Sisyphus is a modern, fully automatized junk mail handler. It requires no configuration and no user interaction to improve the accuracy of its learning algorithm.

CHAPTER 1

Features

- no configuration required
- no user interaction
- real-time filtering and learning
- handles multiple mail directories
- compatible with Maildir
- daemonized

CHAPTER 2

Installation

- **Installation from binary:**

1. download the sisyphus binary for your operating system
2. place the binary in your path
3. run sisyphus

- **Installation from source:**

1. Clone git repository
2. Install glide
3. Run: glide install
4. Run: go install

CHAPTER 3

Contribute

- Issue Tracker: <https://github.com/carlostrub/sisyphus/issues>
- Source Code: <https://github.com/carlostrub/sisyphus>

CHAPTER 4

Support

If you are having issues, please let me know via issue tracker.
