
SWC-registry-python Documentation

Release latest

Jan 04, 2019

Contents

1	Quick start	3
2	Get the latest content of SWC-registry	5

SWC-registry-python is a python package for accessing SWC-registry content.

CHAPTER 1

Quick start

Assuming you have Python already:

```
$ pip install swc-registry
```

Check the package work:

```
from swc_registry import SWC

swc = SWC('SWC-100')
print(swc.title)

// Function Default Visibility
```

Get the latest content of SWC-registry

On first use of the SWC methods, the SWC registry is initialized from file (swc-definition.json) out cache. If user wants to get the latest information about SWC-registry he needs to pass the second argument of SWC class.

```
from swc_registry import SWC

swc = SWC('SWC-100', True)
print(swc.title)

// Function Default Visibility
```
