TWO**

---

**DOCUMENTATION**

Read the docs!

## 3.1 API Reference

### 3.1.1 Calculator

The most over-engineered calculator.

`exception simplecalc.calculator.CalculatorValueError`

Custom ValueError for calculation operations.

`exception simplecalc.calculator.CalculatorTypeError`

Custom Type Error for calculation operations.

`simplecalc.calculator.sum_(nums)`

Find the sum of a list of numbers.

**Parameters** `nums` (*list*) – A list of numbers

**Returns** The sum

**Return type** int or float

`simplecalc.calculator.difference(nums)`

Find the difference of a list of numbers.

**Parameters** `nums` (*list*) – A list of numbers

**Returns** The difference

**Return type** int or float

`simplecalc.calculator.product(nums)`

Find the product of a list of numbers.

**Parameters** `nums` (*list*) – A list of numbers

**Returns** The product

**Return type** int or float

`simplecalc.calculator.quotient(nums)`

Find the quotient of a list of numbers.

**Parameters** `nums` (*list*) – A list of numbers

**Returns** The quotient

**Return type** int or float

**FOUR**

---

**CHANGELOG**

## 4.1 Changelog

### 4.1.1 Simplecalc 0.1.0 (2019-07-25)

## 4.2 Features

- Initial release. (#2)

---

**CHAPTER  
FIVE**

---

**INDICES AND TABLES**

- genindex
- modindex
- search

## PYTHON MODULE INDEX
