
youten Documentation

Release 1.0

Kiran Gangadharan

Sep 27, 2017

Contents

1	API	3
1.1	Create a snippet	3
1.2	Get all snippets	3
1.3	Get all snippets by programming language	3
1.4	Get a particular snippet	4
1.5	Update a snippet	4
1.6	Delete a snippet	4
1.7	Search for a snippet	4
2	Indices and tables	5

Youten is a simple app to help manage your code snippets. This documentation covers the brains(API) behind this app.

Note: All request-response communication should be done in JSON.

Create a snippet

`/v1/snippets` POST

params:

- code snippet
- programming language

returns:

- 201 CREATED

Get all snippets

`/v1/snippets` GET

returns:

- JSON array of all snippets sorted by the updated time

Get all snippets by programming language

`/v1/snippets/language/<language>` GET

returns:

- JSON array of all snippets created in the specified language

Get a particular snippet

/v1/snippets/<snippet_id> GET

returns:

- Snippet details as JSON

Update a snippet

/v1/snippets/<snippet_id> PUT

params: updated snippet

returns:

- 200 OK

Delete a snippet

/v1/snippets/<snippet_id> DELETE

returns:

- 200 OK

Search for a snippet

/v1/snippets/search POST

params:

- query (Could be language or even a portion of code snippet)

returns:

- JSON array of snippets matching the query

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
