1 Agent	3
2 Commission Plan	5
2.1 Line	5

The commission module allows to manage commission for sale's agent. A commission move is created when posting the invoice, following the agent's commission plan.

CHAPTER 1

Agent

An agent links a party with a commission plan and method.

- The *Plan* is the commission plan.
- The *Account* is the payable account on which the commission will be credited.
- **The *Commission Method* defines when the commission will be due:**
 - *On Posting*: when the invoice is posted.
 - *On Payment*: when the invoice is paid.

Commission Plan

A plan contains a sets of lines that defines the formula to use to compute the commission amount. The line is selected by choosing the first that matches the criteria.

- The *Commission Product* is used to debit the commission using its expense account.

2.1 Line

- The *Formula* is a Python expression that will be evaluated with *amount* as the invoiced amount.

The criteria:

- *Product*.
