Python **45**

1.1

pip :

```
pip install teambition
```

wechatpy :

```
pip install -U teambition
```

GitHub :

```
pip install https://github.com/messense/teambition-api/archive/master.zip
```

1.2 Teambition API

Teambition :

```
from teambition import Teambition

tb = Teambition('key', 'secret')
authorize_url = tb.oauth.get_authorize_url('http://localhost')
me = tb.users.me()
#  API
# tb.projects.xxx()
# tb.tasks.xxx()
```

TeambitionException:

```
from teambition import Teambition, TeambitionException

tb = Teambition('key', 'secret', access_token='123456')
try:
    tb.projects.get()
except TeambitionException as e:
    #
    print(e.code)
    #
    print(e.message)
    #
```

```
    e.client
    #
    e.request
    #
    e.response
```
