# **spikesortingvalidation Documentation**

***Release 0.1.0.dev***

**Pierre Yger, Samuel Garcia**

December 02, 2016

<b>1</b>	<b>Indices and tables</b>	<b>3</b>
----------	---------------------------	----------

The goal of this package is to gather a set of algorithms or metrics that could be used to validate spike sorting algorithms. The metrics should be spike-sorting algorithms independent, in order to be as generic as possible. You should be able to find here

- Documentation on the metrics, always with a proper reference
- Methods to generate synthetic datasets, or so-called ground truth

---

## Indices and tables

---

- `genindex`
- `modindex`
- `search`
