the github repository, with working links.

The purpose of this documentation is to provide a Sphinx RTD site for the models used in the `quetzal.autogen` package so that other packages can reference it.

1.1 quetzal.openapi_client package

1.1.1 Subpackages

quetzal.openapi_client.api package

Submodules

quetzal.openapi_client.api.authentication_api module

quetzal.openapi_client.api.data_api module
