sisyphus Documentation

Release latest

Oct 10, 2020

Contents

Sisyphus is a modern, fully automized junk mail handler. It requires no configuration and no user interaction to improve the accuracy of its learning algorithm.

CHAPTER 1

Features

- no configuration required
- no user interaction
- real-time filtering and learning
- handles multiple mail directories
- compatible with Maildir
- daemonized

Installation

- **Installation from binary:**

  1. download the sisyphus binary for your operating system

  2. place the binary in your path

  3. run sisyphus

- **Installation from source:**

  1. Clone git repository

  2. Install glide

  3. Run: glide install

  4. Run: go install

Contribute
