Contents

1 Tax Rule Line

3

The `account_tax_rule` module extends the tax rule to add origin and destination countries as criteria.

CHAPTER 1

Tax Rule Line

Two criteria fields are added:

- From Country: The country of origin
- To Country: The country of destination

The countries are picked from the origin document:

- Sale:
 - The origin country comes from the address of the warehouse.
 - The destination country comes from the shipping address.
- Purchase:
 - The origin country comes from the invoice address.
 - The destination country comes from the address of the warehouse.
