Serenata de Amor Toolbox

PyPI package to support Serenata de Amor and Rosie development.

1.1 Installation

As this is a work in progress, clone the repo and use it within your virtualenv.

```
$ git clone https://github.com/datasciencebr/serenata-toolbox.git
$ python setup.py develop
```

serenata_toolbox is compatible with Python 3+

1.2 Usage

```
$ python3
>>> from serenata_toolbox import xml2csv
>>> xml2csv.output('Spam and eggs')
2016-12-01 18:14:26 Spam and eggs
```

1.3 Full Documentation

https://serenata_toolbox.readthedocs.io

1.4 Build documentation locally

You will need sphinx installed in your machine

```
$ cd docs
$ make clean;make rst;rm source/modules.rst;make html
```

1.5 Source Code

Feel free to fork, evaluate and contribute to this project.

Source: <https://github.com/datasciencebr/serenata-toolbox/>

1.6 License

MIT licensed.

serenata-toolbox's package contents:

2.1 serenata_toolbox package
