<b>1 computations.py</b>	<b>1</b>
<b>2 Transformations</b>	<b>3</b>
<b>3 pics.py</b>	<b>5</b>

## **computations.py**

---

USAGE: Numerical Computation functions

---

**Transformations**

---

Transformation 1:  $T_1 : M(x_i, y_i) \rightarrow M' \left( \frac{1}{m} \sum_{j=k}^m x_{ij}, y_i \right)$

Transformation 2 (Rotary):  $\text{Rot}(\theta) : M(x, y) \rightarrow M'(x \cos \theta, y \sin \theta)$

Transformation 3:  $M(x, y) \xrightarrow{\text{Rot}(\theta)} M'(x_{min}, y, D - dx)$

**pics.py**

---

USAGE: Image manipulation via PIL
