CHAPTER 2

History

2.1 2013-10-17

- [pypi] update MANIFEST.in to fix packaging bug

- [docs] readthedocs

- no longer use pystache, remove old tpl files.

- bump to 0.1.1, 0.1.2

2.2 2013-10-08

- 0.1.0 initial release

Note: sphinxcontrib-github needs your help reporting errors, bugs and usability feedback. If you encounter an error, please post on the Issue tracker.

CHAPTER 3

Roadmap

- docs
- allow `conf.py` and directive option to override template for directives and roles.

```
$ pip install sphinxcontrib-github
```

Add sphinxcontrib-github to your `extensions` in `conf.py`.

```
extensions.append('sphinxcontrib.github')
```

or change:

```
extensions = ['sphinx.ext.intersphinx', ...]
```

to:

```
extensions = ['sphinx.ext.intersphinx', 'sphinxcontrib.github', ...]
```

Setting up API access

First use will require entering your github username and password. Read the source for logging in. It will create an API key with github and save an api id and api key for future usage in your projects directory.

Add `.github.auth` to your `.gitignore`.

Usage

5.1 github pull request role

```
:github-pr:`saltstack/salt/pull/7665`
```

output:

salt (#7665) *Fixed tags for progress events and preload*

24 additions(+), 12 deletion(-) 2013-10-08

5.2 github repo role

```
:github-repo:`saltstack/salt`
```

output:

salt-states-configs: github

5.3 github repo directive

```
.. github-repo:: saltstack/salt
   :homepage: http://www.saltstack.org/
   :travis: https://www.travis-ci.org/saltstack/salt/
   :docs: http://salt.readthedocs.org/en/v0.16.4/
   :api: http://salt.readthedocs.org/en/v0.16.4/ref/python-api.html
   :pypi: https://pypi.python.org/pypi/salt
```

output:

github - travis - docs - api - pypi - homepage - 2296 watchers - 813 forks

python support	2.7
sphinx support	>=0.6
Docs	http://sphinxcontrib-github.rtfd.org
API	http://sphinxcontrib-github.readthedocs.org/en/latest/api.html
