<b>3</b>	<b>tuple(t) function</b>	<b>5</b>

# CHAPTER 1

---

## Getting started

---

Install `rgb2bgr` with “`pip install rgb2bgr`”. Now you can import `rgb2bgr`.

# CHAPTER 2

---

## dict(d) function

---

The dict(d) function is used to convert a dictionary from rgb to bgr. As in this example:

```
import rgb2bgr

d = {
    1: (255, 175, 0),
    2: (0, 255, 0),
    3: (0, 0, 255)
}
print(rgb2bgr.dict(d)) # {1: (0, 175, 255), 2: (0, 255, 0), 3: (255, 0, 0)}
```

# CHAPTER 3

---

## tuple(t) function

---

The tuple(t) function is used in the dict(d) function as well, it converts a tuple from rgb to bgr. As in this example:

```
import rgb2bgr  
  
t = (255, 0, 175)  
print(rgb2bgr(tuple(t))) # (175, 0, 255)
```
