
WTForms-Test Documentation

Release 0.1

Konsta Vesterinen

Aug 14, 2017

Contents

1	QuickStart	3
2	Indices and tables	5

WTForms-Test provides various pytest unittest helpers for testing WTForms based forms.

CHAPTER 1

QuickStart

Consider the following simple form.

```
from wtforms import Form
from wtforms.fields import IntegerField
from wtforms.validators import DataRequired

class UserForm(Form):
    age = IntegerField(validators=[DataRequired()])
```

Writing tests for would be as easy as:

```
from wtforms_test import FormTestCase

class TestUserForm(FormTestCase):
    form_class = UserForm

    def test_age_is_required(self):
        self.assert_required('age')
```

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
