<b>1</b>	<b>PACKAGENAME</b>	<b>1</b>
1.1	Where to Find PACKAGENAME . . . . .	1
1.2	Installation . . . . .	1
1.3	User Documentation . . . . .	1
1.4	Reporting Issues . . . . .	1
1.5	Contributing . . . . .	2
1.6	Reference API . . . . .	2

Replace occurrences of “PACKAGENAME” throughout the template with the name of your software package

### 1.1 Where to Find PACKAGENAME

Give some basic information about where to find the software

### 1.2 Installation

Explain how to install your software, some topics might be:

- requirements
- how to install
- basic usage
- common problems

### 1.3 User Documentation

Explain how to use your software

### 1.4 Reporting Issues

How and where should users report problems

## 1.5 Contributing

Discuss how or if your software accepts contributions. This package template has a default CONTRIBUTING.md file that can be referenced here. It may include sections such as:

- How to make a code contribution
- Coding Guidelines

## 1.6 Reference API

Package documentation usually pulled from docstrings inside the code

---

**Note:** The layout of this directory is simply a suggestion. To follow traditional practice, do *not* edit this page, but instead place all documentation for the package inside `packagename/`. You can follow this practice or choose your own layout.
