Release 4.4

Nov 22, 2019
## Contents

1 Asset 3
2 Asset Line 5
The account_asset module adds the depreciation of fixed assets.
An Asset defines how an asset is depreciated. It is mainly defined by:

- Product (of type “Assets”).
- Journal.
- Value and Residual Value.
- Start and End Date.
- Depreciation Method: - Linear
- Frequency: - Monthly - Yearly
- Lines.

The asset can be in one of these states:

- Draft
  The depreciation lines can be created.
- Running
  The accounting moves of depreciation lines are posted.
- Closed
  The value of the asset has been completely depreciated.

A wizard “Create Assets Moves” allows to post all accounting move up to a date.
An Asset Line defines for a date the value to depreciate.
