---

## Contents

---

<b>1</b>	<b>Tarif Code</b>	<b>3</b>
<b>2</b>	<b>Duty Rate</b>	<b>5</b>

The customs module allows to define customs duty based on the tariff code.

# CHAPTER 1

---

## Tarif Code

---

It stores the *Harmonized System* that can be set on *Product*.

- The *Code* from the HS.
- The *Country* in case of a country specific code.
- The *Start / End* period of the year for which the code is valid.

It stores the rate of a *Tarif Code* for a country over a period.

- The *Tariff Code*.
- The *Country* for which the rate is.
- The *Type: Import* or *Export*
- The *Start* and *End* date of validity.
- **The *Computation Type*:**
  - *Amount*: fixed amount with currency.
  - *Quantity*: amount (in currency) per unit of measure.
