Release 0.1.0

Nicola Coretti

February 01, 2016

1	SirTalkAlot	3
1.1	Status	3
1.2	Tickets	3
2	Tools	5
3	API	7
4	Indices and tables	9

Contents:

SirTalkAlot is a Slack (RTM) based bot which provides a simple service based slack bot.

1.1 Status

1.2 Tickets

1.2.1 Project Structure

The project is split into 3 different modules.

- bot
- services
- websocket

1.2.2 bot

TBD

1.2.3 services

TBD

1.2.4 websocket

This module contains a websocket client which is necessary to use the RTM. SirTalkAlot currently does not provide it's own implementation, he just uses a small wrapper around the ws4py web socket client. See [ws4py](#).

Tools

Indices and tables

- `genindex`
- `modindex`
- `search`
