This project tests traditional Chinese characters with ctex in fontset=ubuntu

Release 1.0.0

Dr. Gao Si Yu

Oct 26, 2019

Table of Contents:

This project tests traditional Chinese characters with `ctex` in `fontset=ubuntu`.

The followings are the settings in `conf.py`.

```python
# -- Options for LaTeX output ---------------------------------------------
latex_engine = 'xelatex'
latex_use_xindy = False

latex_docclass = {
    'manual': 'ctexbook'
}

latex_elements = {
    # The paper size ('letterpaper' or 'a4paper').
    #
    'papersize': 'a4paper',

    # The font size ('10pt', '11pt' or '12pt').
    #
    'pointsize': '10pt',

    'extraclassoptions': r'fontset = none',

    # Additional stuff for the LaTeX preamble.
    #
    'preamble': r'''

\usepackage{ctex}
\ctexset{fontset = ubuntu}

\usepackage{zhlipsum}

\usepackage{indentfirst}
\setlength{\parindent}{2em}
''',

    # Latex figure (float) alignment
    #
    # 'figure_align': 'htbp',
}
```

zh-hant HK vs TW

This chapter tests some traditional Chinese characters in different regions. The characters have the same meaning but are written differently. They are, however, all traditional Chinese.

The followings are HK version.

The followings are TW version.

The followings are simplified version.
