General Information

1.1 General Information

Thank you for purchasing Weddington! We're very pleased that you have chosen our theme to use on your website. We're doing our best not to disappoint you! Before you get started, please check out these documentation pages. Weddington can only be used with WordPress and we assume that you already have it installed and ready to go. If you don't, please see [WordPress Codex](#) to get started.

1.2 Requirements

Before using Weddington, please meet the following requirements:

- Essentials to run WordPress – Read more about [WordPress Minimum Requirements](#) – in case any doubts regarding the server, contact your host provider.
- Latest version of WordPress, which you can [download here](#).
- Create secure [FTP](#) and Database.

1.3 Installation

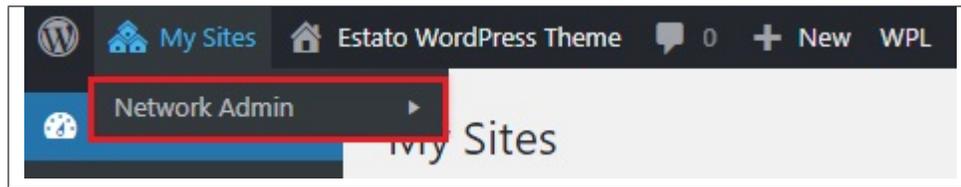

In our guide, we will show you step by step instructions on how to install our WordPress theme for beginners. Below you will find two ways to install a WordPress theme.

1.3.1 Installation via Administration Panel

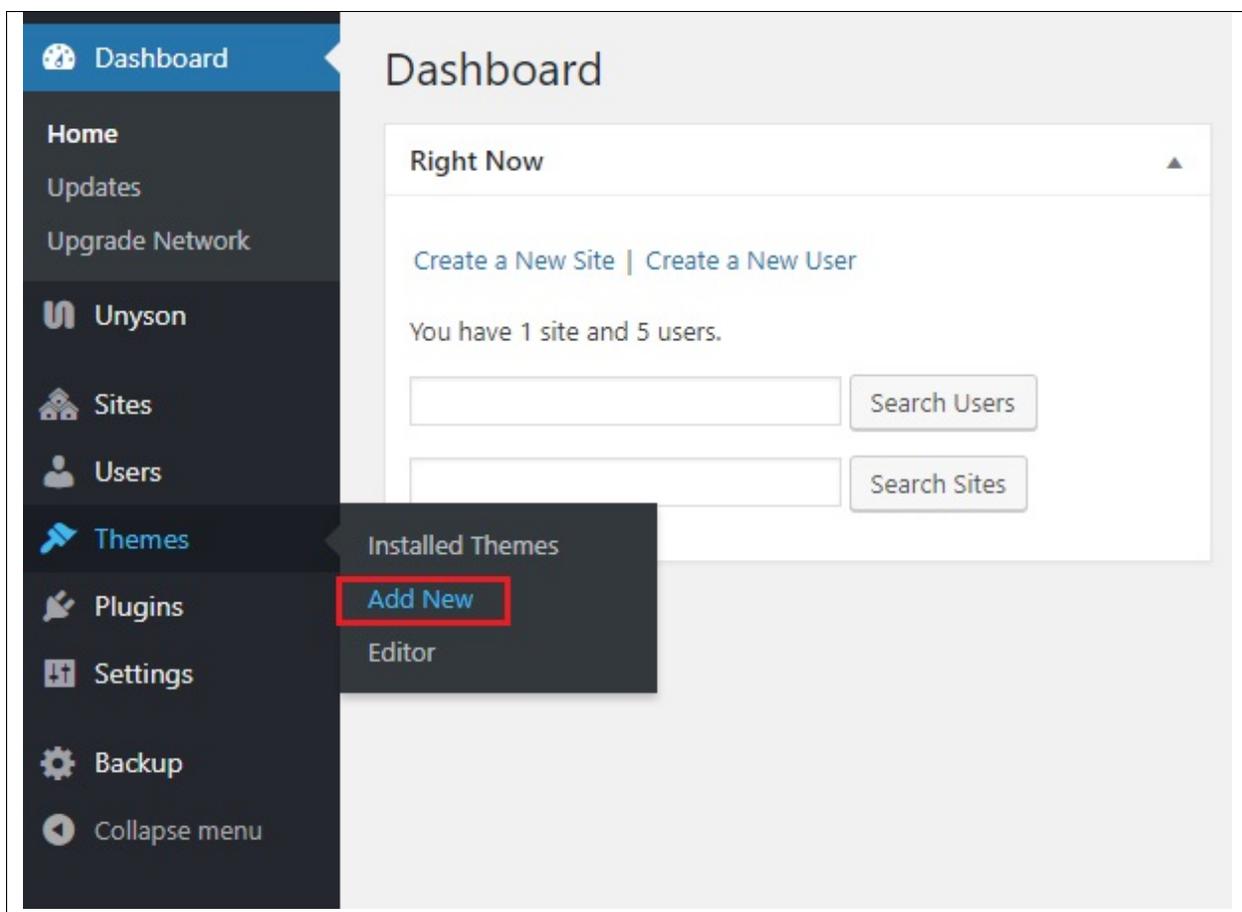

If Weddington files are downloaded from your Themeforest account, you can start an installation using WordPress administration panel.

Follow steps below to install the theme:

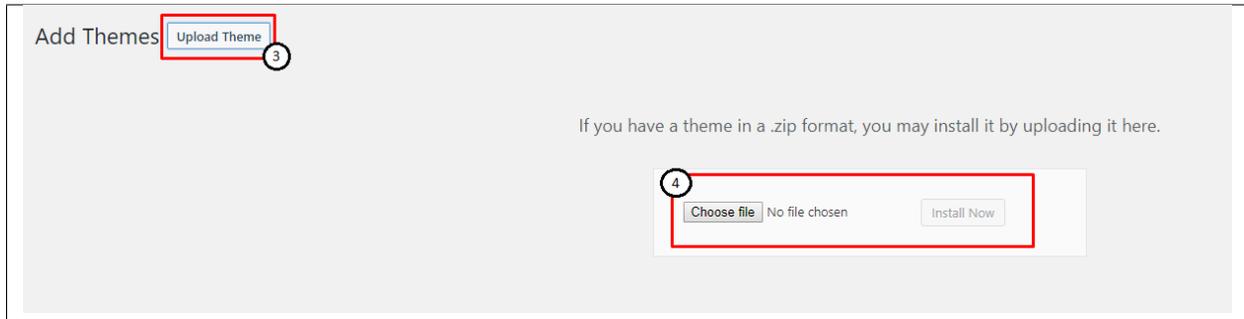

- **Step 1** - Once you've logged in to your administration panel, go to *My Sites > Network Admin*.

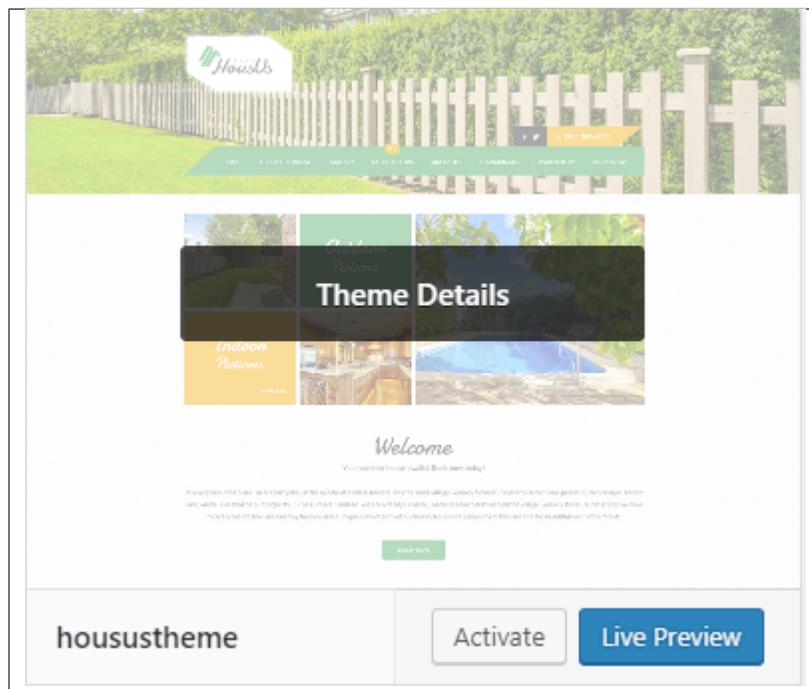

- **Step 2** - Then click on *Themes > Add New*, you will be directed to a page where you can choose available themes.

- **Step 3** - Once directed to the page, on the upper left side of the screen click on *Upload Theme* button.
- **Step 4** - Choose the *Weddingtontheme.zip* file from your computer, then click *Install Now*.

- **Step 5** - Click on *My Sites* then go to *Appearance > Themes* and *Activate Weddington*.

- **Step 6** - After activating *Weddington*, you will be sent to *Theme Installation Instruction* steps. By following this steps you will be asked to install required plugins, activate them, and import demo content (required).

Theme installation instructions

Please follow these steps:

1. Install all required plugins, click here: [install plugins](#)
2. Activate all required plugins, click here: [activate plugins](#)
3. Import demo content, click here: (click only when the theme plugin is active)

Done!

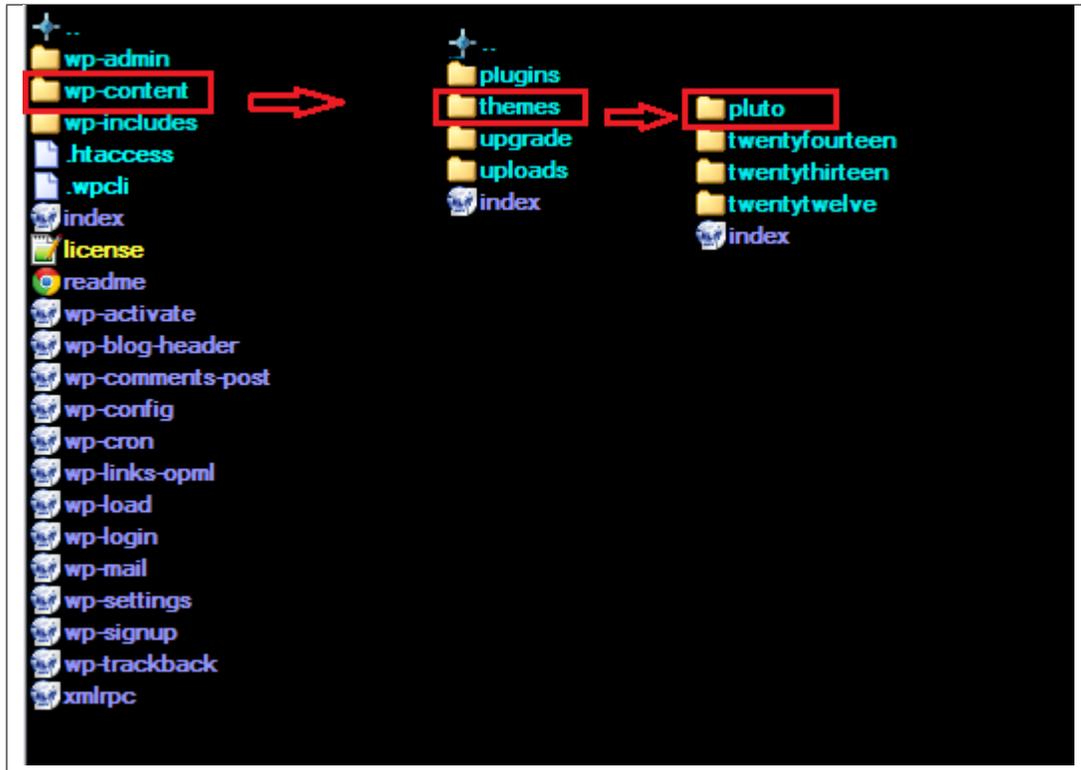

Common Install Error: Are You Sure You Want To Do This?

If you get the following question message when installing *Weddingtontheme.zip* file via WordPress, it means that you have an upload file size limit. *Install the theme via FTP* or call your hosting company and ask them to increase the limit.

1.3.2 Installation via FTP

To install Weddington WP via FTP, follow steps below:

- **Step 1** – Unarchive *Weddingtontheme.zip* file
- **Step 2** – Access your host web server using FTP client
- **Step 3** – Find directory *wp-content > themes*
- **Step 4** – Put folder Weddingtontheme in directory *wp-content > themes*

- **Step 5** - Go to your WordPress administration panel, navigate to *Appearance > Themes* then activate **Weddingtontheme**.

Learn more:

- [WordPress Codex – FTP clients](#)

1.4 Unyson, Extension, and Plugins

Some functionalities of the Weddington Theme are available because of the plugins we used to create it. Once Weddington is activated in your WordPress admin panel you should see notification about bundled plugins we recommend to install – they are included in Weddington package – so you don't have to do anything more than click *install* and *activate*.

1.4.1 Unyson

Unyson is a framework for WordPress that facilitates development of a theme. This framework was created from the ground up by the team behind ThemeFuse from the desire to empower developers to build outstanding WordPress themes fast and easy. This documentation is heavily modified by createIT to ensure all custom extensions are well documented.

This documentation assumes you have a working knowledge of WordPress. If you haven't, please start by reading [WordPress Documentation](#).

Minimum Requirements

Server:

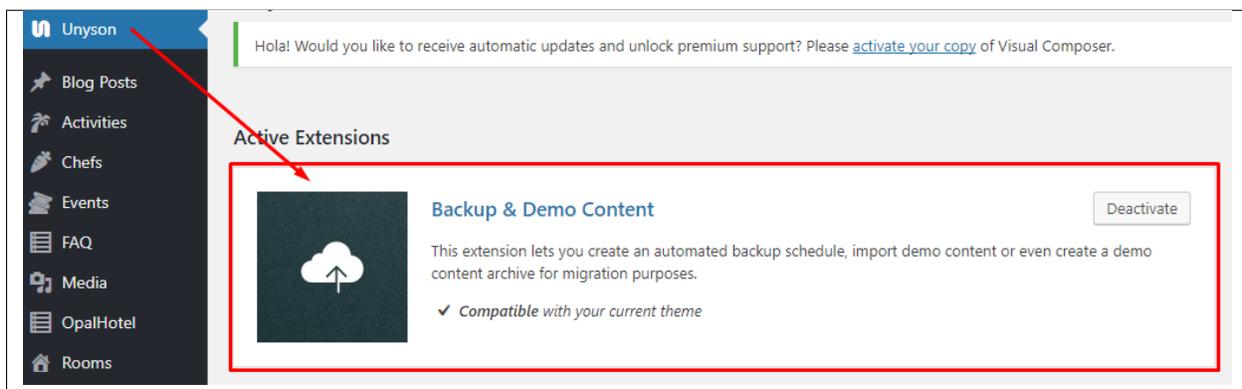

- PHP 7.2 or greater
- MySQL 5.6 or greater OR MariaDB 10.0 or greater
- Nginx or Apache with mod_rewrite module
- HTTPS support

Wordpress: 4.9

Installation

Unyson is part of *Weddington plugin* that should be activated to be able to use the fully use this theme.

After plugin will be activated you will notice the Unyson entry in the sidebar:

Configure the plugin by going to the Unyson menu and activating the following extensions:

- Backup & Demo Content: This extension lets you create an automated backup schedule, import demo content or even create a demo content archive for migration purposes.
- SASS Compiler: Compiles SASS files. Remember to activate it when you are going to change theme colors via Customize.
- Visual Composer: Allows for seamless integration with Visual Composer
- CT FAQ: This extension will add FAQ post type support
- CT Portfolio: This extension will add portfolio post type support.
- CT Header: This extension will add header options.
- CT Gallery: This extension will add gallery post type support.

License

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software. Unyson inherits the [General Public License \(GPL\)](#) from WordPress.

1.4.2 Extension

On the Unyson page, you'll see a list of available extensions separated in two sections:

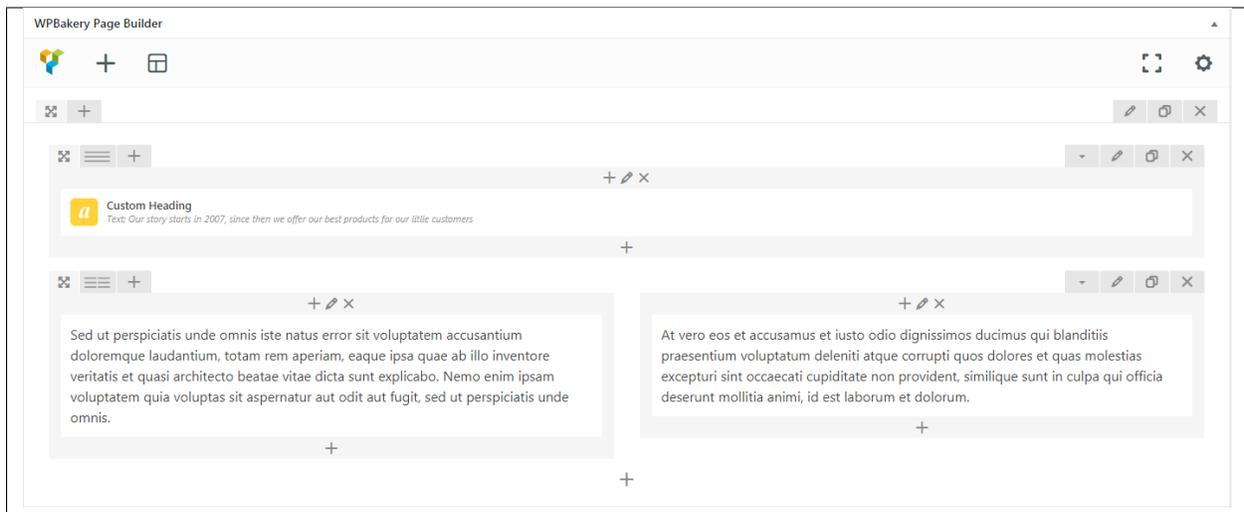

Active Extensions - Extensions that *should be activate* to be able to fully use Weddington WP theme functionality:

Available Extensions - Extensions not yet downloaded or activate.

Note: We recommend to not activate any of the extensions that are not part of the list above. They may not be compatible with the theme and could create unexpected issues.

1.4.3 Plugins

Visual Composer

Simply drag and drop elements to build your page content. We prepared components which will help you determine main structure of the webpage – easily set up backgrounds, colors and styles for whole sections as well as lots of various smaller components which you can freely put wherever you want.

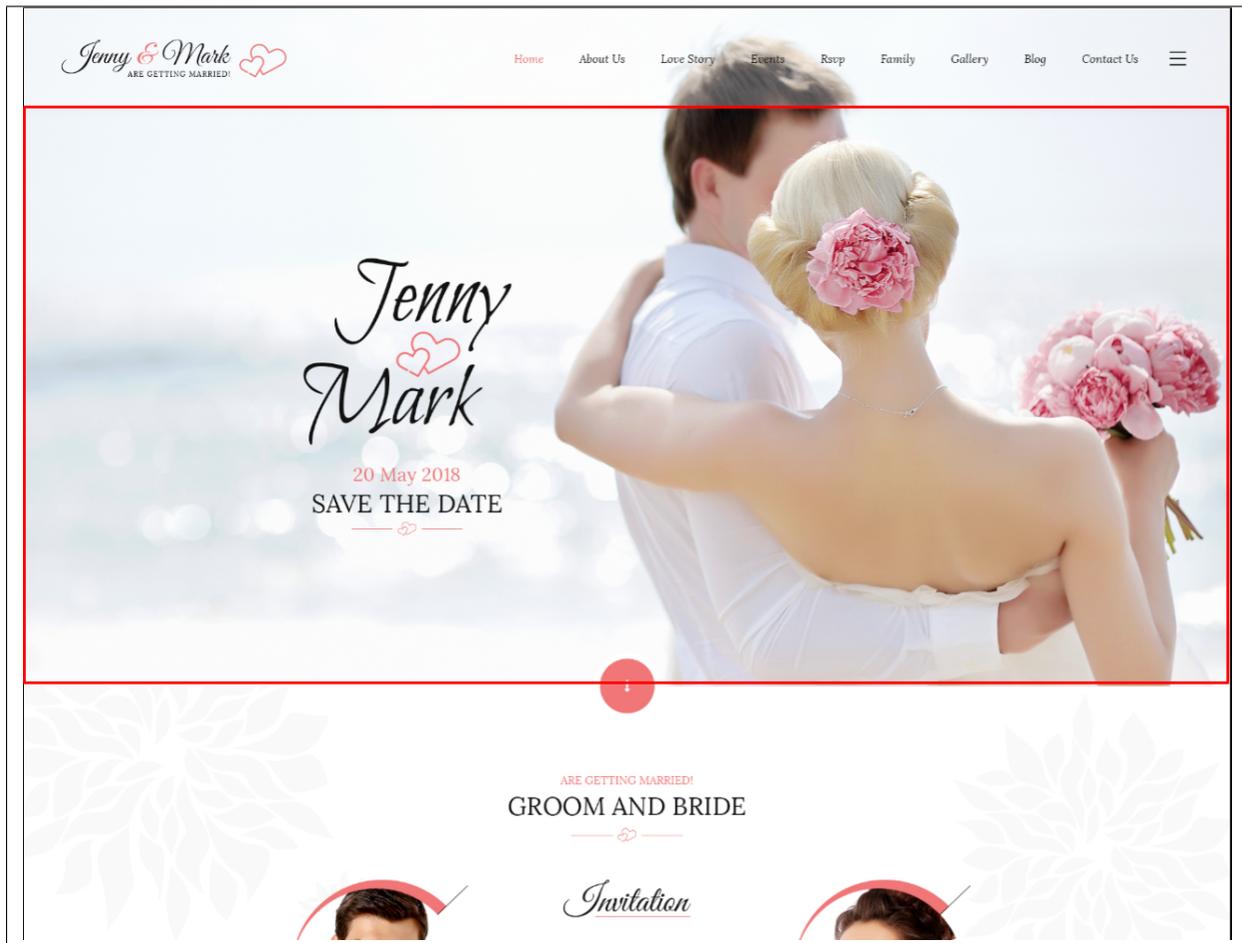

Note: As the VC plugin used with Weddington WP Theme is part of a bundle, that mean that theme author has a license and only he/she can download latest versions of VC and include it in the theme. You as a theme user may use Visual Composer free of charge while you use the theme that came with VC (because you have a license for that theme).

Learn more:

For more information about Visual Composer, please check articles below:

- [How to install Visual Composer](#)
- [Visual Composer demo](#)
- [Visual Composer documentation](#)

Slider Revolution

How to activate the plugin

Slider Revolution is included in Sella WP package – so you don't have to do anything more than click *install* and *activate* as you do with other plugins.

If you are new user of the revolution Slider plugin or you just want to check some of it functionality feel free to check [Slider Revolution Documentation](#) created by the authors of this plugin.

Contact Form 7

Contact forms in Weddington WP are created with the use of *Contact Form 7 Plugin*. Below you will find information how to recreate Contact forms used in our theme by adding the correct markup for the Form section of this plugin.

Send us a Message

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="330" title="Send us a Message"]
```

  [email* your-email placeholder "Email"] </label>

<label> Phone
  [text phone placeholder "Phone"] </label>

<label> Message
  [textarea your-message placeholder "Message"] </label>

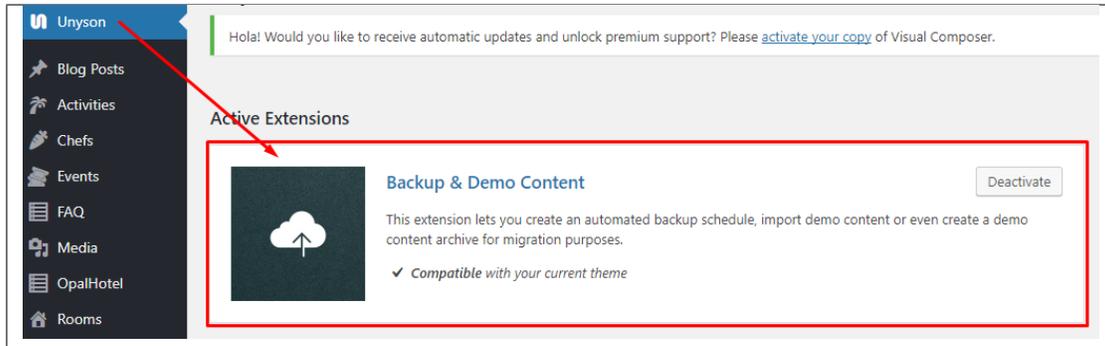

[submit "Send Message"]

</div>
```

If you never before used this plugin I suggest you to check [Getting Started with ContactForm 7](#).

1.5 Demo Content

Note: To be able to use theme content installation and backup functionality make sure to activate *Backup & Demo Content* Unyson's extension.

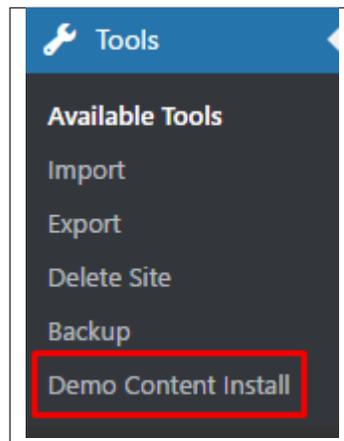

The fastest and easiest way to import our demo content is to use Theme Options *Demo Content Installer*. It will import all pages and posts, sample slider, widgets, theme options, assigned pages, and more.

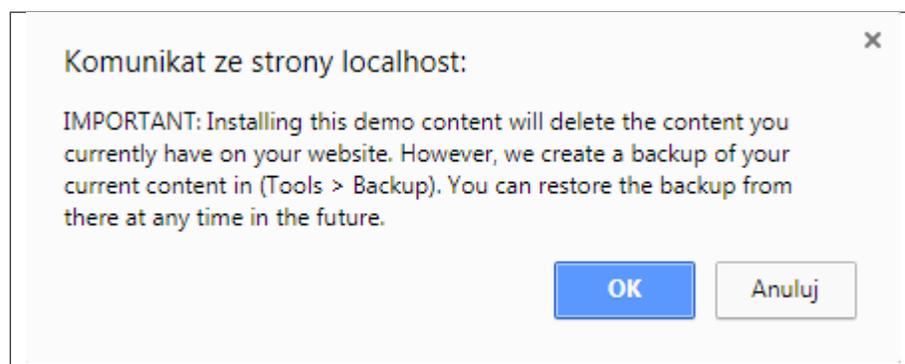

1.5.1 Import Demo Content

To import our demo content, please follow the steps below:

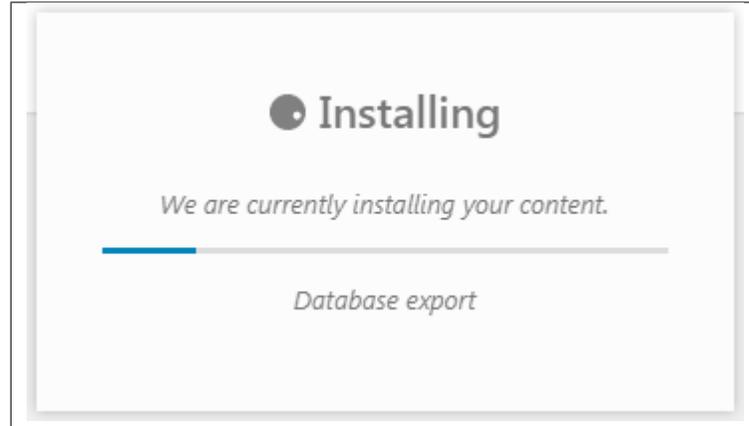

- **Step 1** – Navigate to Tools where after activating the Unyson extension *Demo Content Install* option will be available

- **Step 2** – Choose import option you want to use from available options
- **Step 3** - To be able to continue you need to agree to this term.

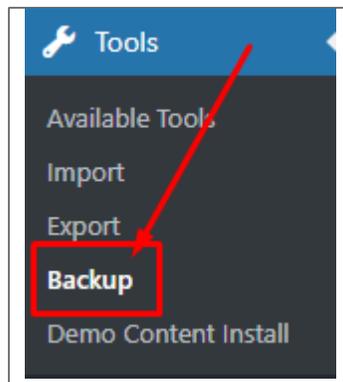

- **Step 4** – Wait until the content will be installed

Importing can take a few minutes. Please be patient and wait for it to complete. Once it is loading, you will see message with indicating progress.

We recommend this approach on a newly installed WordPress. It will *replace* the content you currently have on your website. However, we create a backup of your current content in (Tools > Backup). You can restore the backup from there at any time in the future.

1.6 Support

All of our items comes with free support. Free support is limited to questions regarding the themes features or problems. We provide premium support for code customisation or third-party plugins.

Note: Our support hours: **10:00 AM – 6:00 PM UTC +1 on Monday to Friday.**

1.6.1 Free Support

For issues and concerns, you can reach us through these support methods:

- **E-mail** – support@createit.pl
- **Help Desk** – Click [here](#) to go to our support website. Just click on the *Submit Ticket* button and follow instructions to create a ticket.
- **Forum** – Comment/Post on the product you have issues/queries in [ThemeForest](#) or [CodeCanyon](#) websites.

Before You Post in a Forum

We urge you to follow the steps below, before you post a new topic on the forum, to speed up your request. It's in everyone's interest and will benefit in making the entire forum more efficient:

- **Step 1** – Always check the Documentation and the Knowledgebase Section. Most questions are already answered in those areas.
- **Step 2** – If your question hasn't been brought up on the forum, please post a new topic. Always be as specific as possible. Creating a topic requires entering the live URL to your home page or page that shows the issue in question. It also has bars for WP and FTP login info, which aren't required, however, providing us with your login information can save a lot of time for both of us. Login credentials are securely stored and accessible only by our support staff.
- **Step 3** – We usually answer questions in 24 hours on working days. However, if you don't get any answer within 72 hours bump up your question or send us an e-mail.

For *all support methods*, you will receive confirmations and replies on your queries through e-mail or by tracking your ticket which you will also get through e-mail. To track your ticket, please [click here](#).

Once we reply to your query, *each ticket will be open for 7 days* without a reply from you. On the 6th day without a reply, an e-mail will be sent to notify you of the ticket's inactivity. To make the ticket active again, you simply need to reply or follow the steps in the e-mail. If you won't make the ticket active within 7 days, on the 8th day the ticket will automatically be closed.

1.6.2 Premium Support

We can create your website from scratch, redesign it or just extend the current ones. For more information, please take a look at [our website](#). Typical issues covered by Premium Support:

- Custom CSS
- Support for third party software and plug-ins
- WordPress Installation with Theme configuration
- Server configuration
- Site structure modifications
- Graphic adjustments, etc.
- WordPress general howto's

You can use *Pages* to organize and manage any content on your website. You can create multiple pages on your website for different types of content or setup onepager with scroll-to-section menu.

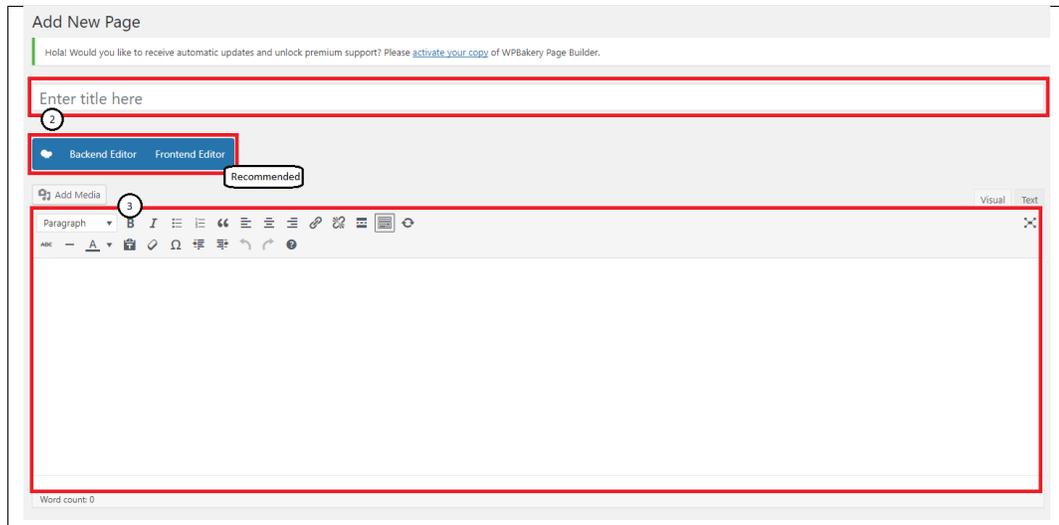

2.1 Create New Page

To create a new *Page* in *Weddington* follow the steps below:

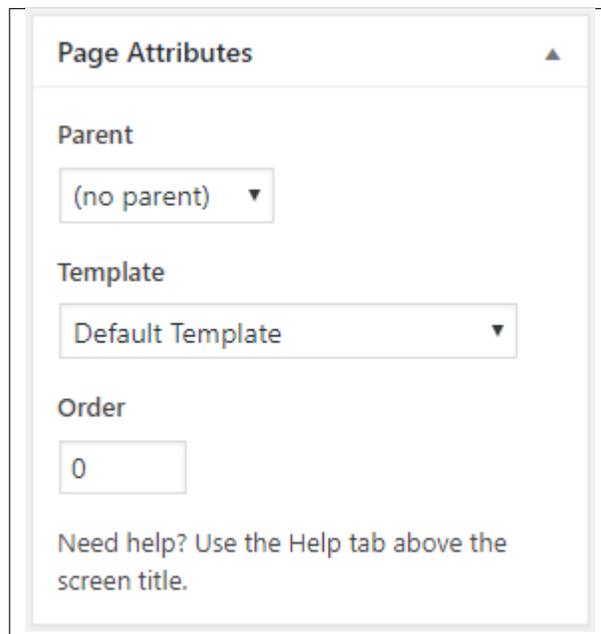

- **Step 1** - In *Dashboard*, navigate to *Pages > Add New*. You will be directed to a page where you can add details on the page.

The image shows a screenshot of a WordPress dashboard. On the left is a dark sidebar menu with various icons and labels. The 'Pages' menu item is highlighted with a red rectangular box. A red arrow points from this box to the 'Add New' link, which is also highlighted with a red rectangular box. The main content area on the right is titled 'Dashboard' and contains several widgets. The top widget has a yellow border and contains text about theme requirements and a link to 'Begin installing plug'. Below it is a 'Welcome to' message with a 'Get Started' button labeled 'Customize Y'. Further down, there are statistics for '7 Posts' and '1 Comment', and a section for 'Activity' with a list of recent publications including dates and times.

- **Step 2** - Add the *Title* of the page.
- **Step 3** - Add content – we recommend you to create page content using *Visual Composer* or by modifying demo content.

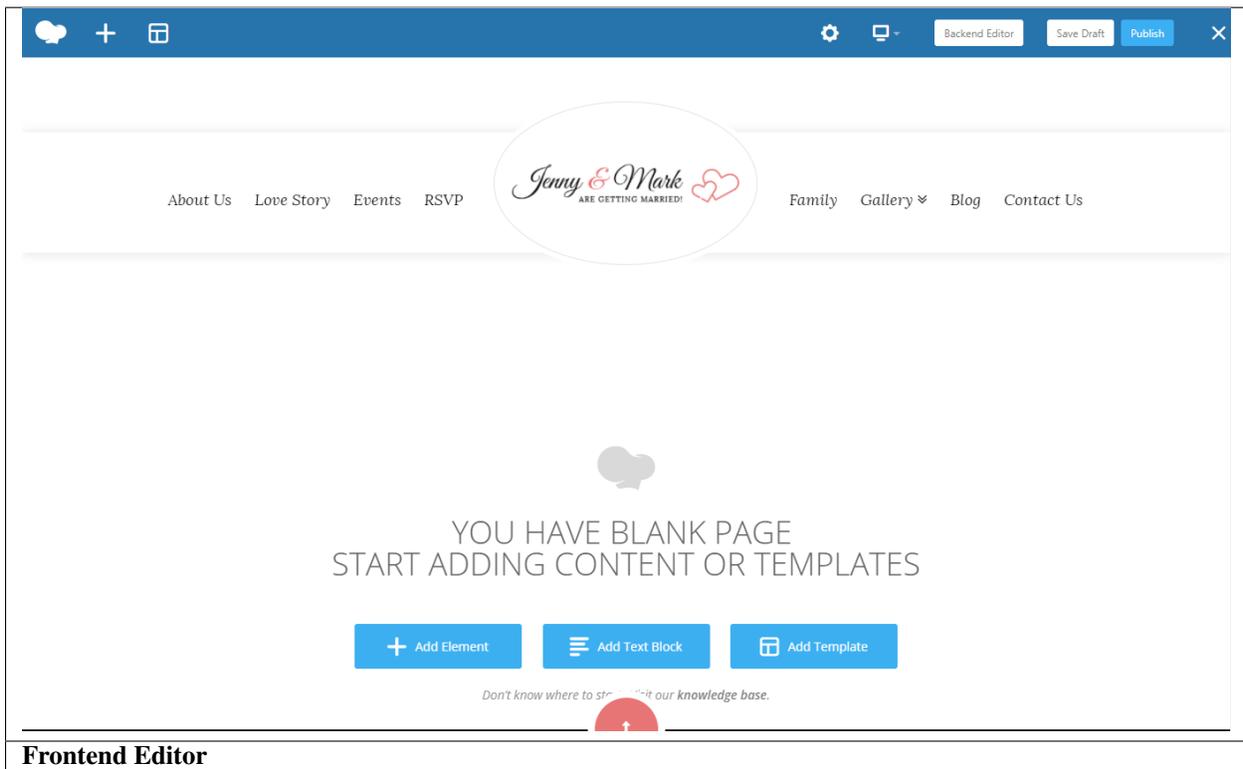

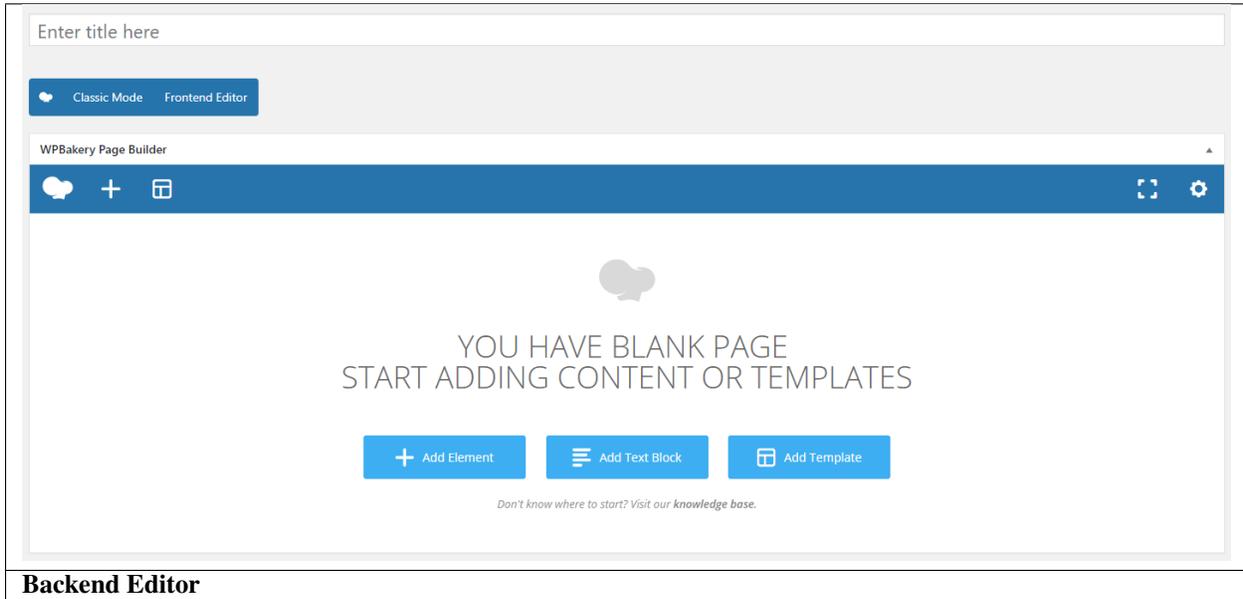

- **Step 4** - Choose page attributes.

- Parent – If you want to create this page as a subpage.
 - Template – You can choose one of defined page templates
 - Order – The order of the page.
- **Step 5** - After adding all the contents of the page, click on the *Publish* button.

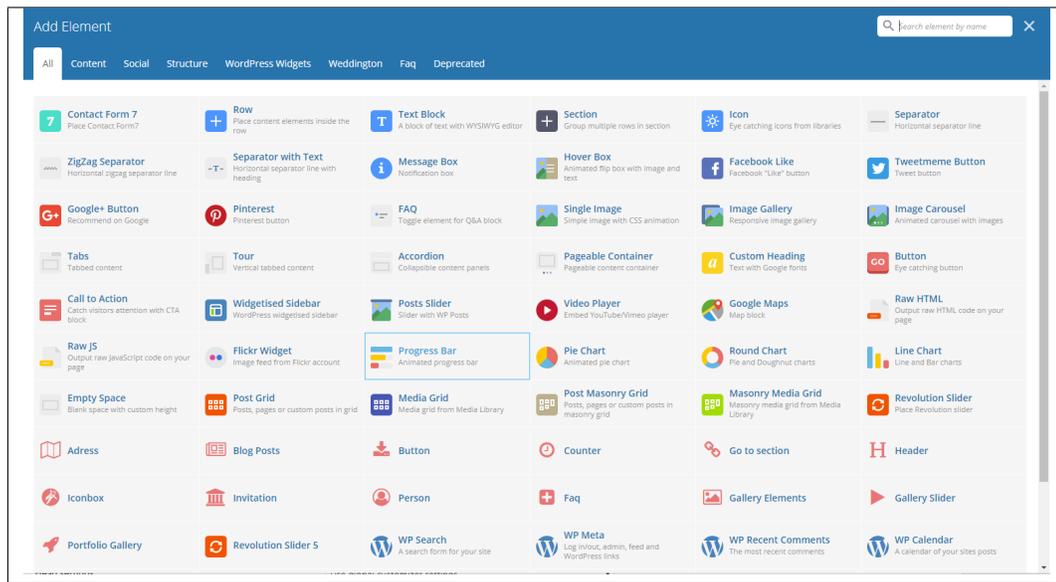

2.1.1 Create Page Using Visual Composer

When using *Visual Composer* to add content, you have 2 Editor options, the **Backend Editor** and **Frontend Editor**.

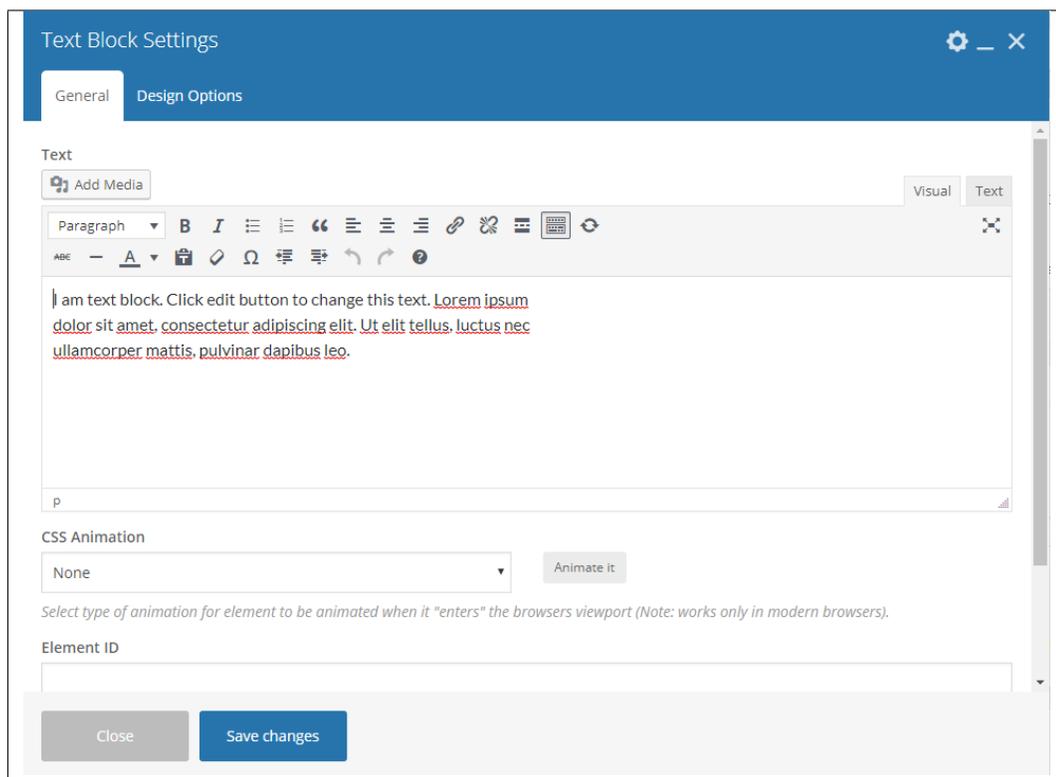

In adding contents to the page, there are many options to choose from. Some of the options are:

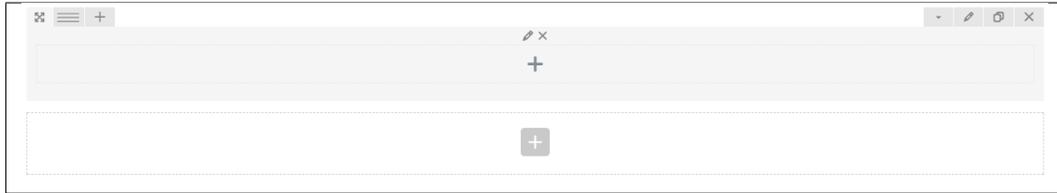

- **Elements** - You will be able to choose elements that are needed and used on the page.

- **Text Block** – This is where you add Text to the page.

- **Row** – An area where you can add elements.

2.2 Homepage Setup

If you have added some pages via *Pages > Add New* you can choose one and set it up as a homepage.

Use Static front page tool in *Settings > Reading* and choose from the list your homepage. Remember to click *Save* changes at the end of editing.

It is up to you to make sure your site is compliant with robots.txt and meta tags.

Save Changes

2.3 Create a Onepager

One page site allows you to put all the content on one page, and the menu items will link to each different section of the page.

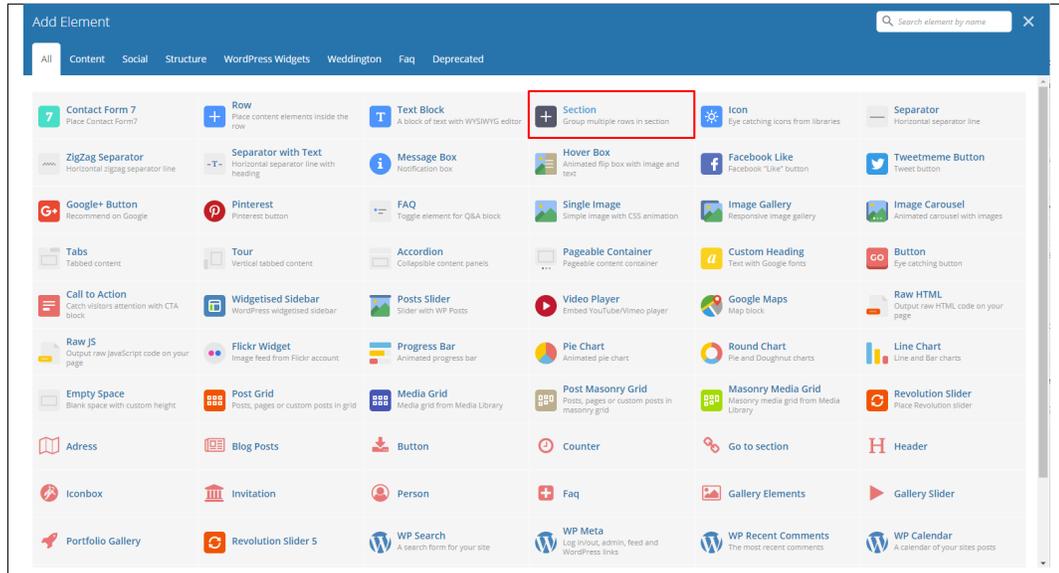

Think of it as a full site but all in one page. Please read below for information on how to set this up.

To create a *Onepager* site using Weddington, follow these steps:

- **Step 1** - Navigate to the Pages section of your Dashboard and click Add New.

- **Step 2** - In the new page, use the Backend or Frontend editor to create a *Section*.

Note: You can also use Rows for this. Each section/row will serve as a section in the page to locate using the menu.

- **Step 3** - Click on the *Edit* option in every section you create and look for **Section ID**. The **Section ID** will serve as the anchor of the menu. Make sure that the ID is unique to the section.

Section Settings

General Design Options

Parallax

None

Add parallax type background for section (Note: If no image is specified, parallax will use background image from Design Options).

CSS Animation

None Animate it

Select type of animation for element to be animated when it "enters" the browsers viewport (Note: works only in modern browsers).

Section ID

Enter section ID (Note: make sure it is unique and valid according to [w3c specification](#)).

Disable section

Yes

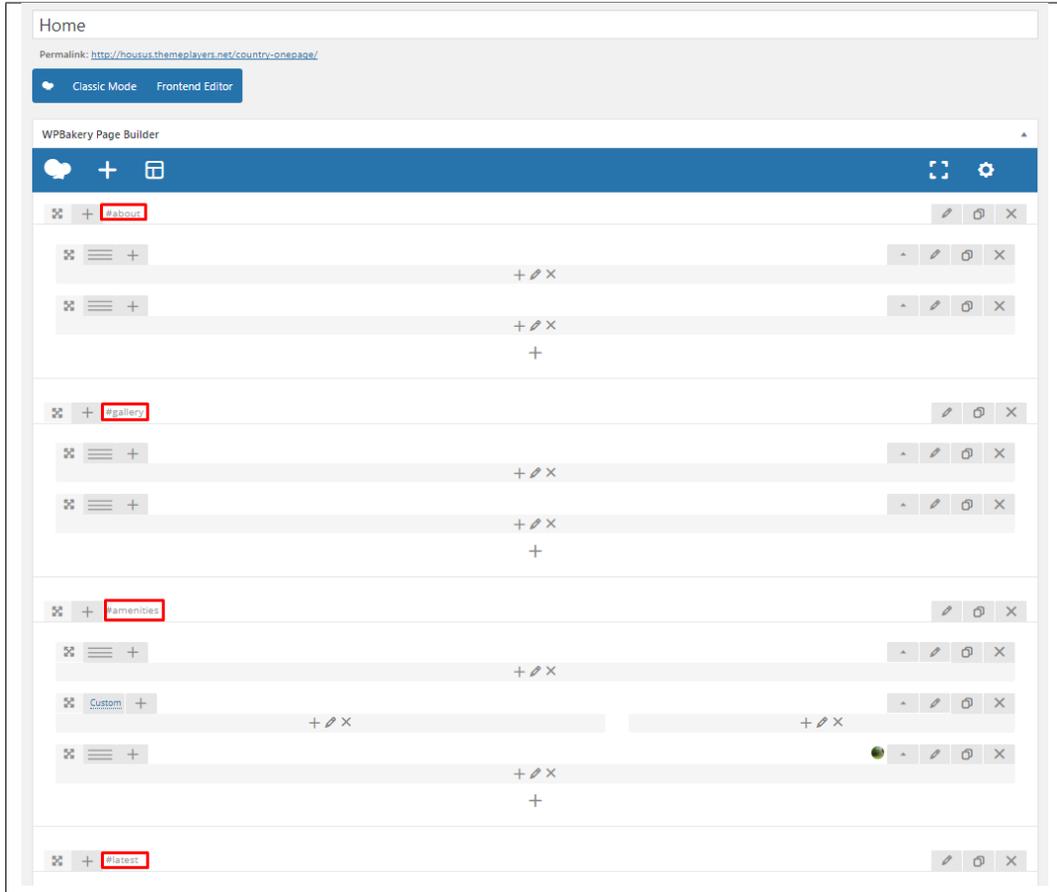

If checked the section won't be visible on the public side of your website. You can switch it back any time.

Extra class name

Style particular content element differently - add a class name and refer to it in custom CSS.

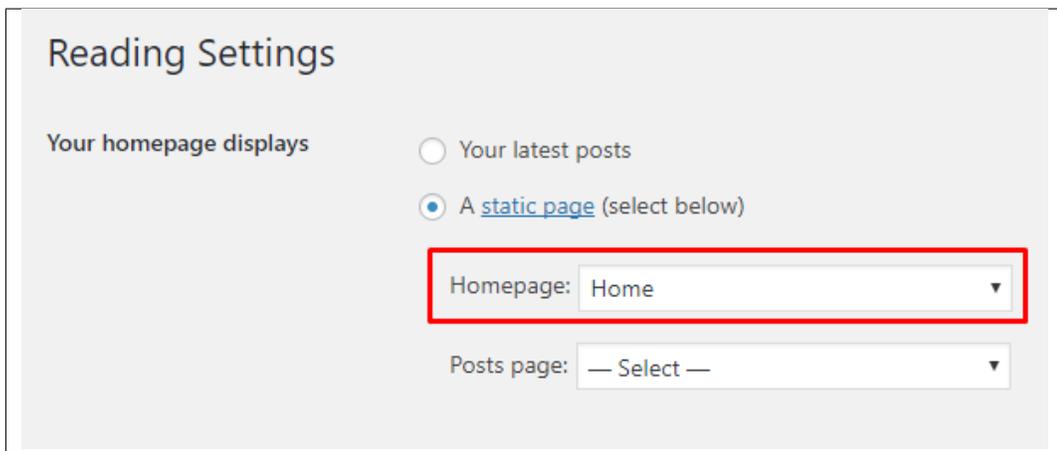

Close Save changes

- **Step 4** - Add the contents in the Section. You can add rows with text and elements inside. Click on Publish button to save.

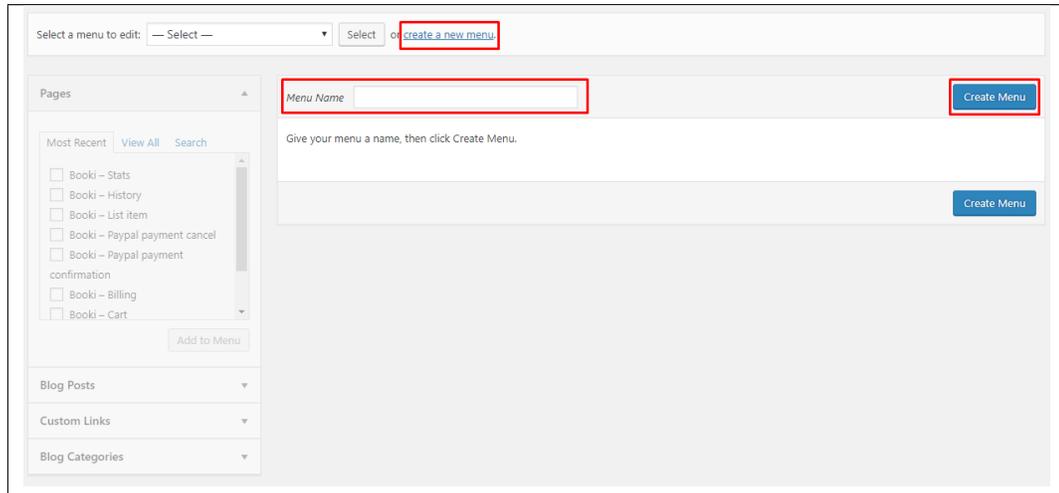

You can see in the sample above that each section have different Section IDs.

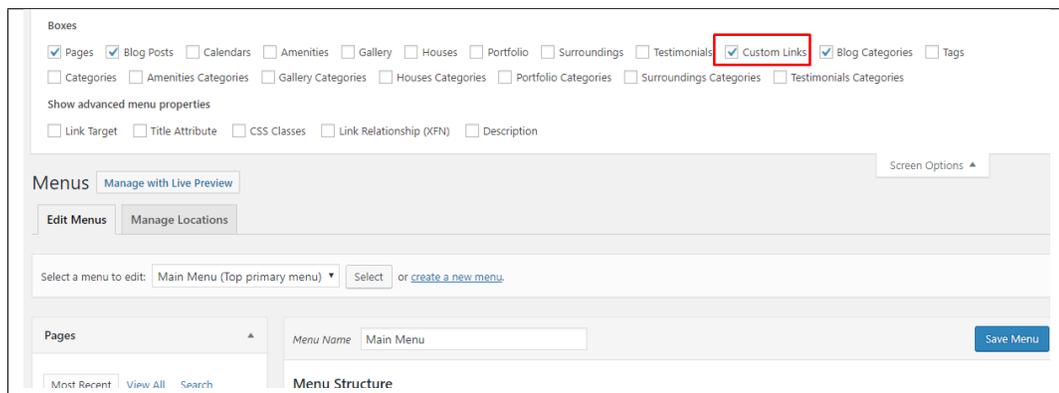

- **Step 5** - Set this page as the front page by navigating to *Settings > Reading*. Click on *A static page* option, then select the page for the onepager then click on the *Save Changes* button.

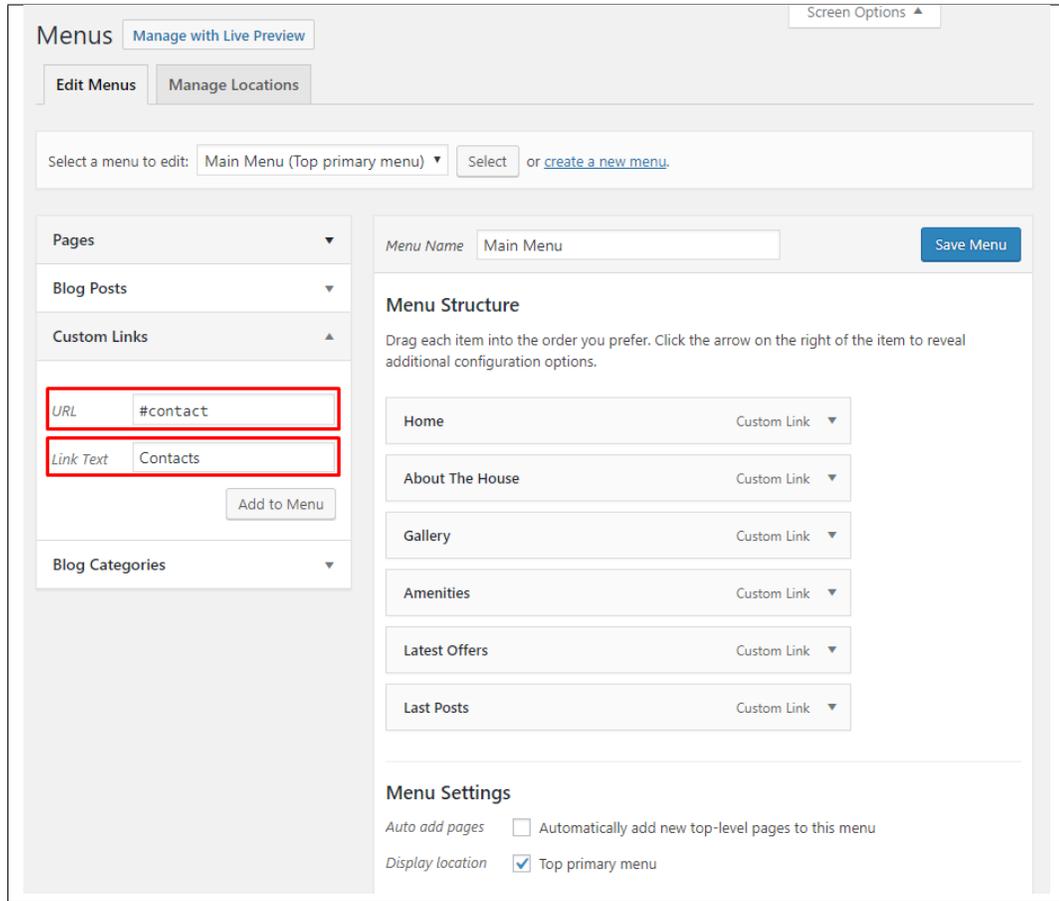

- **Step 6** - To make the *Menu* for the onepager, navigate the dashboard to *Appearance > Menus*. Look for *create a new menu*, add the *Menu Name* then click on the *Create Menu* button.

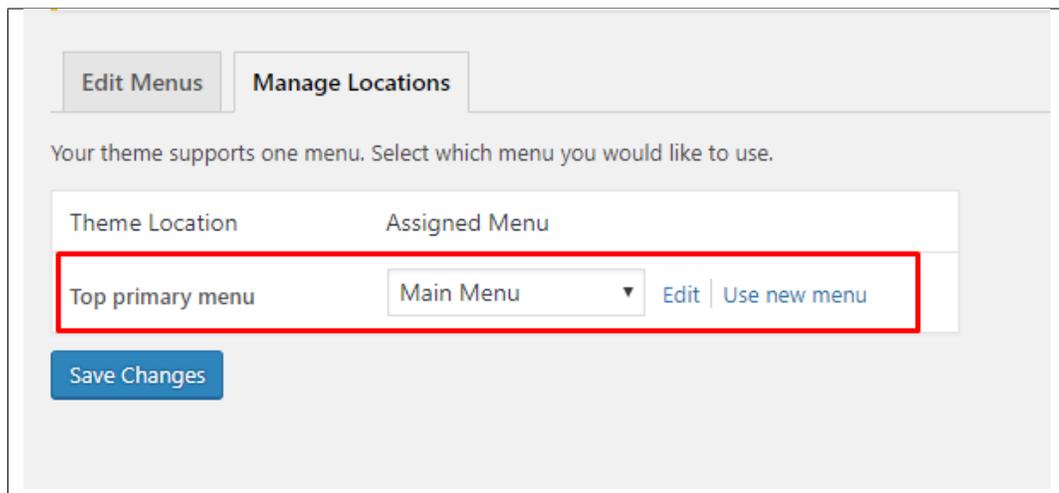

- **Step 7** - You will see options on what to put inside your new menu. Look for *Custom Links* in the options. If you don't see that option, at the upper-right side of the page you will see *Screen Options* option, click on that and you will see options with check boxes. Check the box beside *Custom Links*.

- **Step 8** - Using the *Custom Links* option, write the section's Section ID inside the *URL* textbox and the name of the link inside the *Link Text* textbox. Then click on the *Add to Menu* button. After adding all the navigation menu, Click on *Save Menu* to save.

- **Step 9** - Click on the *Manage Location* tab, change the *Top primary menu* to the menu that you made for the onepager. Click on the *Save Menu* button to save.

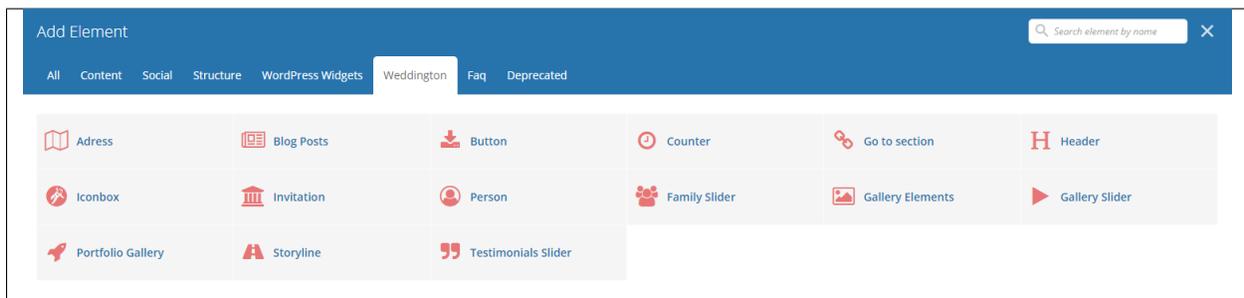

You can see the changes on the Front Page of the site.

Weddington Elements

3.1 Weddington Custom Shortcodes

With Weddington, comes custom shortcodes for (Visual Composer) VC that are used to show content created in Weddington.

Below you will find short information about this Visual Composer elements:

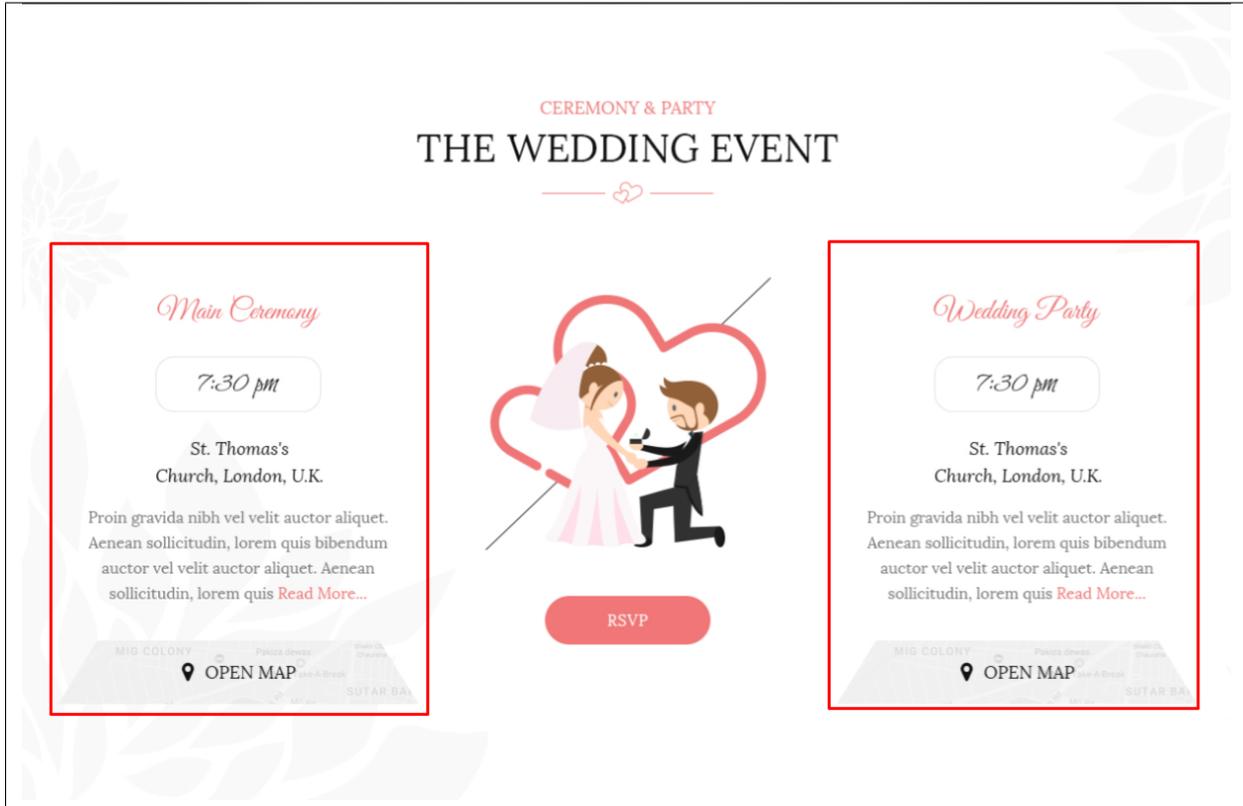

The screenshot shows a 'Address Settings' dialog box with a blue header. The 'General' tab is active, showing six text input fields for configuration. The fields are: 'Enter title for address', 'Enter starting time', 'Enter location to display as a text', 'Enter text to display after location', 'Enter link target (link will be displayed after text)', and 'Enter link text (link will be displayed after text)'. At the bottom, there are 'Close' and 'Save changes' buttons.

-General Tab-

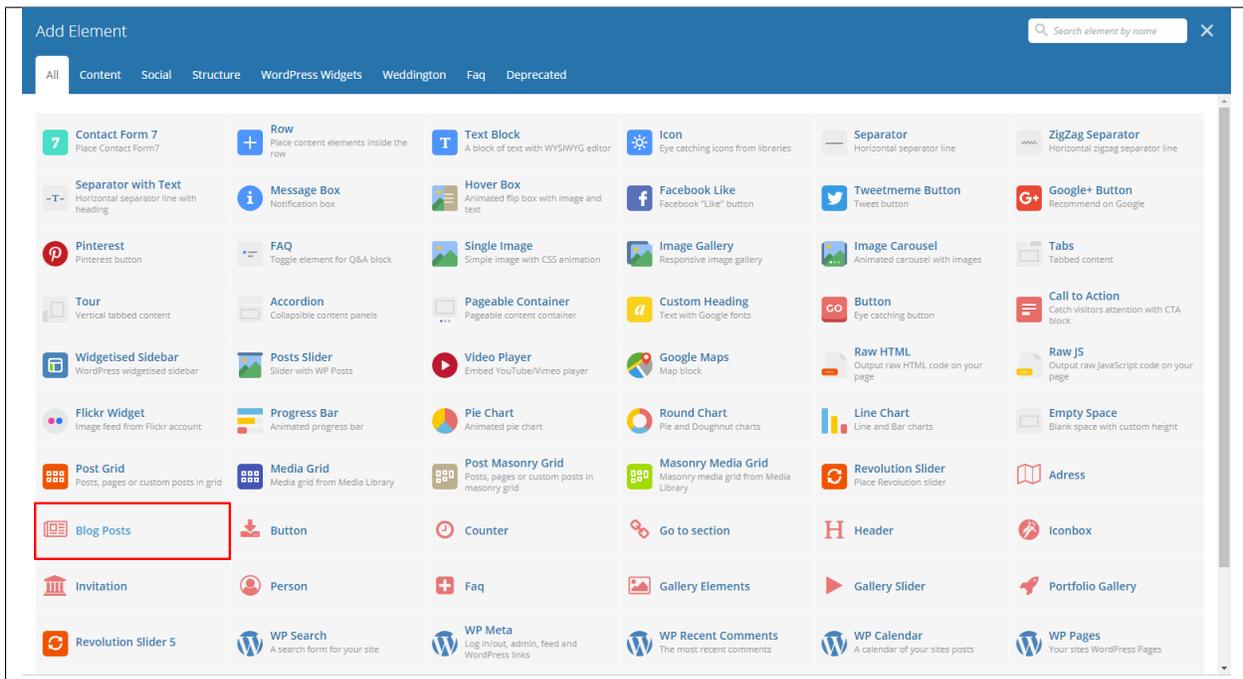

- **Enter title for address** - Title for the address/event.
- **Enter starting time** - Starting time for the event.

Love Never Fails

 March 1, 2018  No comments

Love is patient, love is kind It does not envy, it does not boast It is not proud, it does not rude It is not self-seeking, it is not easily angered, it keeps no record of wrongs. Love does not delight in evil but rejoices with the truth. It always protects, always trusts, always hopes, always perseveres. Love never fails. [...]

- **Button icon** - Add the icon you would like to use.
- **Select target for the link** - Where the link is going to open.

ARE GETTING MARRIED!

GROOM AND BRIDE

The invitation card features a light grey floral background. At the top, a red-bordered box contains the text 'ARE GETTING MARRIED!' and 'GROOM AND BRIDE' with a small heart icon. Below this, two circular portraits of the groom and bride are shown. The groom's name 'Mark Wills' and the bride's name 'Jonny Bellucci' are written in a red script font. The central text reads 'Invitation', 'We inviting you and your family on', 'SATURDAY 20 MAY 2018', and 'At St. Thomas's Church, London, U.K.'. A red 'RSVP' button is centered below the text. At the bottom, a countdown timer shows '100 Days', '14 Hours', '27 Minutes', and '32 Seconds' until the wedding. Social media icons for Facebook, Twitter, and Instagram are provided for both the groom and bride.

-General Tab-

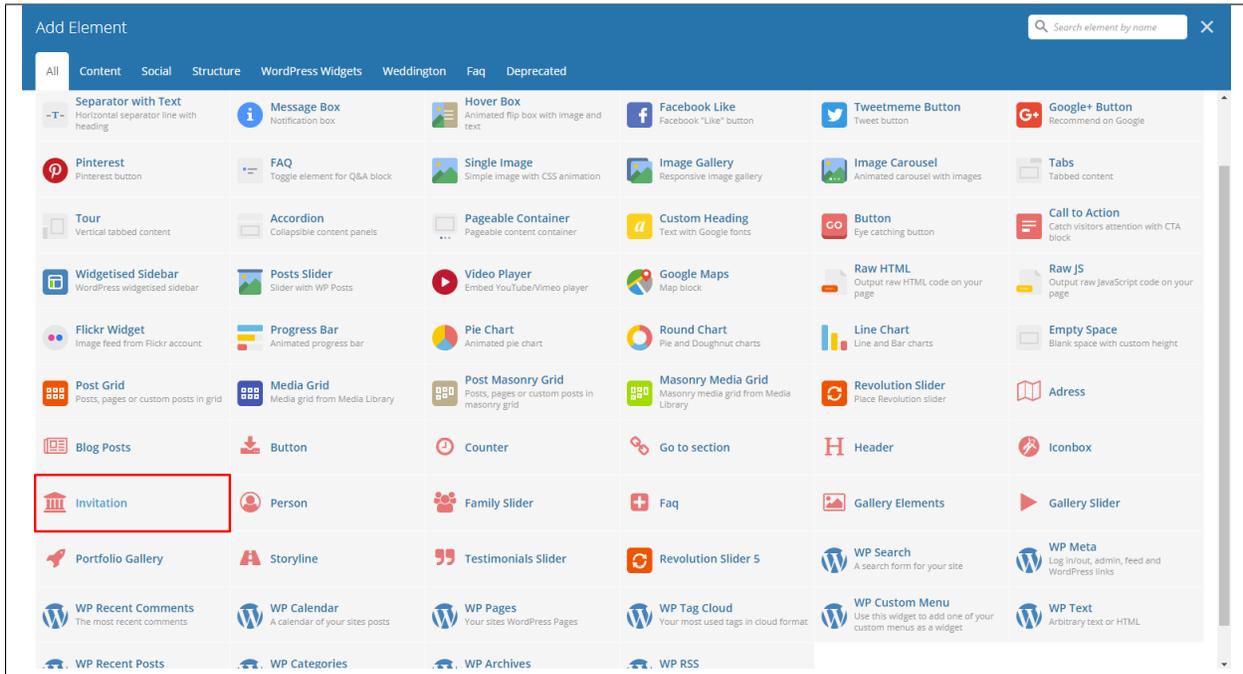

Gallery Items - Click toggle row to show Gallery items options. To add more Gallery items, click on the plus(+) sign.

- **Choose icon** - Add the icon you would like to use.
- **Type item title** - Text that will show after the Icon.
- **Text for first link** - Text for the first link.

- **Target link for first link** - URL link for the first link.
- **Text for second link** - Text for the second link.
- **Target link for second link** - URL link for the second link.

3.1.8 Invitation

This element will let you add details for the event that would look like an invitation.

The screenshot shows a dialog box titled "Invitation Settings" with a blue header bar. In the top right corner of the header are icons for settings (a gear), a minus sign, and a close button (an 'X'). Below the header is a "General" tab. The main content area contains several form fields and buttons:

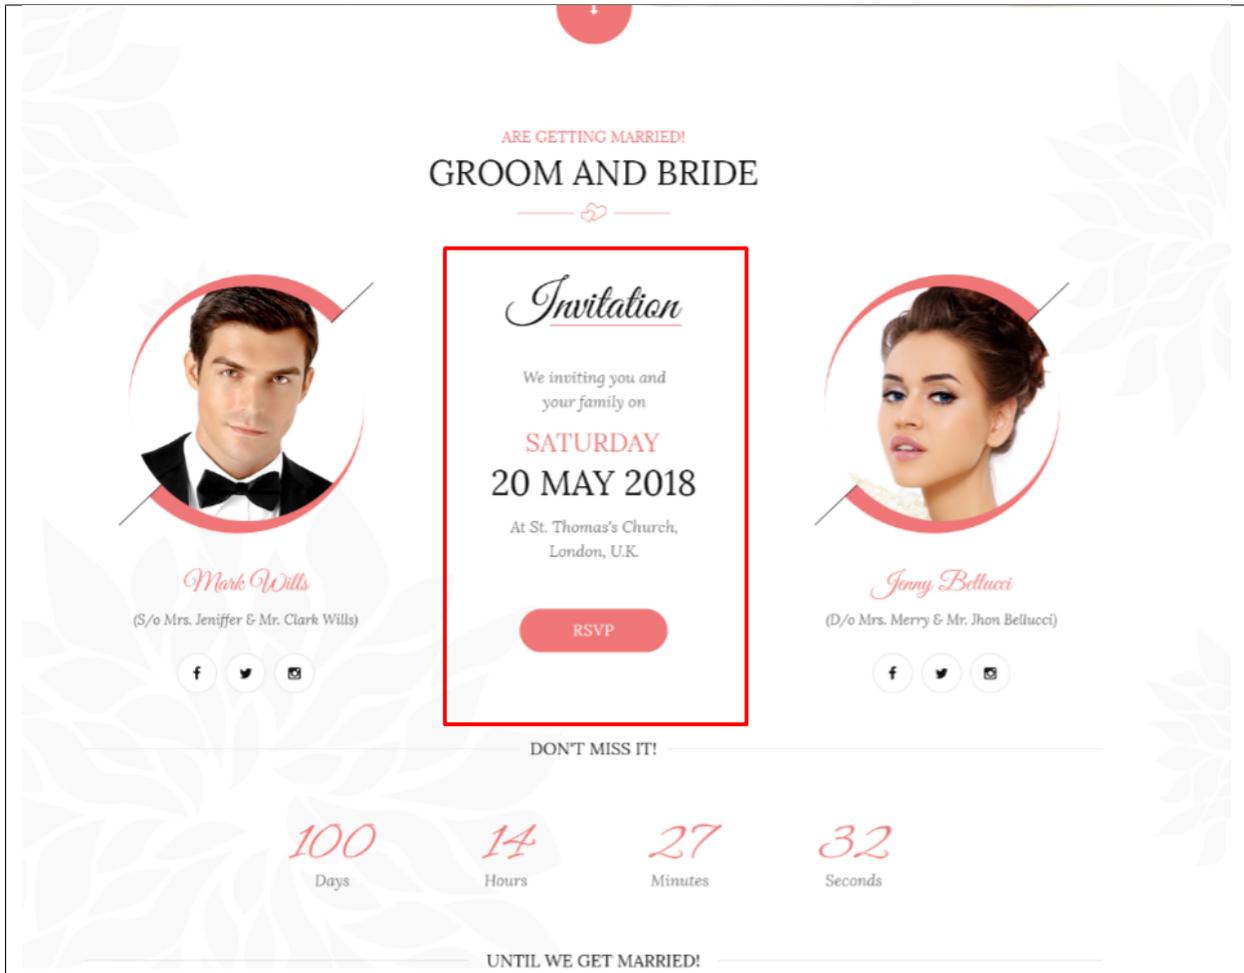

- Enter invitation title:** A text input field.
- Select Title color:** A color selection button labeled "Select Color".
- Type invitation text:** A text input field.
- Select color for invitation text:** A color selection button labeled "Select Color".
- Type name of the day:** A text input field.
- Select color for the day:** A color selection button labeled "Select Color".
- Type date:** A text input field.

At the bottom of the dialog are two buttons: a grey "Close" button and a blue "Save changes" button.

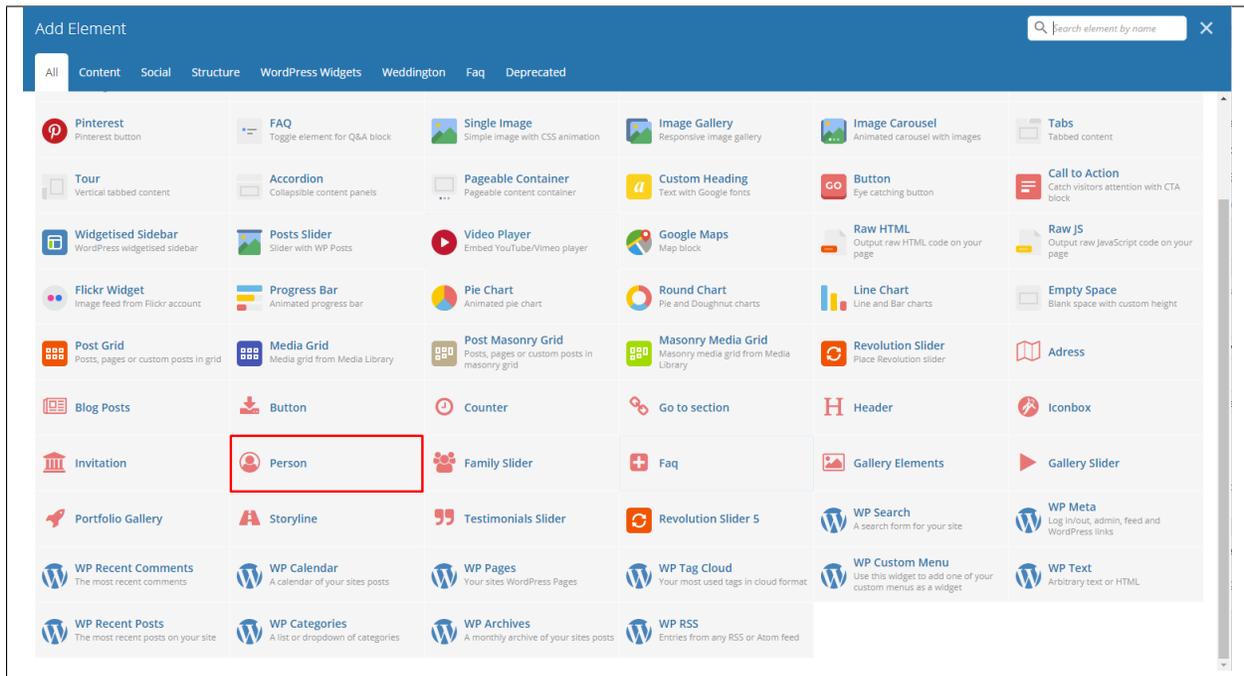

-General Tabs-

- **Enter invitation title** - Title for the invitation.
- **Select Title color** - Font color for the invitation title.
- **Type invitation text** - Text after the title.
- **Select color for invitation text** - Font color for the invitation text.
- **Type name of the day** - The day of the event. *Example: Saturday*

- **Select color for the day** - Font color for the day.
- **Type date** - Date of the event.
- **Select date color** - Font color for the date.
- **Enter place address** - The location of the event.
- **Select color for address** - Font color for the address.
- **Display button in header** - Option to add a button in the invitation.

3.1.9 Person

This element lets you add a picture with details about what that person's title in the event.

The screenshot shows the 'Person Settings' form with a blue header and a search bar. Below the header are tabs for 'General' and 'Socials'. The 'General' tab is selected. The form contains three main sections: 'Full name' with a text input field, 'Title' with a text input field, and 'Select picture' with a square button containing a green plus sign. At the bottom of the form are two buttons: 'Close' and 'Save changes'.

-General Tab-

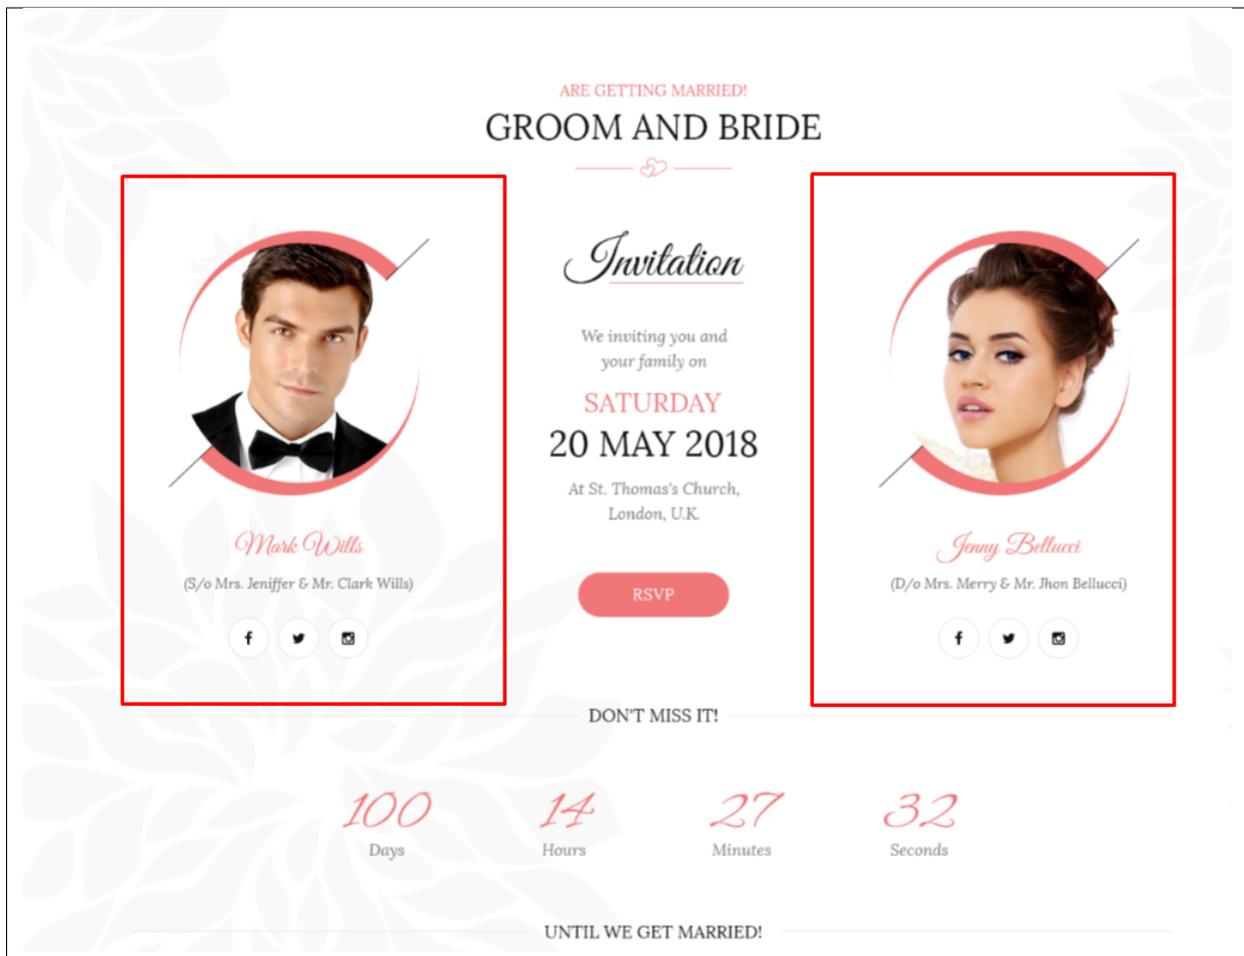

- **Full Name** - Option to set the promo boxes to move by itself.
- **Title** - Option to use a dotted slider as navigation.
- **Select picture** - Option to use an arrow slider as navigation.

-Socials-

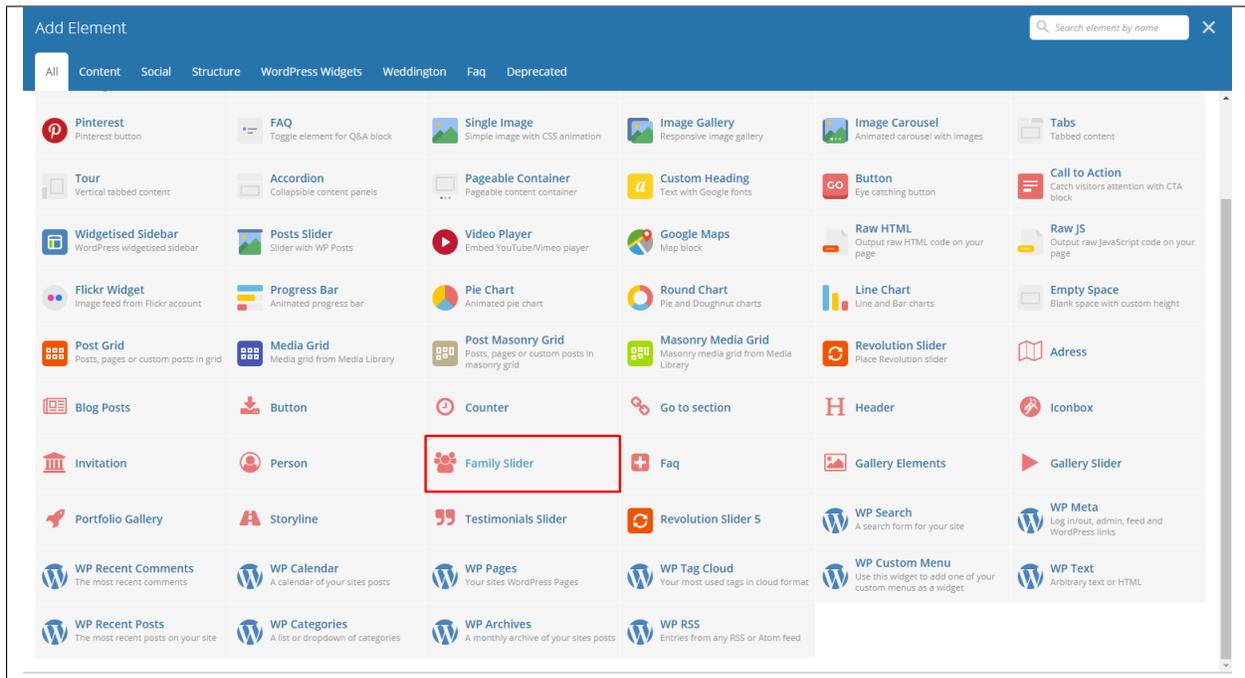

- **Social Icons** - Click toggle row to show Social Icons options. To add more Social Icons, click on the plus(+) sign.

Note: Use text-center class to center this content so it will be centered on mobile correctly.

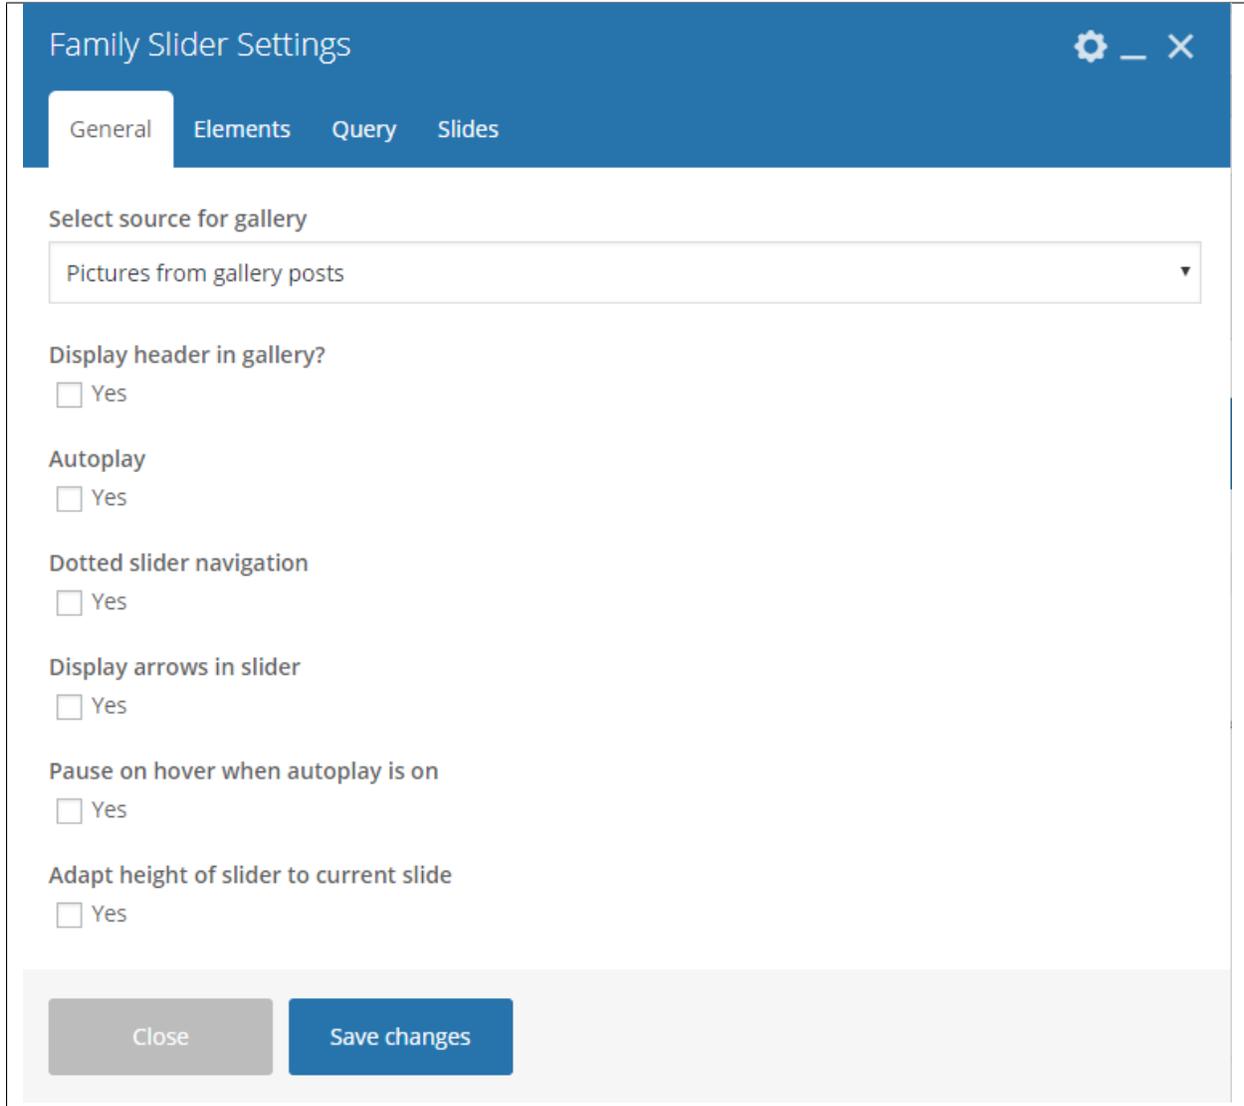

- **Select Icon** - Choose the icon you want to use.
- **Type Link** - URL link for the page you want to direct.

3.1.10 Family Slider

This element will let you add custom family member or items from Family.

The screenshot shows a settings dialog titled "Family Slider Settings" with a blue header bar. The "General" tab is selected, with other tabs being "Elements", "Query", and "Slides". The settings are as follows:

- Select source for gallery:** A dropdown menu set to "Pictures from gallery posts".
- Display header in gallery?:** Yes
- Autoplay:** Yes
- Dotted slider navigation:** Yes
- Display arrows in slider:** Yes
- Pause on hover when autoplay is on:** Yes
- Adapt height of slider to current slide:** Yes

At the bottom, there are two buttons: "Close" (grey) and "Save changes" (blue).

-General Tab-

- **Select source for gallery** - Select where to get the source of the gallery.
- **Display header in gallery?** - Option to display a header before the family slider.
- **Autoplay** - Option to make the slider move by itself.
- **Dotted slider navigation** - Option to show dotted slider navigation.
- **Display arrows in slider** - Option to show arrow slider navigation.
- **Pause on hover when autoplay is on** - Option to pause autoplay when the mouse pointer is hovering.
- **Adapt height of slider to current slide** - Option to adapt the height of the slider.

-Elements Tab-

Used when **Select source for gallery** is set to *Pictures from custom content*.

Note: Click toggle row to show *Slider Categories* and *Slider Items* options. To add more *Slider Categories* and *Slider Items*, click on the plus(+) sign.

- **Slider categories** - Create a Family category to group all family members.
 - **Type category title** - Title of the family category.
 - **Choose picture for category** - Add an image to associate with the family category.
- **Slider Items** - Create a Family member with it's details.
 - **Type item title** - Title/Name of the member.
 - **Type item description** - The description of the member.
 - **Type item categories (use | as a separator)** - Category to group the member.
 - **Choose picture** - Image to associate with the member.
 - **1. Choose icon** - Icon to add below the details of the member.
 - **1. Type link for icon** - URL link for the icon.
 - **2. Choose icon** - Icon to add below the details of the member.
 - **2. Type link for icon** -URL link for the icon.
 - **3. Choose icon** - Icon to add below the details of the member.
 - **3. Type link for icon** -URL link for the icon.

-Query Tab-

Note: To control the output of the Family Slider, you can use the information on this tab.

- **Limit** - Set how many Family items will show. Set to -1 to show all.
- **Skip X elements** - Skip a number of Family items from the results.
- **Order** - How the Family items order looks.
- **Order by** - How the Family items are ordered.
- **Specify Family** - Only selected Family items are shown.
- **Exclude Family** - None of the selected Family items will be displayed.
- **Specify Family Categories** - Only show Family items under the categories.
- **Exclude Family Categories** - None of the Family items under the categories are shown.
- **Specify post tags** - Only show Family items with selected tags.
- **Keyword search** - Show Family items with certain keyword.

-Slides Tab-

- **Slides to show** - Number of slides to show.
- **Slides to show on tablets** - Number of slides to show on a tablet platform.
- **Slides to show on phablets** - Number of slides to show on a phablet platform.
- **Slides to show on phones** - Number of slides to show on a phone platform.
- **Set initial slide** - Set the initial slider that moves.

Email	
Phone	

SEND A MESSAGE

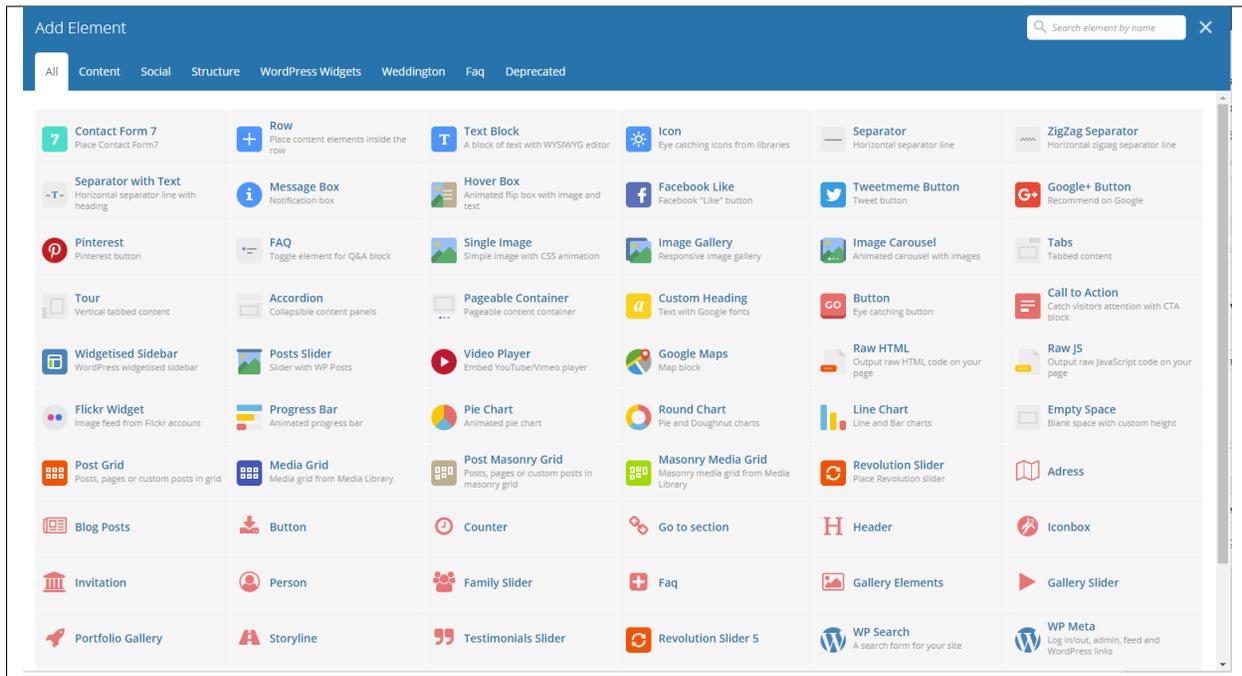

3.2.2 Revolution Slider & Revolution Slider 5

This plugin lets you add a slider that you made under the *Slider Revolution*. The slider revolution lets you make your own customized slider. To know how to use the slider revolution, go to the *Create Revolution Slider*.

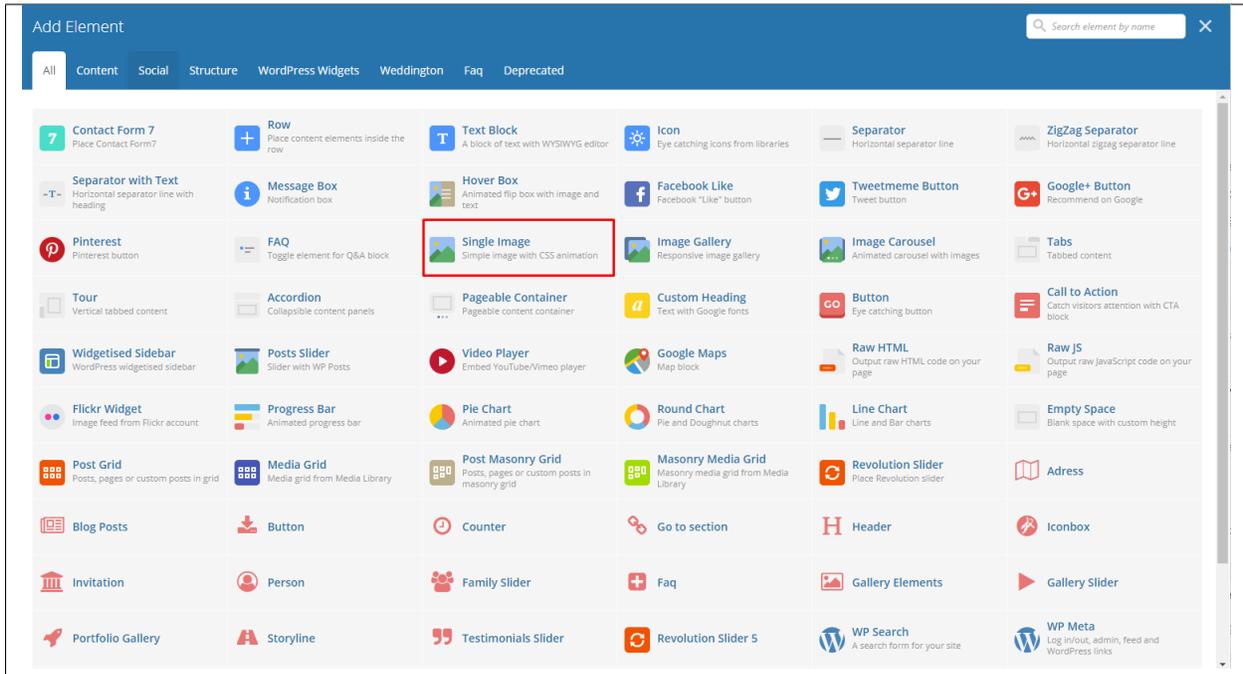

3.2.3 Visual Composer

This element lets you customize your page using a simple drag and drop of elements to build your page content. You can easily setup the backgrounds, colors, and styles for a whole section as well as lots of various smaller components which you can freely put wherever you want.

Some of these elements are:

Single Image

This element will let you add a single image in your page.

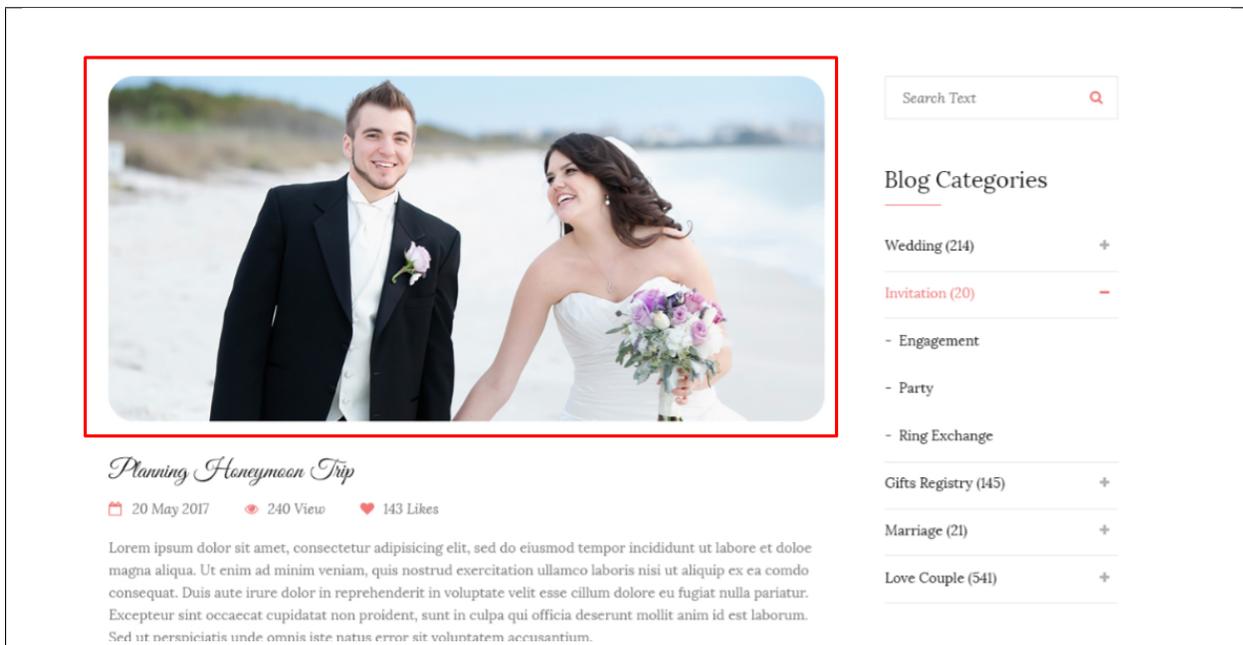

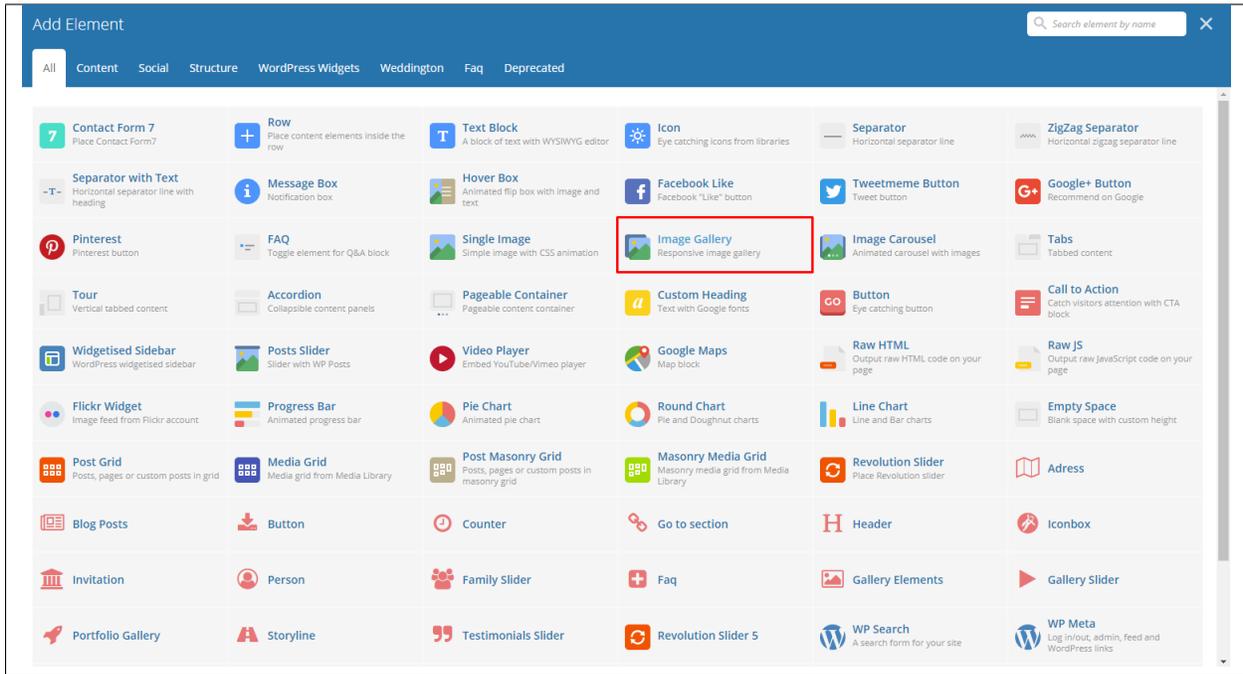

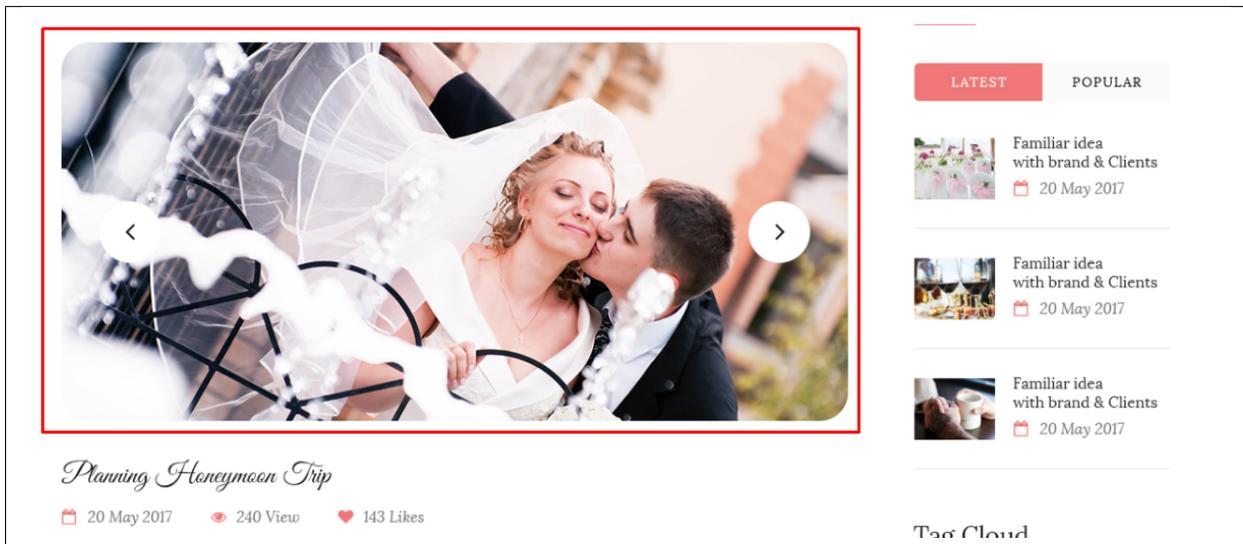

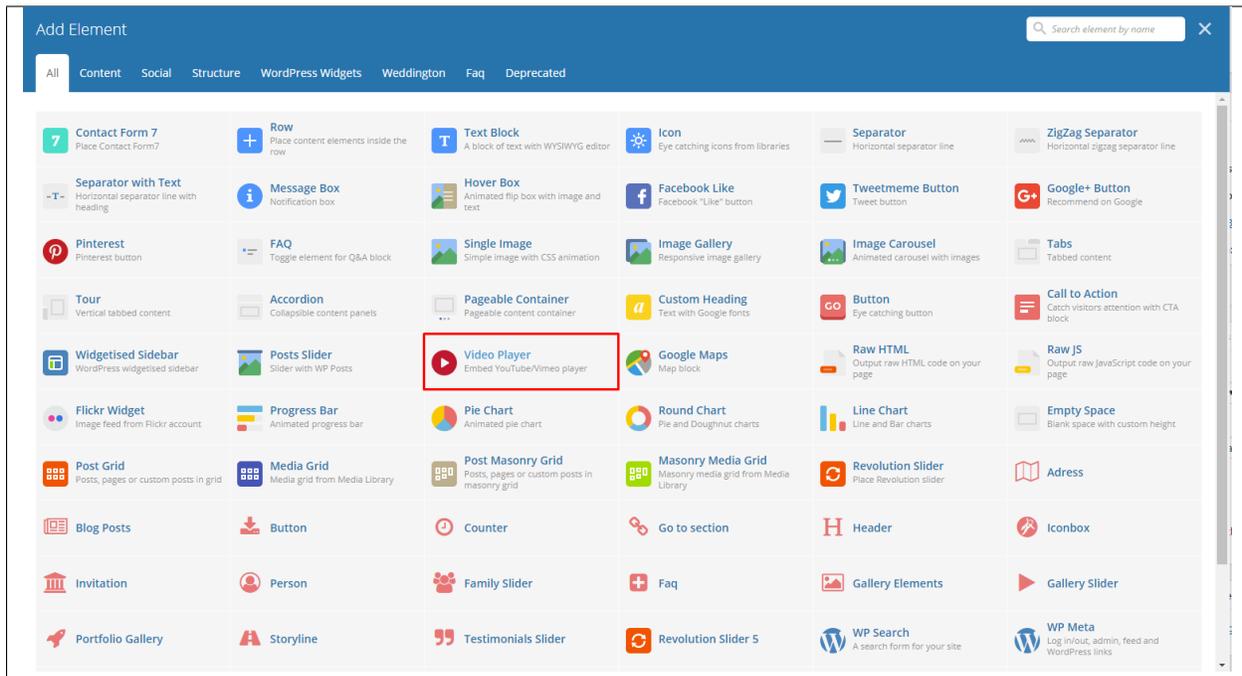

Image Gallery

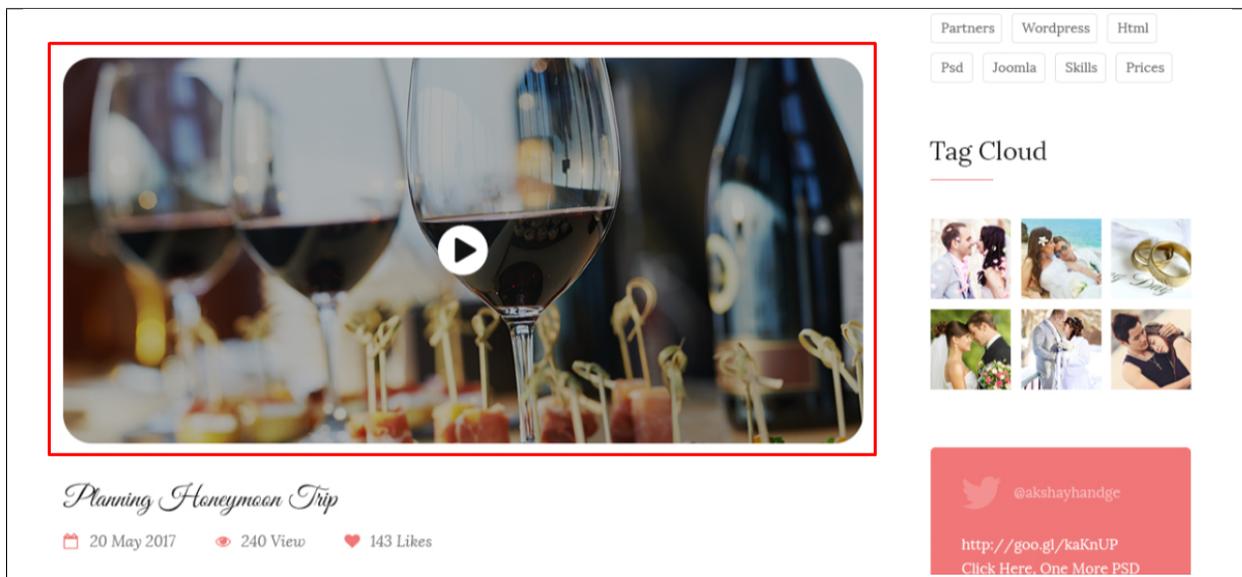

This element will let you add multiple images in your page.

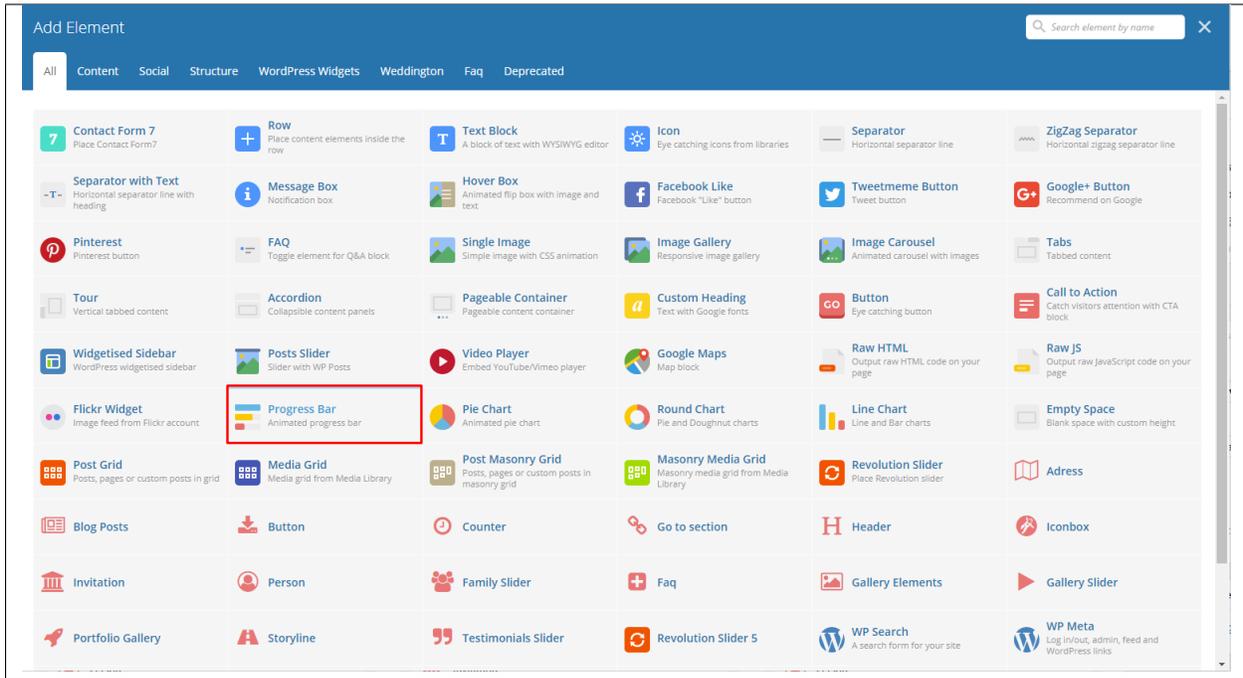

Video Player

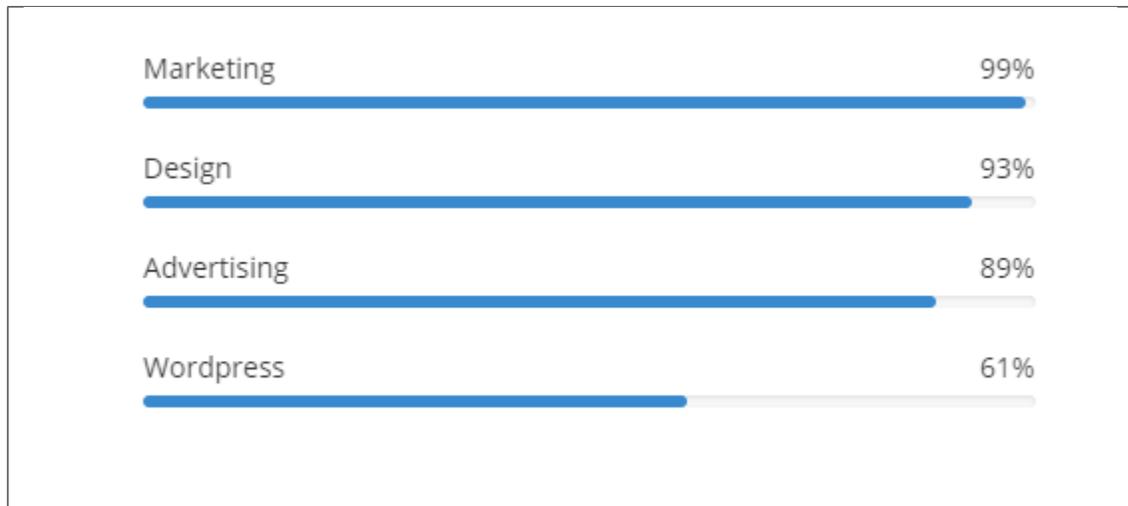

This element will let you add a video or MP3 file inside your page by adding the link for the video/MP3.

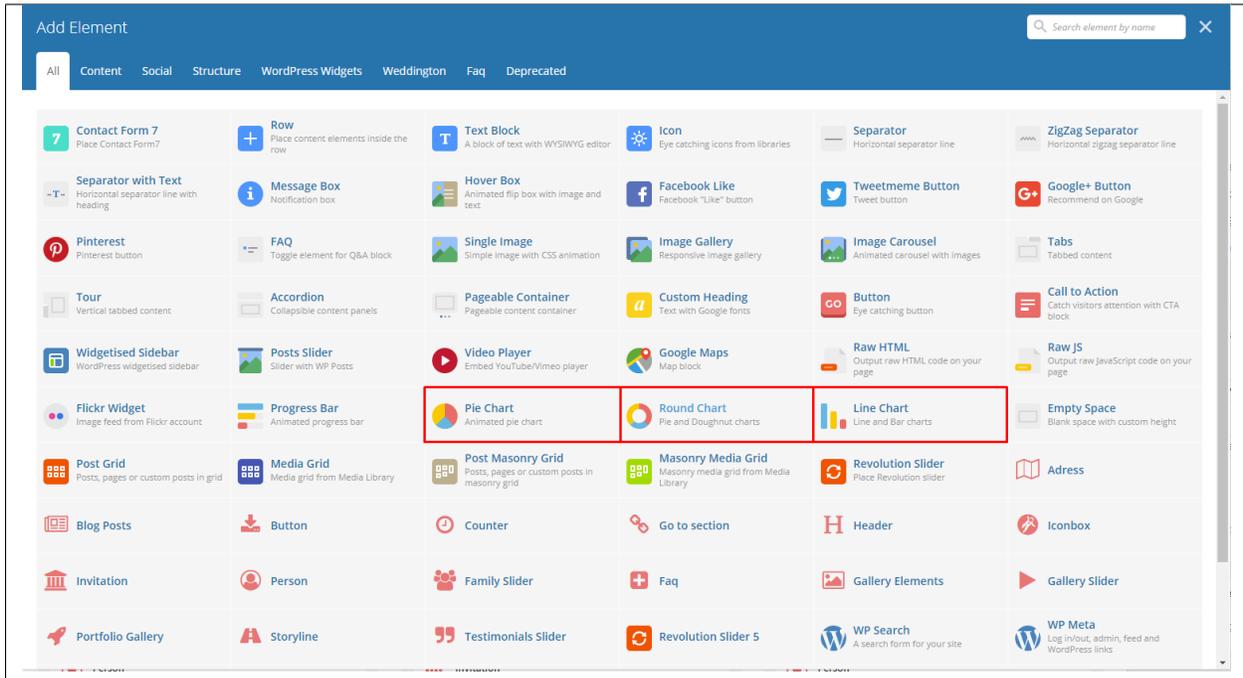

Progress Bar

This element will add an animated progress bar in your page.

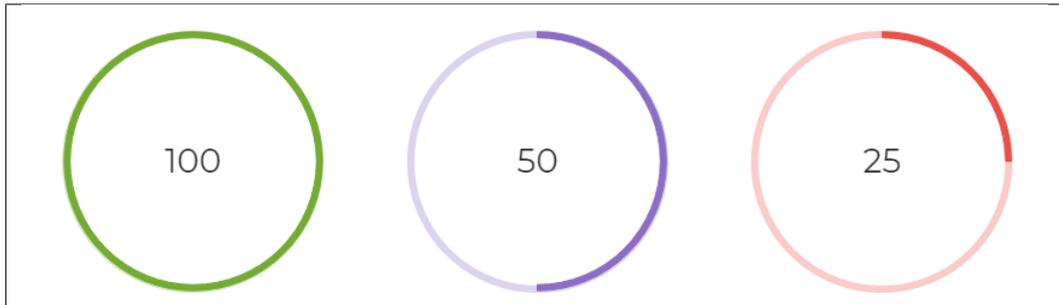

Chart

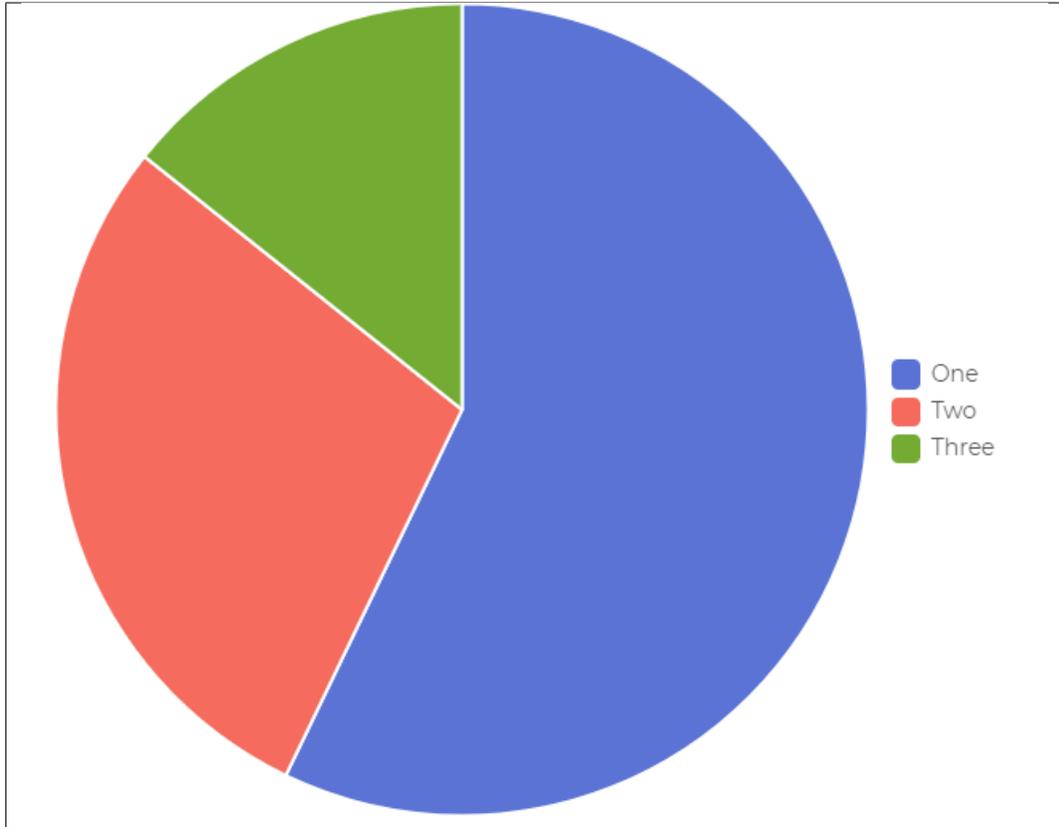

This element lets you add a graph. These are the types of graph that you can add:

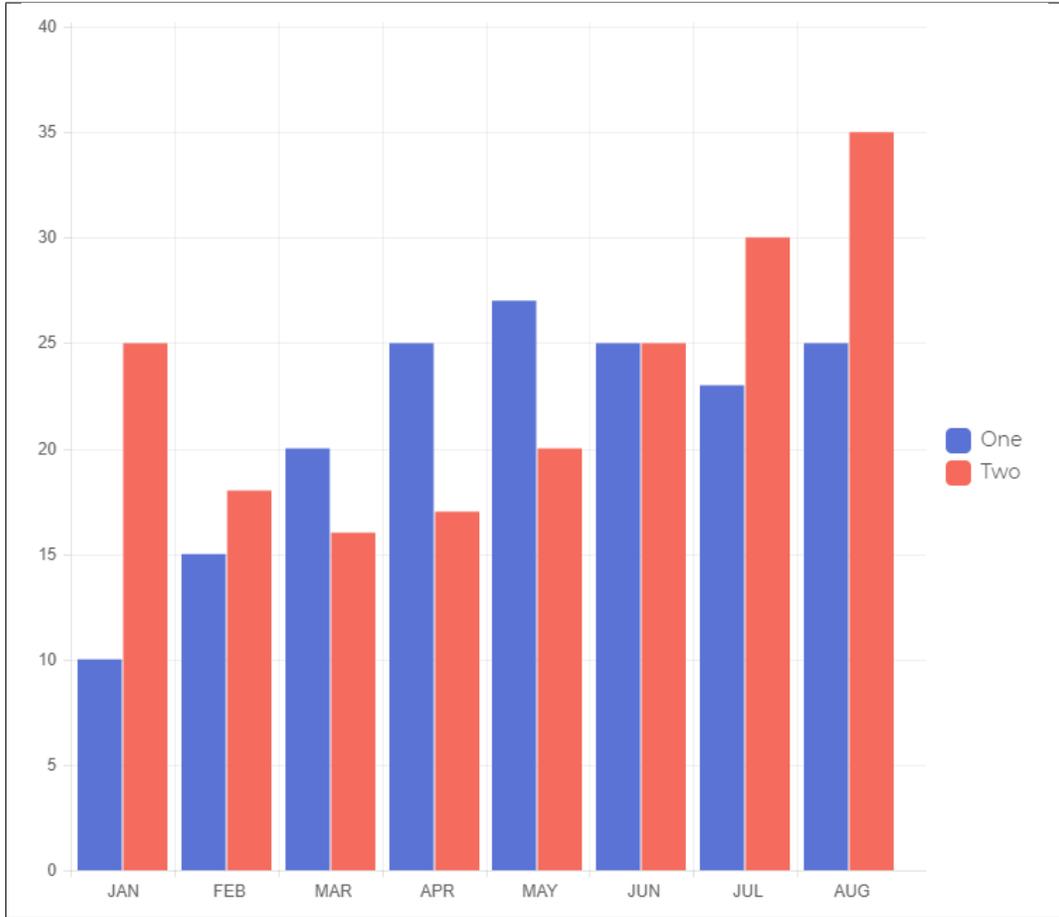

- **Pie**

- **Round**

- Line

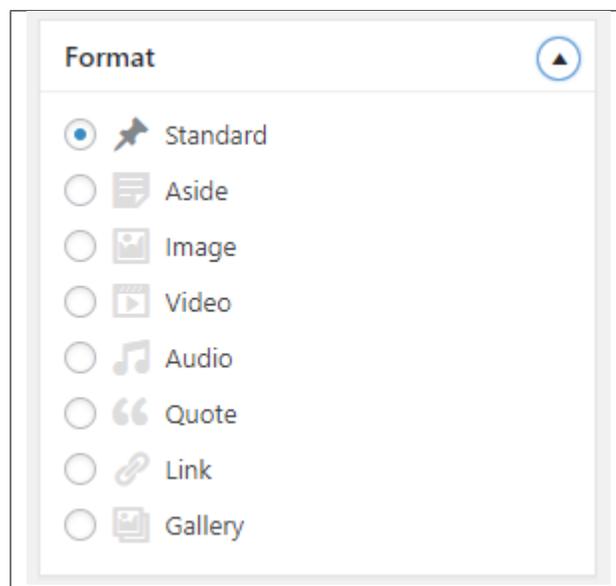

Blogs Posts

Weddington is loaded with options for the blog. It offers many different options for you to present your blog posts, along with several different blog post layouts. In addition, there are numerous theme options and shortcode options that allow you to customize how posts are displayed.

4.1 Create New Blog

No matter which method you use to display your blog posts, first thing you need to do is create them.

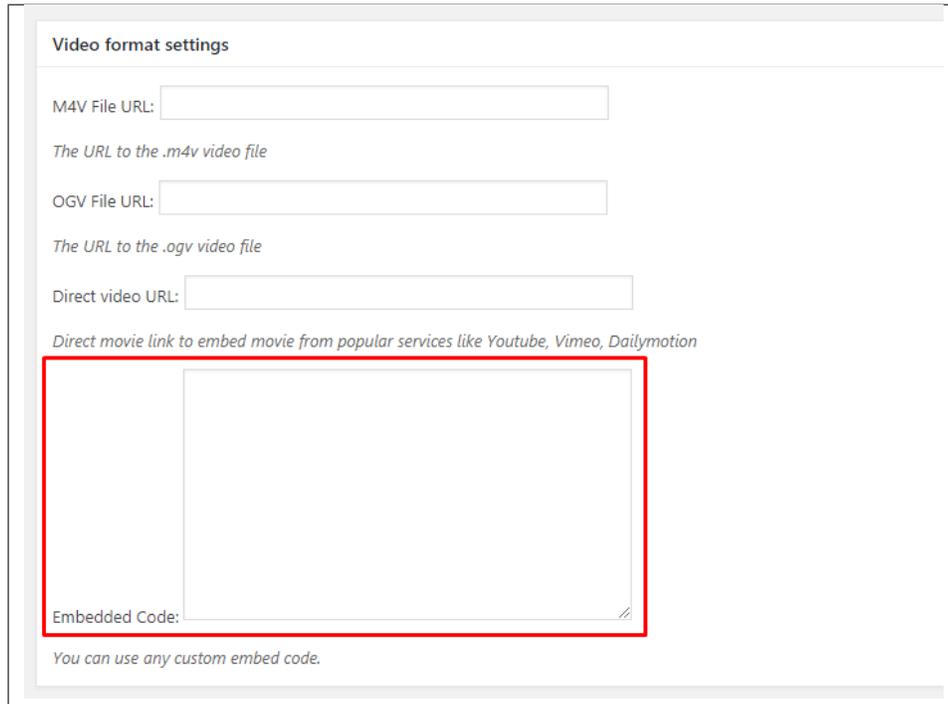

Weddington offers several blog post formats:

- **Standard** - The default format for the blog post. It will show only the text in the blogs page.

- **Aside**
- **Image** - The Featured Image and a small preview of the text will be shown in the blogs page.
- **Video** - A video and a small preview of the text will be shown in the blogs page.

To be able to use a Video for the blogs post page, the blog format should be *Video* and the Video format settings will show where you add the Embed code of the video.

Video format settings

M4V File URL:

The URL to the .m4v video file

OGV File URL:

The URL to the .ogv video file

Direct video URL:

Direct movie link to embed movie from popular services like Youtube, Vimeo, Dailymotion

Embedded Code:

You can use any custom embed code.

To add a video in the single page of the blog, you can use the Video element in the VC.

- **Audio** - An MP3 music and a small preview of the text will be shown in the blogs page.

To be able to use a Video for the blogs post page, the blog format should be *Video* and the Video format settings will show where you add the Embed code of the video.

Audio format settings

MP3 File URL:

The URL to the .mp3 audio file

OGA File URL:

The URL to the .oga, .ogg audio file

Poster URL:

The URL to the poster file

Poster height:

The height of the poster

```
<iframe width="100%" height="300"
frameborder="no"
src="https://w.soundcloud.com/player/?
url=https%3A//api.soundcloud.com/tracks/5468596&
color=%23ff5500&auto_play=false&hide_related=fals
e&show_comments=true&show_user=true&show_rep
osts=false&show_teaser=true&visual=true">
</iframe>
```

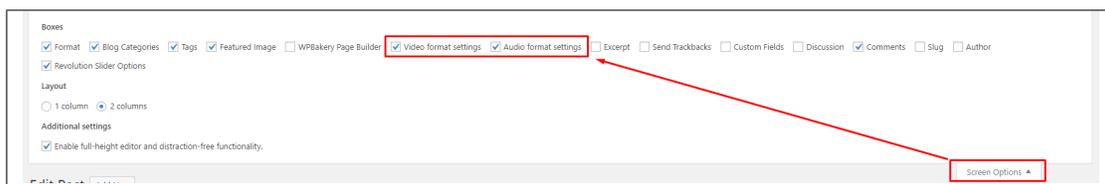

Embedded Code:

You can use any custom embed code.

To add a video in the single page of the blog, you can use the Video element in the VC.

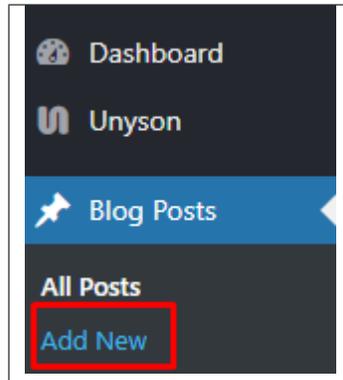

- **Quote** - The quoted word in the blog post will be shown in the blogs page.
- **Link** - A link in the blog post for a webpage will shown in the blogs page.
- **Gallery** - The image gallery in the blog post will be shown in the blogs page.

Note: If the settings for Video or Audio format is not displayed, go to *Screen Options* at the upper right side of the screen. Click the options for *Video format settings* or *Audio format settings*, this should display the settings.

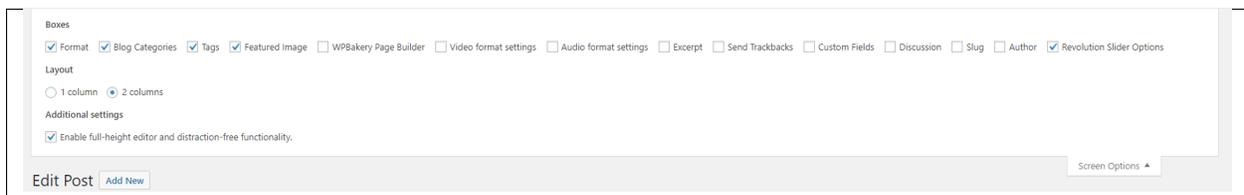

Follow the steps below to create a blog post:

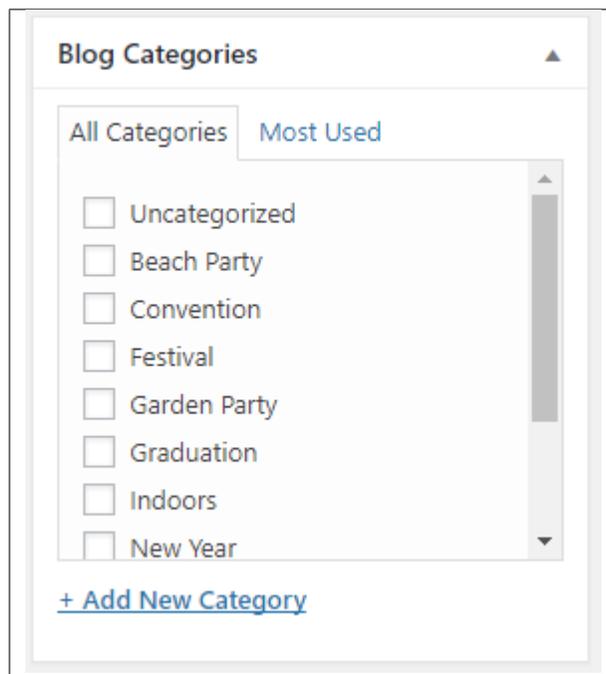

- **Step 1** - Navigate to *Blog Posts > Add New* in the Dashboard.

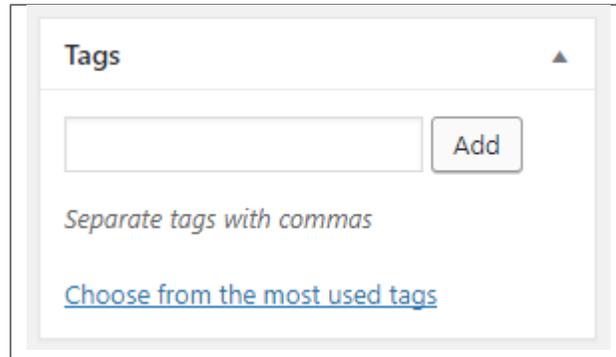

- **Step 2** - Create a title and insert your post content in the editing field. You can use any of our [shortcode](#) elements inside the post. If you want to use some additional fields, choose them from *Screen Options* at the top of the screen.

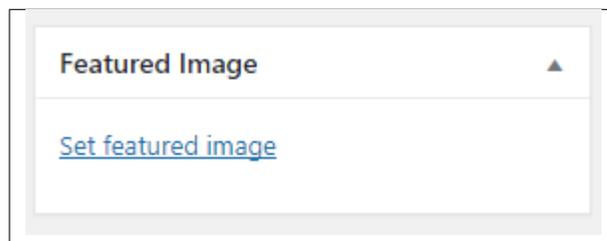

- **Step 3** - Add *Blog Categories* on the right side. Categories are meant for broad grouping of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. *Sub-categories* are made when a Category is added to a Parent Category . To assign it to the post, check the box next to the Category name.

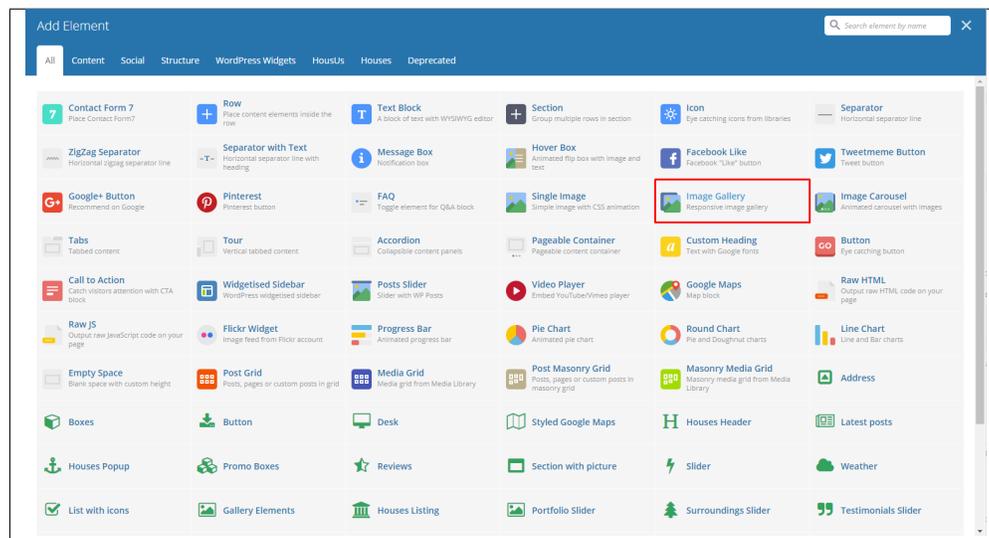

- **Step 4** - To add *Tags*, write the Tags at the textbox below the Blog Categories. Tags are meant to describe specific details of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical. Type the name of the tag in the field, separate multiple tags with commas.

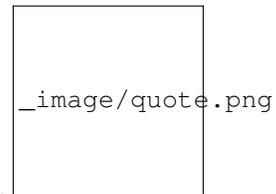

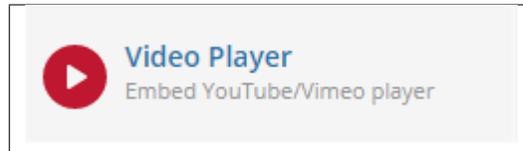

- **Step 5** - To add a *Single image*, click the Featured Image box, select an image and click *Set Featured Image*.

To add more than one image, use *Image Gallery* (Visual Composer element), each image will be a slide in the gallery slideshow. Gallery can be created by adding images from Media gallery or by adding External links of the images that will be used.

- **Step 6** – To post *Video*, use Video Player (Visual Composer element) and paste the direct video URL from Youtube, Vimeo or Dailymotion and more.
- **Step 7** – to post *Audio*, use Video Player (Visual Composer element) and paste the direct audio URL from Soundcloud, Mixcloud and more.

- **Step 8** – For *Quotation*, use WordPress *Blockquote* option (Shift + Alt + Q).

- **Step 9** – For *Links*, use WordPress *Inser/Edit Link* option (Ctrl + K).
- **Step 10** – Create an excerpt – *Excerpts* are optional hand-crafted summaries of your content that can be used in your theme. [Learn more about manual excerpts.](#)
- **Step 11** – Once finished, click *Publish* to save the post.

You will see all the Blogs created at *Blog Posts > All Posts*.

4.2 Blog Index Page

The most popular way of displaying blog posts is to setup *blog index page*. There all of your posts will be displayed and ordered by publish date.

To set the page as your post page, navigate to Posts page tool in *Settings > Reading* and choose Blog index page from the ones you created.

Note: On Blog index page you will see only your posts, so don't add any other content to it.

4.3 Blog Category

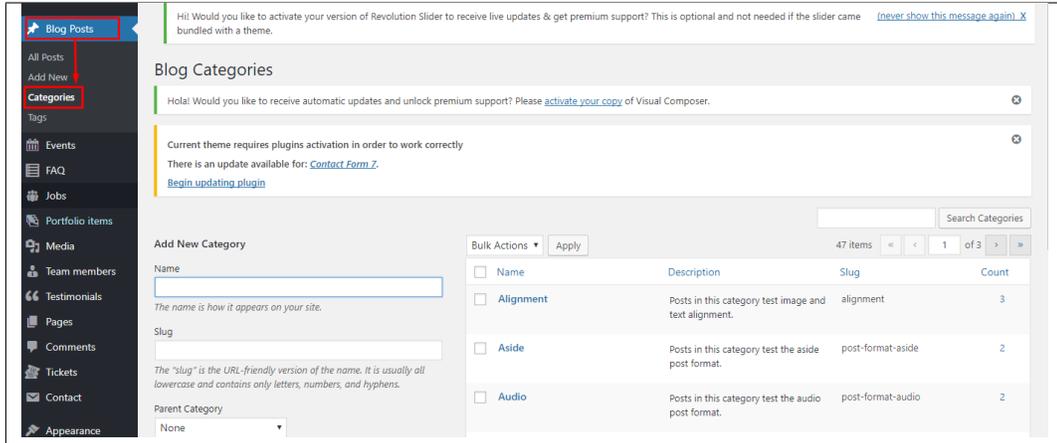

Categories are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a blog would make it easier to locate and post on similar topics by category.

4.3.1 Create Blog Category

To create a *Category* for a blog, follow these steps:

- **Step 1** - Navigate your Dashboard to *Blog Posts > Categories*. You will see the *Blog Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

Add New Category

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Category

Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.

Description

The description is not prominent by default; however, some themes may show it.

Add New Category

- **Name** - The name of the category.
 - **Slug** - The URL-friendly version of the name. Usually all lowercase.
 - **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
 - **Description** - Description of the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

4.3.2 Delete Blog Category

To delete a Category, navigate your Dashboard to *Blog Posts > Categories*.

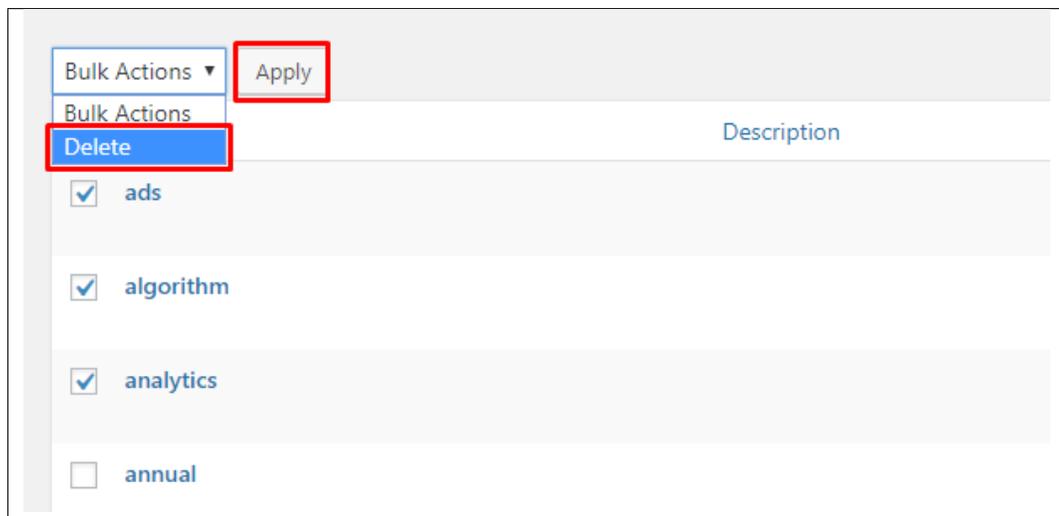

In the *Blog Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

4.4 Blog Tags

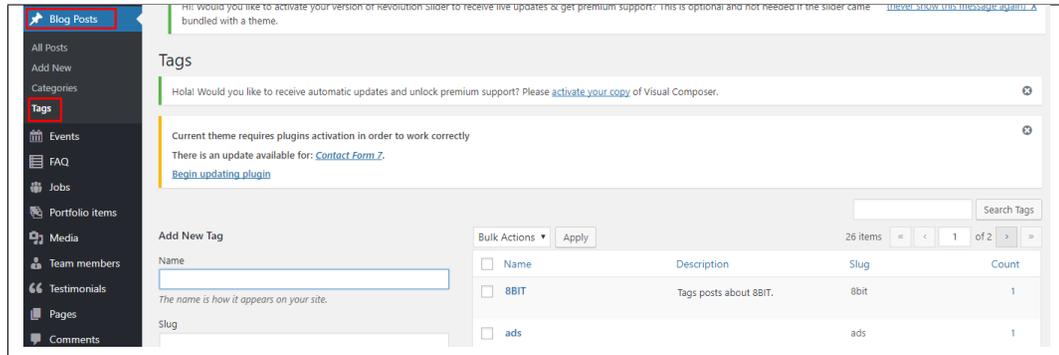

Tags are meant to describe *specific details* of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical.

Adding tags to a blog post would make it easier to relate a post with another post even if the categories are different.

4.4.1 Create Blog Tags

To create a *Tag* for a blog, follow these steps:

- **Step 1** - Navigate your Dashboard to *Blog Posts > Tags*. You will see the *Tags* page.

- **Step 2** - In the page, find the *Add New Tag* area. Add All the necessary information.

Add New Tag

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Description

The description is not prominent by default; however, some themes may show it.

- **Name** - The name of the tag.
 - **Slug** - The URL-friendly version of the name. Usually all lowercase.
 - **Description** - Description of the tag.
- **Step 3** - Once done filling out the information of the tag, click on *Add New Tag* button to save.

Note: Adding a tag may affect the tags from other component of the site.

4.4.2 Delete Blog Tags

To delete a tag, navigate your Dashboard to *Blog Posts > Tags*.

In the *Tags* page, you will see all the created tags.

To delete a tag, you have two options:

- **Single Delete** - Hover your mouse pointer on the tag that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple tags, click on the box beside the tags you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

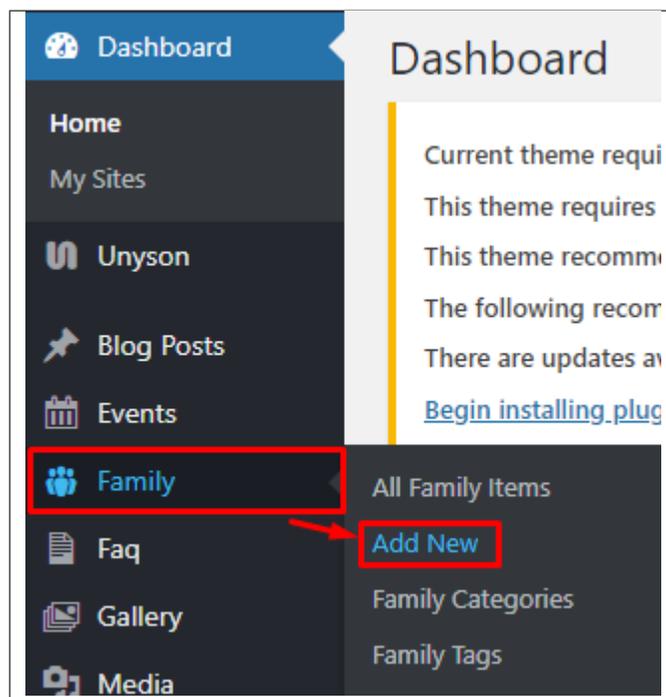

Note: Deleting a tag may affect the tags from other component of the site.

5.1 Create New Family

To create a new family member, follow the steps:

- **Step 1** - To start creating an Family, on your *Dashboard* navigate to *Family > Add New*. The *Add New Family Item* page will show.

- **Step 2** - Once your in the *Add New Family* page, you can add details about the Family like name, picture,

category, etc., to help with classifying the family member.

- **Step 3** - This are the needed information for the Family, you can add the details.

The screenshot shows the 'Add New Family Item' form. It includes a title field (1), a 'Settings' section with a description field and an options button (2), a 'Family Categories' section with checkboxes for 'Jane's Family' and 'John's Family' and an 'Add New category' link (3), a 'Family Tags' section with a text input, an 'Add' button, and a link to 'Choose from the most used tags' (4), and a 'Featured Image' section with a 'Set featured image' link (5). A 'Publish' sidebar is on the right with 'Save Draft', 'Status: Draft', 'Visibility: Public', 'Publish immediately', and a 'Publish' button. A 'Screen Options' dropdown is in the top right corner.

1. **Title** - The name of the Family member.

Sample for FAQ Page

Questions

- ❖ Guests
 - ❖ What Should I Wear to a Wedding?
 - ❖ Where Do I Sit at a Wedding?
- ❖ Wedding
 - ❖ Who Pays for What in a Wedding?
 - ❖ How long should I plan a wedding?
- ❖ Wedding Gifts
 - ❖ Give the perfect wedding gift

Guests

1. What Should I Wear to a Wedding?

Most wedding invitations will give you a clue about what to wear. If the invitation is white linen, and the wedding is in the evening, it will be more formal than one held earlier in the day.

2. Where Do I Sit at a Wedding?

Know where to sit if there is no usher available to assist. Traditionally, the bride's guests sit on the left facing the altar, and the groom's guests sit on the right. However, that isn't etched in stone and can vary according to the wedding couple's wishes.

Wedding

1. Who Pays for What in a Wedding?

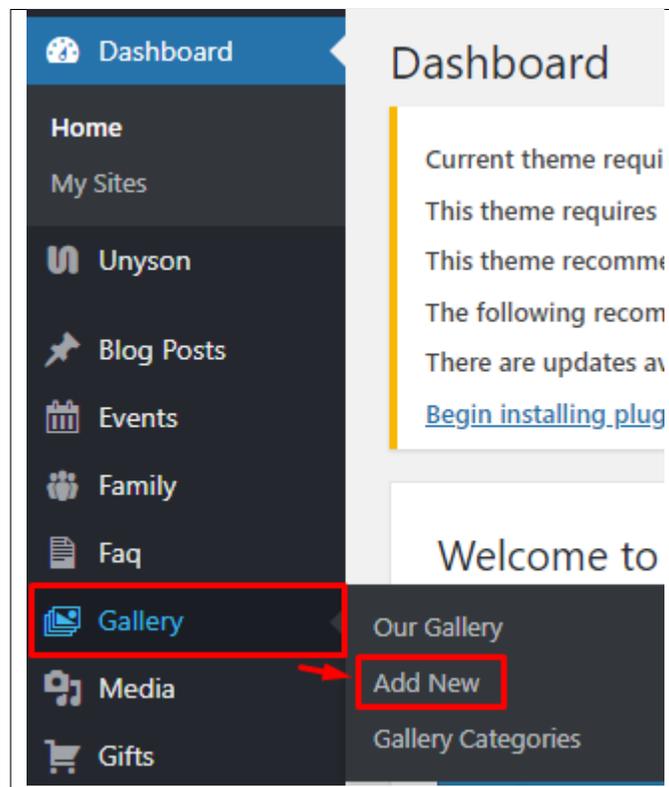

Traditions still exist, but today's brides and grooms are more pragmatic. Often the bride and groom cover many of the expenses of their own wedding.

2. How long should I plan a wedding?

It depends on how big the wedding is. For me, the longer the preparation the better. You can slowly plan the wedding and not be stressed by everything.

7.1 Create New Gallery

To create a new *Gallery* item, navigate in WordPress Dashboard to *Gallery > Add New*.

The *Add New Gallery Item* page will show. Add the details for the *Gallery*.

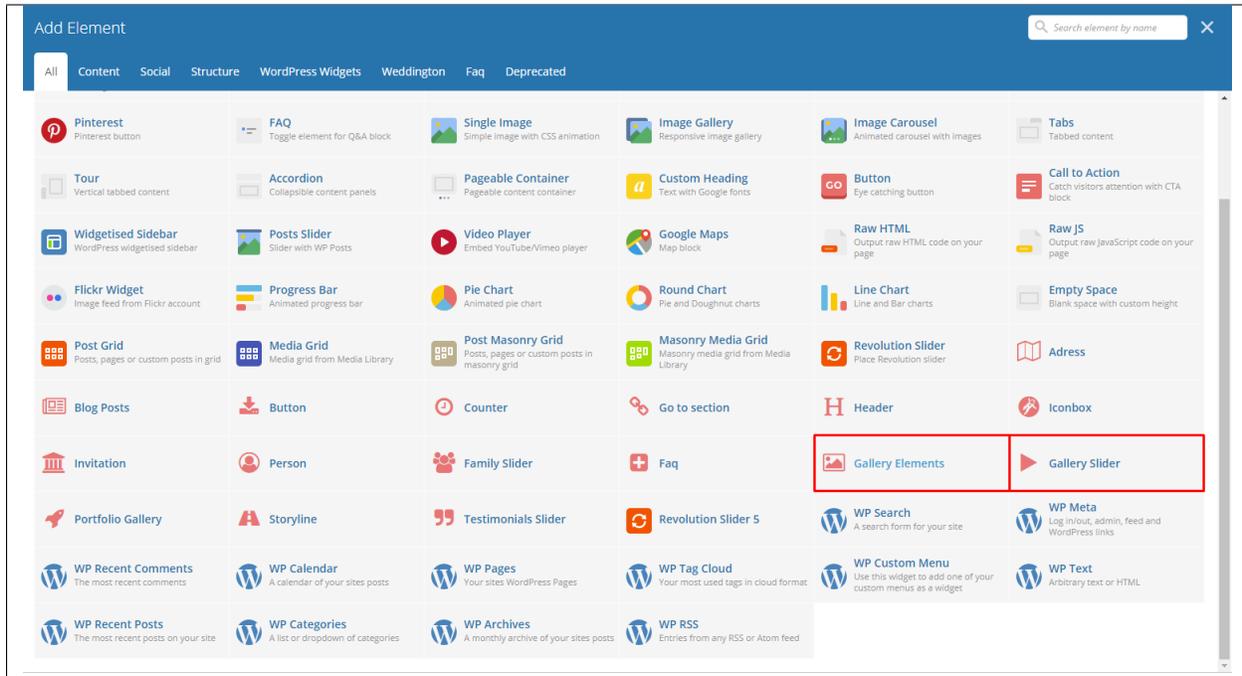

The screenshot shows the 'Add New Gallery Item' form. At the top, there is a text input field for the title, labeled '1'. Below it are 'Backend Editor' and 'Frontend Editor' tabs. A 'Revolution Slider Options' dropdown menu is visible. The 'Settings' section is expanded, showing 'Gallery options' (labeled '2') with a 'Select gallery items' area containing an eye icon and an 'Add Images' link. To the right, the 'Publish' sidebar includes 'Save Draft', 'Preview', 'Status: Draft', 'Visibility: Public', and 'Publish immediately' options, along with a 'Publish' button. Below the 'Publish' sidebar is the 'Gallery Categories' section (labeled '3') with 'All Gallery Categories' and 'Most Used' tabs, a 'Wedding Attire' checkbox, and a '+ Add New category' link. At the bottom right is the 'Featured Image' section (labeled '4') with a 'Set featured image' link.

1. **Title** - Title of the gallery.
2. **Gallery options** - Add the images for the gallery.
3. **Gallery Categories** - Group a gallery with other gallery in the same category.

To delete a testimonial, you have two options:

- **Single Testimonial Delete** - Hover your mouse pointer on the testimonial that you would like to delete. You will see a *Trash* option pop-up. Click on *Trash* to delete.

- **Multiple Testimonials Delete** - To delete multiple testimonials, click on the box beside the testimonials you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

11.2 Testimonial Category

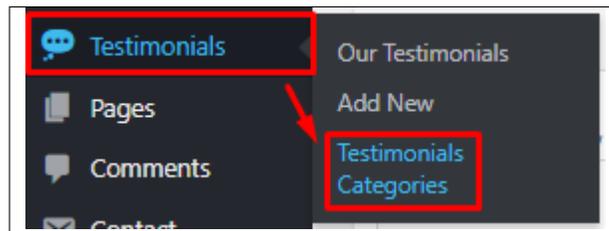

Categories are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a Testimonial would make it easier to locate and post on similar topics by category.

11.2.1 Create Testimonial Categories

Categories are convenient ways to organize your FAQ items, that can be added to more than just one category.

To create new *Testimonial Category*, navigate in WordPress Dashboard to *Testimonial > Testimonial Categories*.

The *Testimonial Categories* page will show, here you can add the details of the Testimonial Category that you would like to create.

Testimonials Categories

Add New category

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Testimonials Category

Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

Description

The description is not prominent by default; however, some themes may show it.

- **Name** - The name of the category.
- **Slug** - The URL-friendly version of the name. Usually all lowercase.
- **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
- **Description** - Description of the category.

After adding all the details, click on the *Add New category* button to save.

11.2.2 Delete Testimonial Category

To delete a Category, navigate your Dashboard to *Testimonial > Testimonial Categories*.

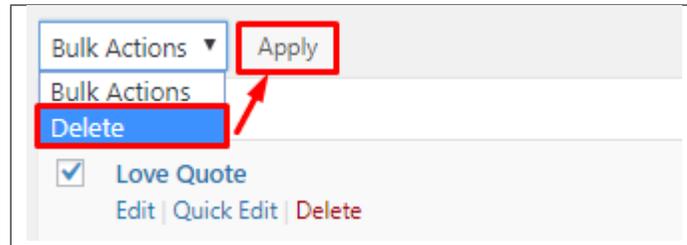

In the *Testimonial Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

11.3 Create Testimonial Page

Testimonial items of Weddington is generated by the theme from *Testimonial*.

To create a simple *Testimonial Page*, follow these steps:

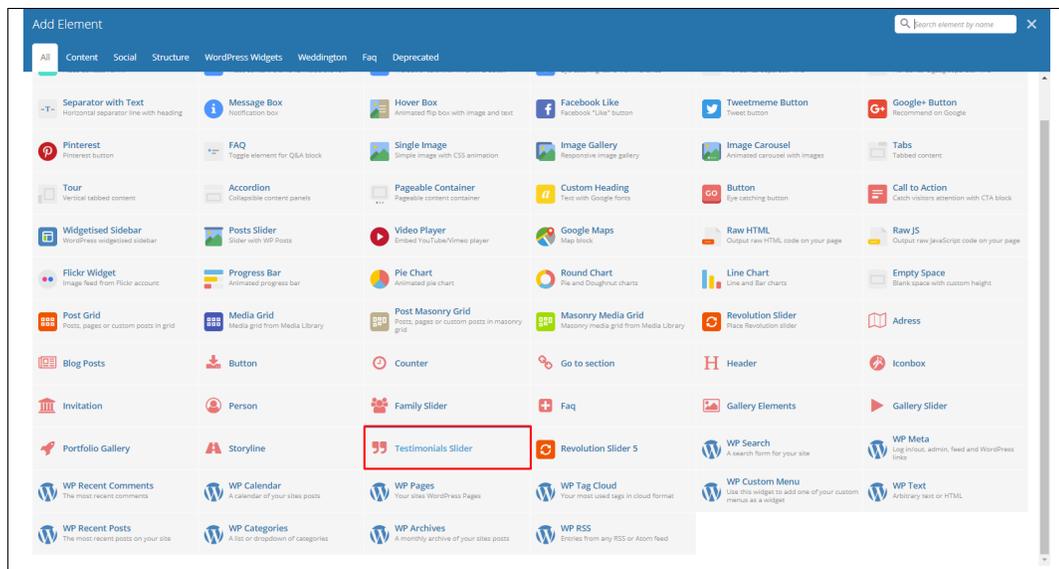

- **Step 1** - Create a new page where to add the *Testimonial*.

The image shows a screenshot of the WordPress dashboard. On the left is a dark sidebar menu with various icons and labels. The 'Pages' menu item is highlighted with a red rectangular box. A red arrow points from this box to the 'Add New' link, which is also highlighted with a red rectangular box. The main content area on the right is titled 'Dashboard' and contains several widgets. The top widget is a yellow notification about theme requirements. Below it is a 'Welcome to' message with a 'Get Started' section containing a 'Customize Y' button. Further down, there are statistics for '7 Posts' and '1 Comment', and a section for 'Activity' with a list of recent posts and their timestamps.

- **Step 2** - Add a row element to the page, click the *Edit this row* option of the row. The *Row Settings* will pop-up.

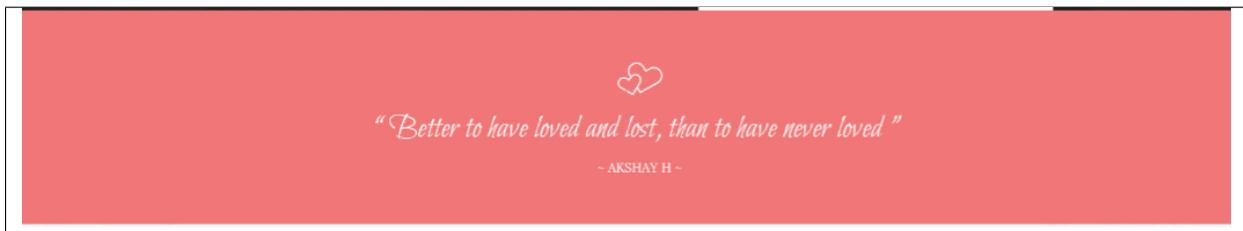

- **Step 3** - Change the settings to your preference.
- **Step 4** - In the row, to add a title for the page. You have the option to add a *Text Block* or *Section/Header Title* element.
- **Step 5** - Add a new row to add the *Testimonial* items. To add the *Testimonial* items, add a *Testimonial Slider* element to the page.

This is the elements that will add Testimonial items on the page. For more information about this elements, go to [Weddington Custom Shortcodes > Testimonial Slider](#).

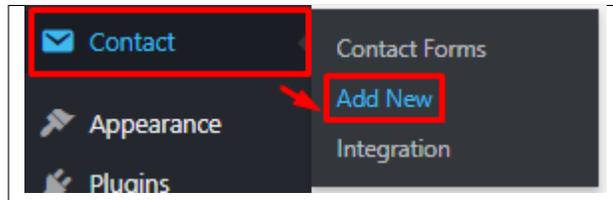

- **Step 6** - You can customize the page by adding other elements to the page.
- **Step 7** - Once satisfied with the page, click *Publish* to save.

Sample Testimonial on Page

12.1 Create Contact Form

To create a new *Contact Form* item, navigate in WordPress Dashboard to *Contact > Add New*.

The *Add New Contact Form* page will show. Add the details for the *Contact Form*.

Enter title here

Contact Form 7 Settings

Select contact form

Send us a Message

Choose previously created contact form from the drop down list.

Search title

Enter optional title to search if no ID selected or cannot find by ID.

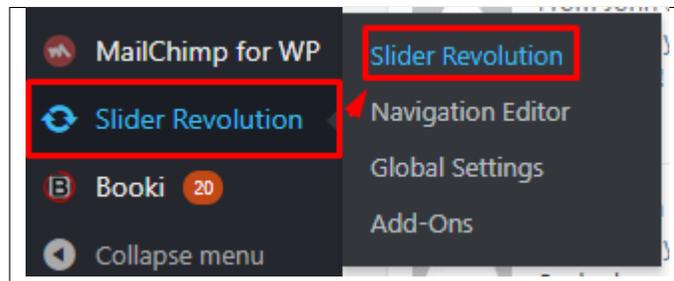

Close Save changes

- **Select contact form** - The form you want to add to the page.

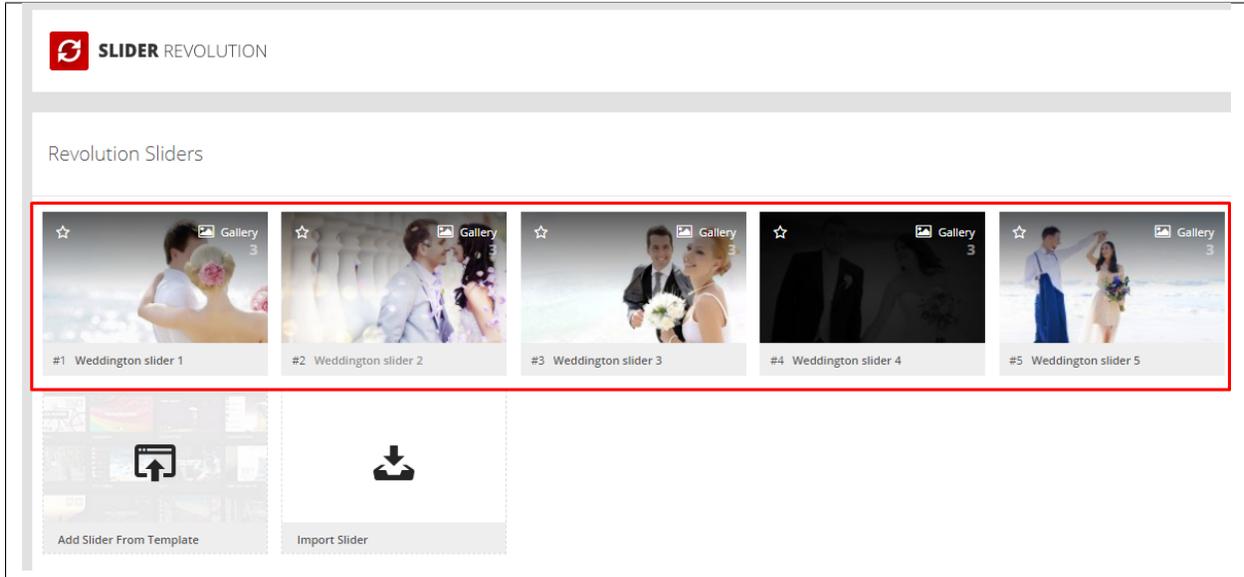

- **Search title** - Optional title to search if no form is added.
- **Step 7** - You can customize the page by adding other elements to the page.
- **Step 8** - Once you have finished customizing the page, click on the *Publish* button.

13.1 Edit a Revolution Slider

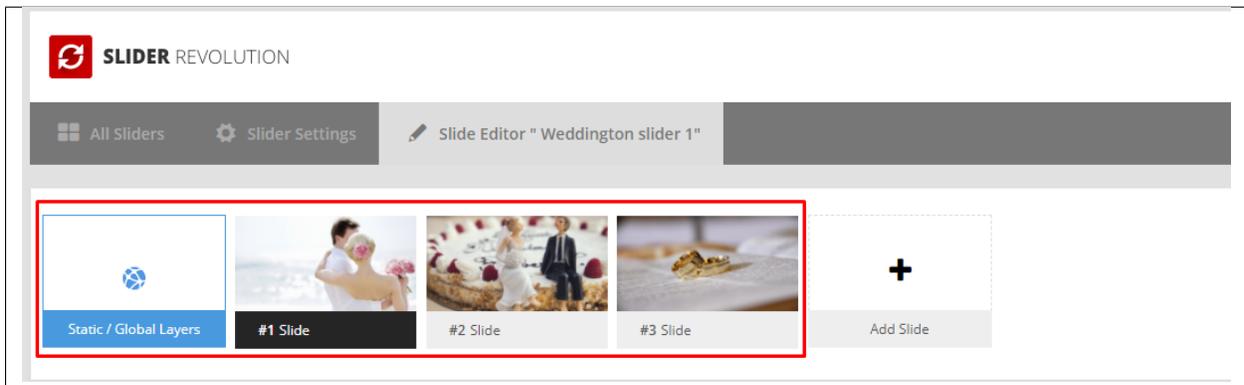

To edit an existing revolution slider, in your dashboard go to *Slider Revolution > Slider Revolution*.

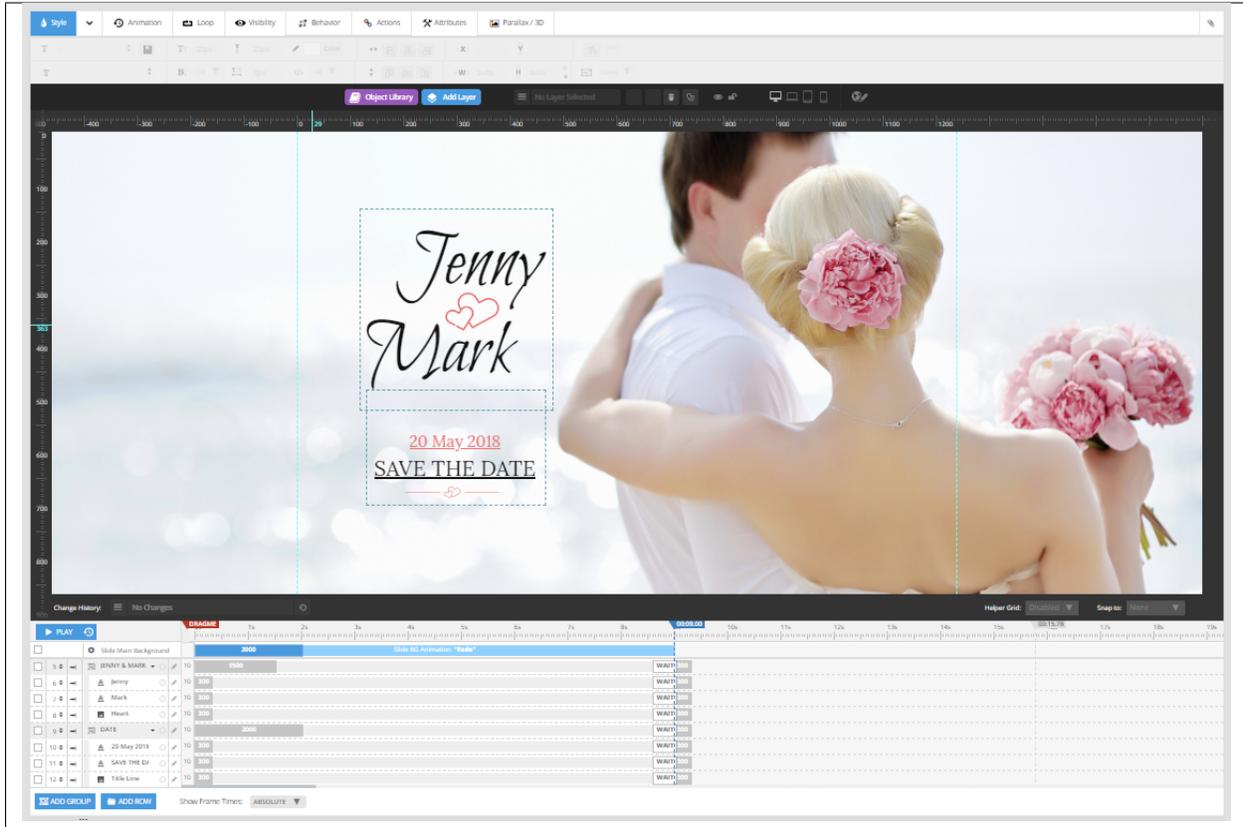

You can see the existing revolution slider at the *Revolution Sliders* area. Choose the revolution slider that you would like to edit.

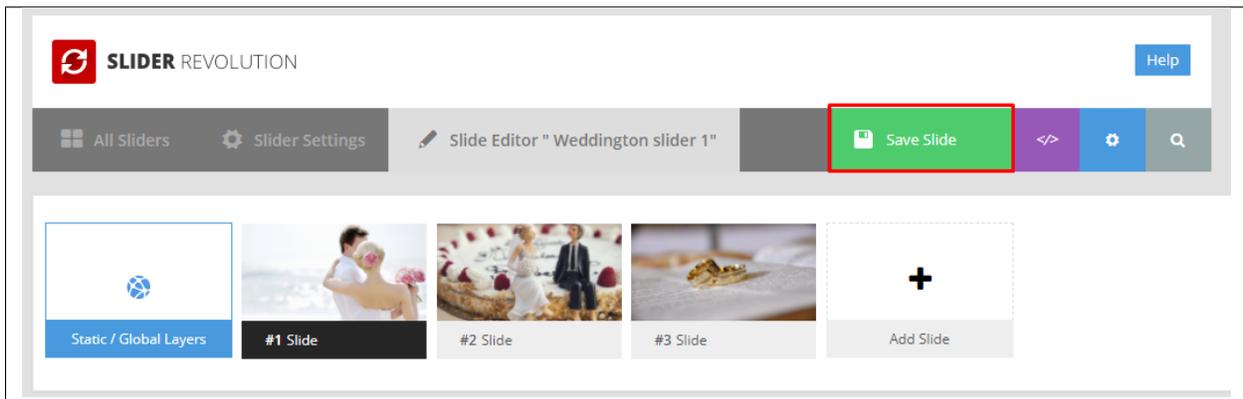

In the Slide Editor, you will see the slides that are created for a revolution slider. Click on the slide you want to edit.

You can edit the text and image content of the revolution slider as you see fit in the editor. For more info on how to use the Revolution Slider, [click here](#).

Once you are satisfied, click the *Save Slide* button at the upper right of the page.

14.1 Widgets

Widgets are small blocks of content, which you can find in theme footer or sidebar. They were originally designed to provide a simple and easy-to-use way of giving design and structure control of the WordPress Theme to the user, which is now available on WordPress Themes to include the header, footer, and elsewhere in the WordPress design and structure.

Widgets [Manage with Live Preview](#)

Available Widgets

To activate a widget drag it to a sidebar or click on it. To deactivate a widget and delete its settings, drag it back.

Inactive Widgets

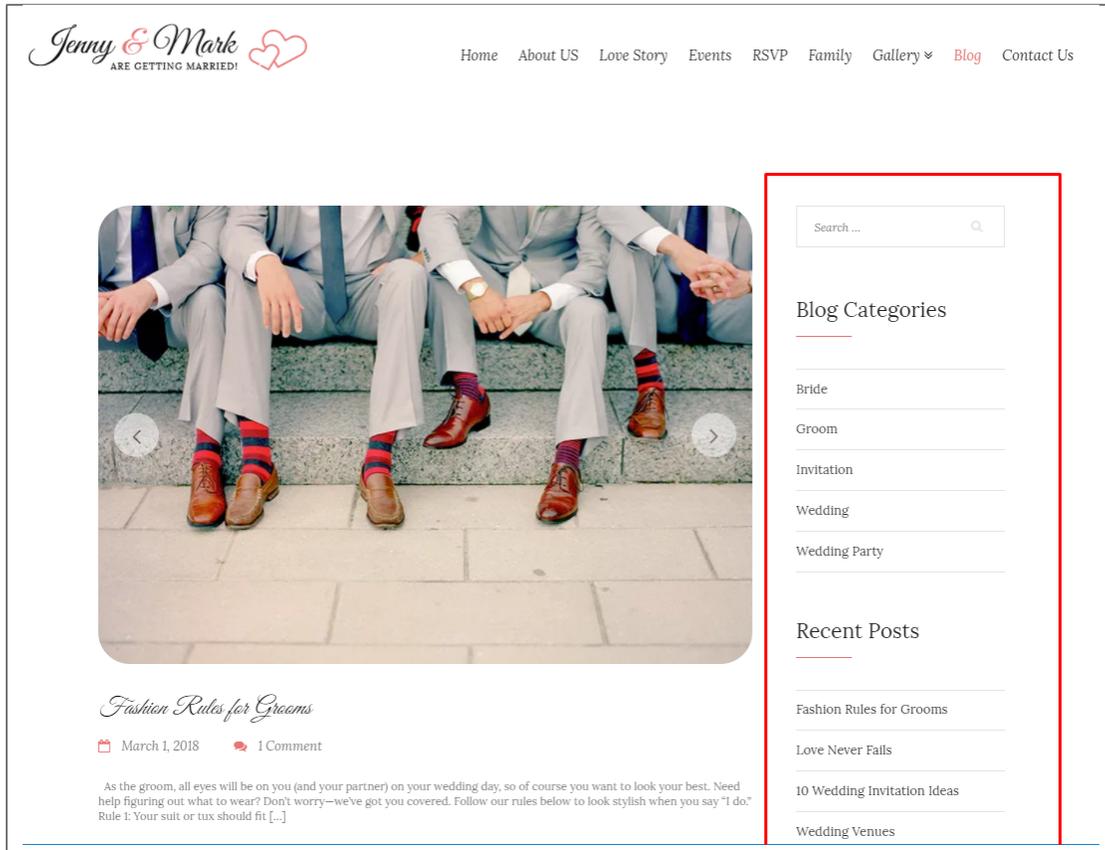

Drag widgets here to remove them from the sidebar but keep their settings.

Blog sidebar ▼

14.1.1 Sidebars

In Weddington you have access to 1 sidebars that can be customized using available theme widgets.

- **Blog sidebar**

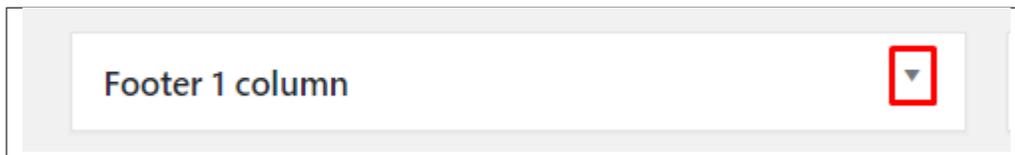

14.1.2 How to Edit Widgets

You can access widget edit screen under *Appearance > Widgets* panel or via *Customize* on path *Appearance > Customize > Widgets*. It has three main areas:

- Available Widgets
- Inactive Widgets
- Inactive Sidebars and widget areas

To add a widget to your site, drag and drop the name of the widget you want to use from the *Available Widgets* section into one of the sidebar areas on the right-hand side of the window.

After you have added it, the widget will open up or if it doesn't, you can click on the triangle to open it, and you can change the order by dragging the widget.

The specific settings needed will depend on what type of widget you are using.

For instance, if it is a text widget, you just need to type in the text (and optionally, HTML code), and save the widget.

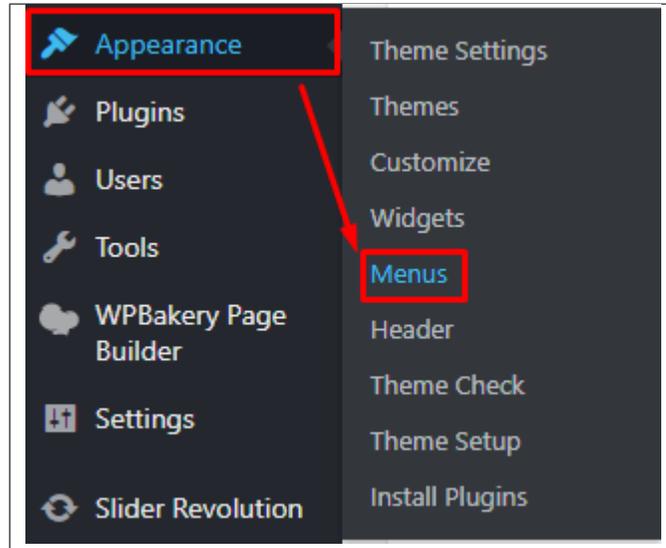

14.2 Menus

Menus are a list of commands or options you can customize for you to use in your site.

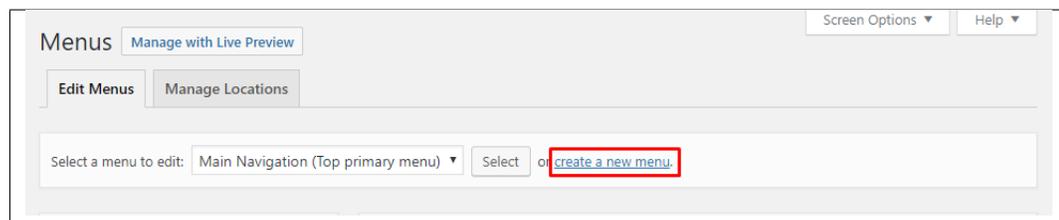

14.2.1 Menu Setup

To make a simple menu, follow the steps:

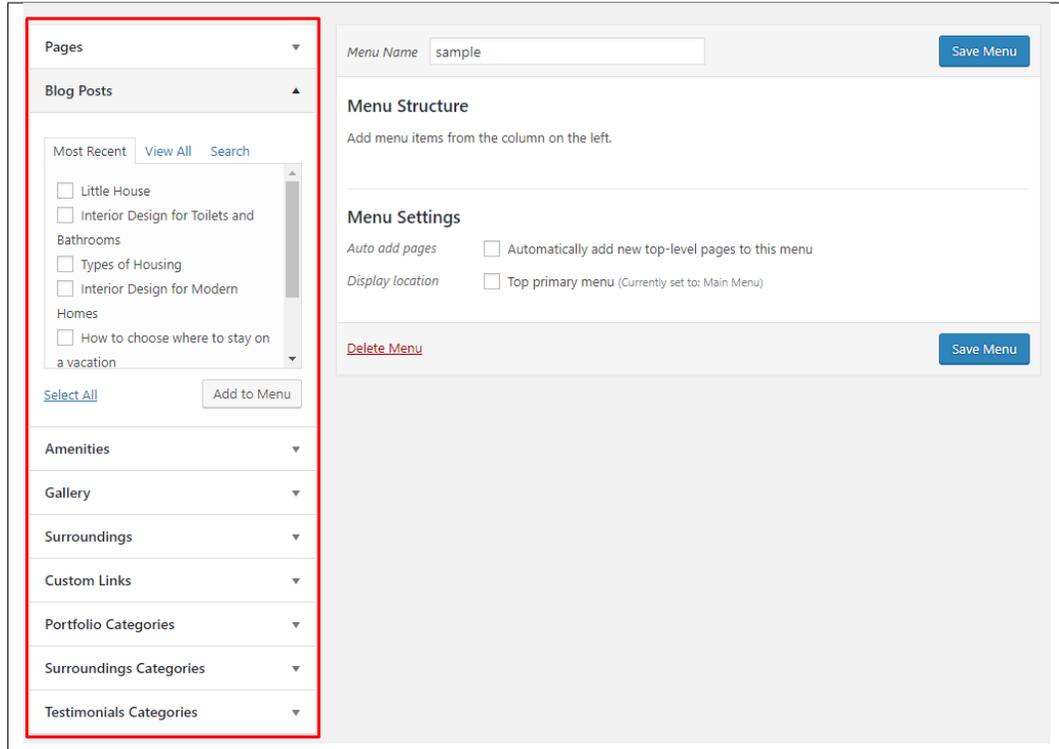

- **Step 1** - Navigate your Dashboard to *Appearance > Menus*. The *Menus* page will show.

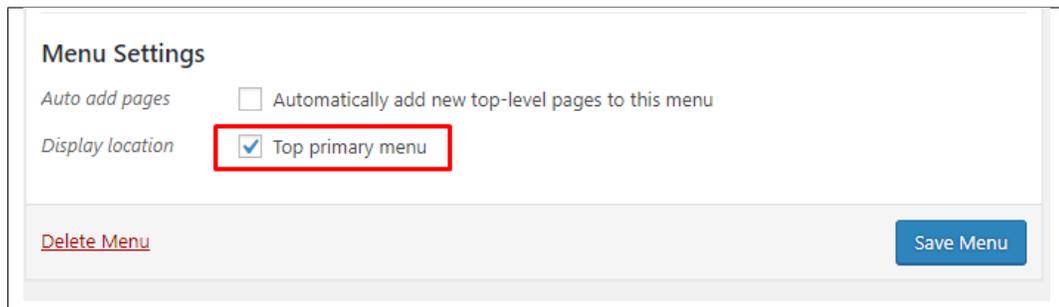

- **Step 2** - In the menus page, you can edit a menu or make a new menu. To make a new menu, locate *create a new menu*.

- **Step 3** - You will be asked to name your menu. After naming the menu, click *Create Menu*.
- **Step 4** - From the right side choose pages, links, or categories that you want to add to your menu and click on *Add to Menu*. Once menu items are added, you can reorder or nest them via drag and drop tool. Remember to click Save Menu when you finish to keep your changes saved.

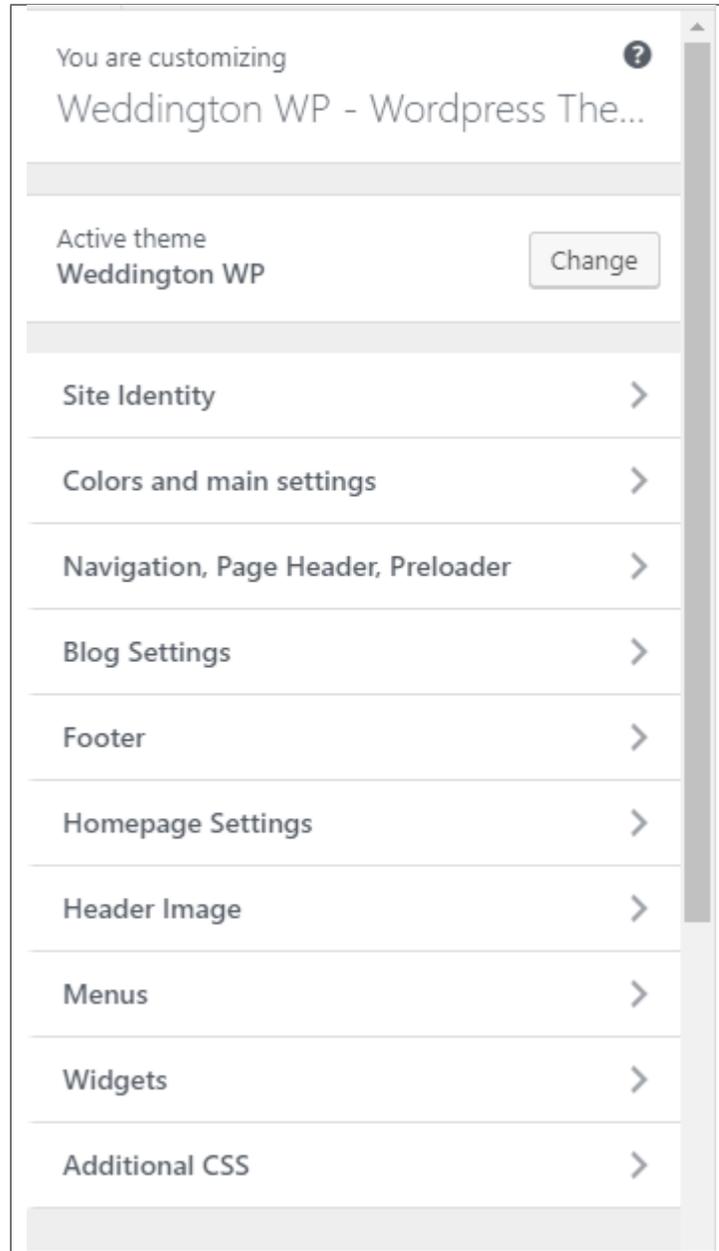

- **Step 5** - You can set a menu as a *Top primary menu*.

- **Step 6** - After any changes, click on *Save Menu* button.

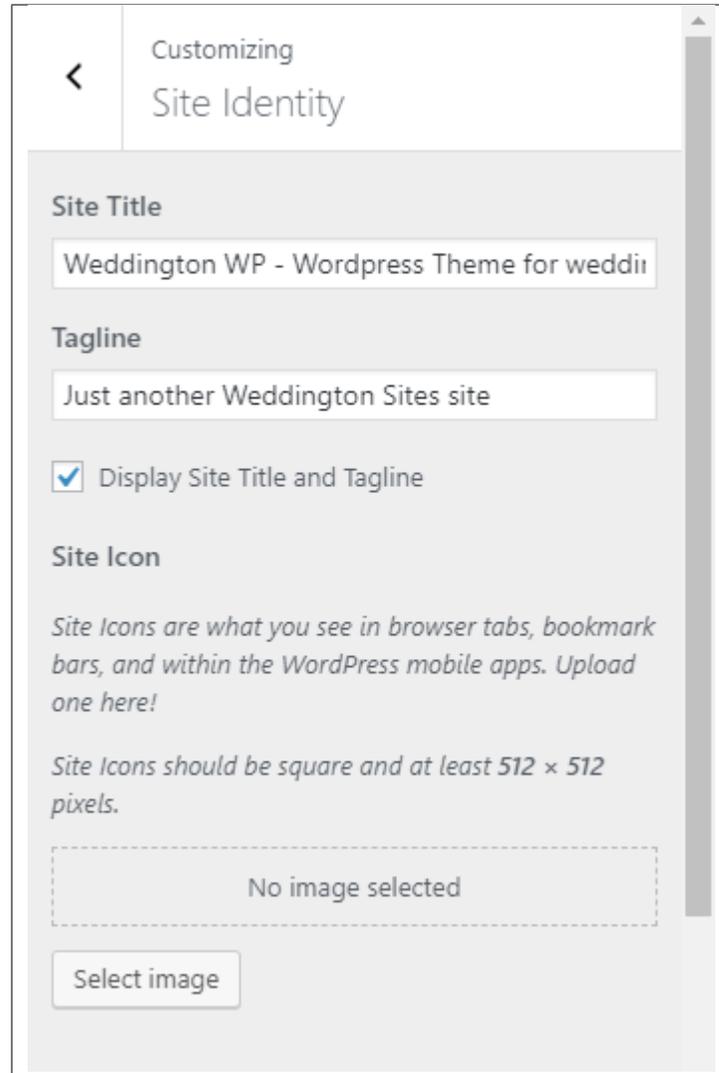

Customising Weddington

Weddington comes with an advanced customizer, which allows to edit most of the theme's elements in one place. If you want to use it, navigate to *Appearance > Customize*.

15.1 Site Identity

Here you will have the option to customize your site's identity or how it can be viewed by people.

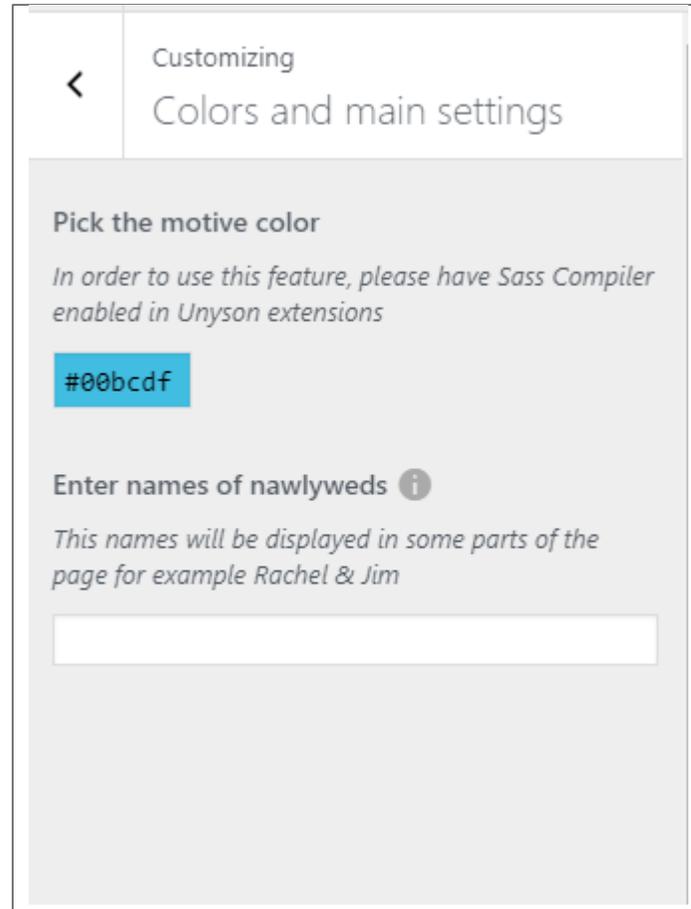

The image shows a screenshot of the WordPress Customizer interface, specifically the 'Site Identity' section. At the top, there is a back arrow and the text 'Customizing Site Identity'. Below this, there are three main sections: 'Site Title' with a text input field containing 'Weddington WP - Wordpress Theme for weddi...', 'Tagline' with a text input field containing 'Just another Weddington Sites site', and a checked checkbox labeled 'Display Site Title and Tagline'. The 'Site Icon' section includes a descriptive paragraph: 'Site Icons are what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. Upload one here!' followed by a note: 'Site Icons should be square and at least 512 x 512 pixels.' Below this is a dashed rectangular box containing the text 'No image selected' and a 'Select image' button.

- **Site Title** - The title of the site you created.
- **Tagline** - The slogan/catchphrase for you site. What people will remember if they see your site.
- **Site Icon** - The icon used as a browser or app icon. Icons must be square, and at least 512 pixels wide and tall.

Add all the information you like to add, then click on the *Save & Publish* button.

15.2 Colors and main setting

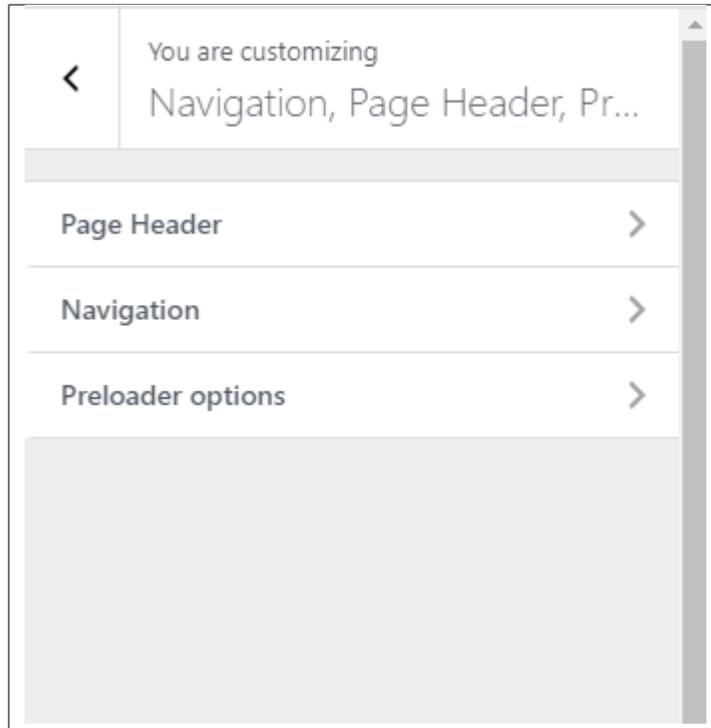

You can pick the color scheme of the site here.

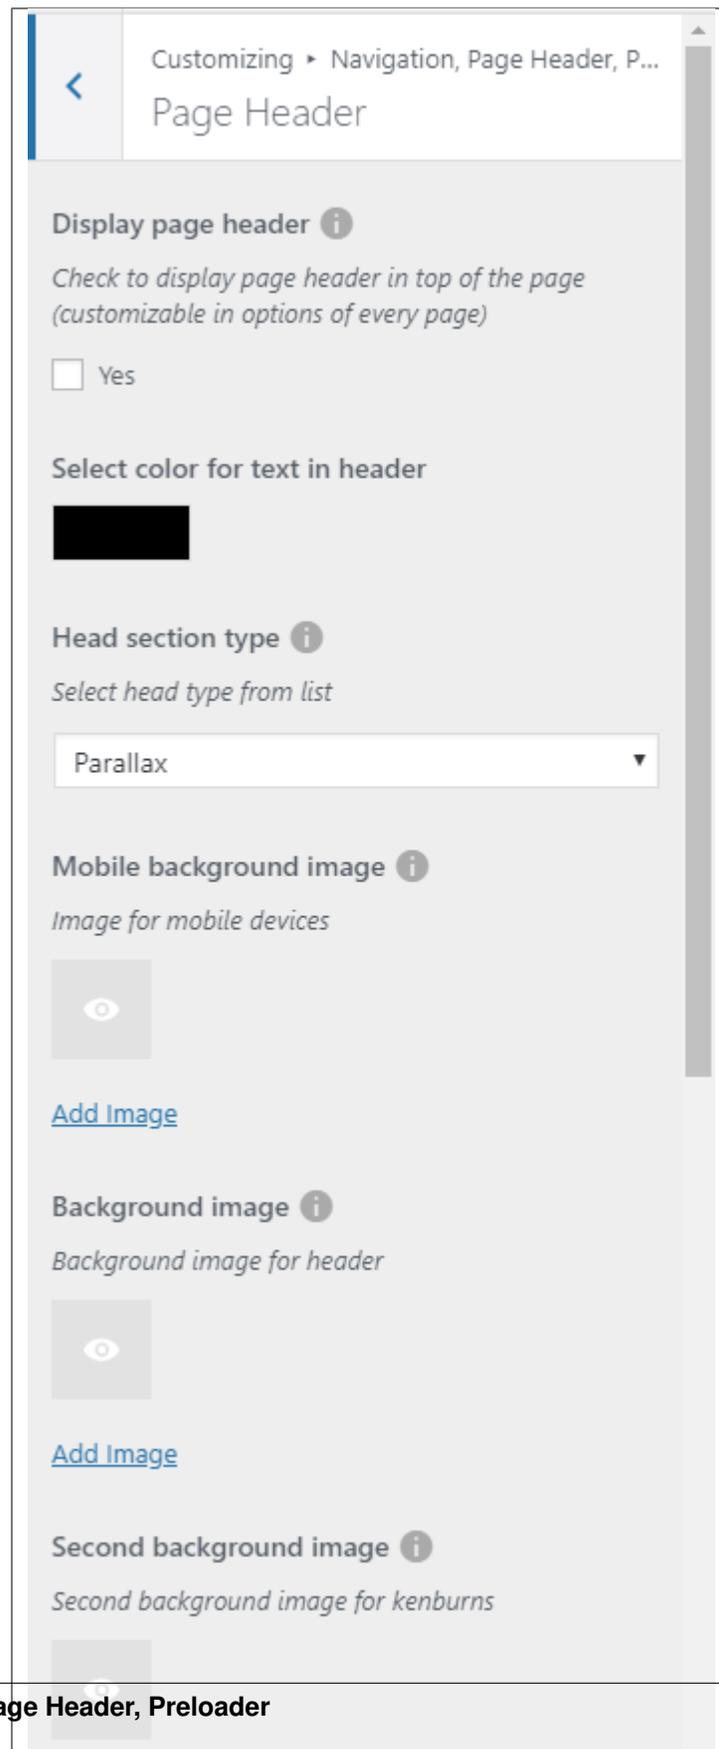

- **Pick the motive color** - Pick the main color scheme of the site.
